  - Educational Session
  - Quarterly Business Meeting
  - Quarterly Joint Stakeholders Meeting (RSC & SPP BoD)
- October 27: SPP Board of Directors and Members Committee

HITT C2 – Waiver process to reallocate transmission costs

- Creates a process for utilities to request the costs of specific transmission lines in wind-rich zones be allocated *regionally* instead of to the local zone
  - Potential remedy to address a misalignment of costs and benefits for existing lines
- RSC approved tariff language to implement C2 recommendation
  - Vote was 7-1-3 (OK, TX, & LA abstained; NM opposed)
  - SPP will file tariff language at FERC for approval

HITT C1 – Combine pricing zones

- Goal of C1 is to share *new* transmission costs across larger areas by combining and enlarging the existing pricing zones.
  - Recognizes the reality that energy is increasingly serving load outside the local area where it originates (imported and exported through multiple zones).
- *Forward-looking* solution to more appropriately allocate transmission costs associated with disperse generation resources
- Controversial topic
  - Kansas utility stakeholders are not aligned
  - Potential cost shifts
- RSC reached a consensus to slow down the implementation of this recommendation while we wait on additional studies and data

SEAMS Committee Update

- Commissioner Walker reported that the SEAMS Committee continues to meet and consider items related to better coordination between SPP & MISO
