Kansas City Power & Light

CURB

KCC Staff

Formal Public Comments Session

KCP&L filed a request with the Kansas Corporation Commission to update rates for our Kansas customers. If approved, new rates are expected to become effective in late December 2018.

## What is driving this rate request?

### Tax refund

- The impact of the Tax Cuts and Jobs Act decreases our tax liability. **We're asking to pass along 100% of those savings to you.**

### Rising costs of providing electric service

- A new **customer information system** replaced our old billing system, which was no longer supported by certain vendors and didn't provide functionality needed to efficiently serve customers.
- **Plant and infrastructure investments** that support safe, reliable service.
- **Depreciation expense** that results from a Commission-mandated study of depreciation rates to ensure reasonable levels consistent with fully and appropriately allocating the recovery of KCP&L's investments made to serve customers.

### Our request at a glance

- We originally requested to increase retail rates by about **\$26.2 million**, or 4.5% (excluding property tax rebasing).
- Under that proposal, the average residential customer would see an increase of about **\$7.29** per month.

For more information, go to [www.kcpl.com/KansasRates](http://www.kcpl.com/KansasRates)

**Disclaimer:** The information on this page is not the work product of the Kansas Corporation Commission. Its contents have not been independently verified and are provided by the above party for informational purposes only.

## We're managing our costs to keep rates down.

We've worked hard to reduce the need for this rate increase by closely managing costs. In the last few years, we've:

- **Merged with Westar Energy to become Evergy\***. As a combined company, we'll provide you more benefits than we could if we had remained separate companies, to bring you more savings, sustainable energy and innovative solutions that meet your needs.
- **Kept operations budgets flat**, except where government mandates have caused cost increases.
- **Reduced our workforce** through attrition.

## We know any increase can be difficult for you and want to help.

- **Our Connections and bill payment assistance programs** are available for those who need help paying their electricity bills.
- United Way 2-1-1 can connect customers with available **community resources and financial assistance**. Contact the United Way of Greater Kansas City at **2-1-1** or **1-866-320-5764**.

To see a full list of all of the payment assistance programs available to you, visit [kcpl.com/assistance](https://www.kcpl.com/assistance).

*\*In 2019, we'll transition both companies to the single name of Evergy.*

## Additional resources

### My Account

Access your personal account and billing information anytime, as well as set up payment reminders, and compare current and past bills. Sign up at [kcpl.com/account](https://www.kcpl.com/account)

### Tools & Tips

We have a variety of online resources that can help you save energy and money. Online tools such as our Home Energy Analyzer can help you understand your home energy use and areas where you can conserve energy. We also have energy-saving tips that can help you save money almost everywhere in your home. Visit [kcpl.com/tips](https://www.kcpl.com/tips) to see how you can reduce your energy usage and start saving money.

# The Citizens' Utility Ratepayer Board

State of Kansas

## CURB

### **What We Are:**

- We were created by the legislature in 1989 as a branch of the Kansas Corporation Commission (KCC) to advocate for residential and small business customers of the utilities regulated by the KCC; in 1991, CURB became a separate state agency with its own budget, board and staff
- Policy and guidance is provided by the five-member volunteer board, with one member from each Congressional district in Kansas and one at-large member
- Members are appointed by the Governor to four-year terms that may be renewed by the Governor
- Board meets publicly at least four times a year to make decisions and develop policy that guides staff action
- Board employs a consumer counsel, staff attorneys, a technical analyst and two administrative staffers to carry out the directives of the Board and manage the CURB office
- CURB's budget is funded by regulatory fees paid by the utilities, not tax dollars; the utilities' regulatory costs are passed through to their customers in utility rates

### **What We Do:**

- Represent the interests of residential and small commercial customers of the regulated public utilities in proceedings at the KCC and in appellate courts
- Offer testimony at the legislature on bills that may affect utility customers
- Provide the consumers' point of view through our participation in task forces, organizations and committees that are helping to formulate and/or influence energy policy in Kansas and the nation
- Help consumers find the information they need about utility matters, energy issues and energy policy and refer them to sources of assistance and advice

# **The Citizens' Utility Ratepayer Board**

## ***How you can help CURB further the goal of affordable energy for all homes and small businesses:***

- Contact your legislators and let them know your opinions on utility matters
- Attend KCC public hearings in your area and testify to the KCC about your concerns
- Send comments to the KCC during the public comment periods
- Become better informed about utilities and energy matters so that the input you offer policy makers is more effective and persuasive
- Be proactive in reducing your consumption of electricity and use energy more efficiently to reduce the need to build costly generation plants
- Be proactive in reducing your consumption of natural gas, which is a finite resource that will get more expensive as supplies diminish

## ***Subscribe to the CURBside newsletter:***

- Contact CURB to receive the CURBside, a newsletter sent out via email several times a year to inform the public about utility matters and CURB's activities

## ***How to contact CURB:***

- Call: 785-271-3200
- Email: [ecurb@curb.kansas.gov](mailto:ecurb@curb.kansas.gov)
- Write us: 1500 SW Arrowhead Road, Topeka, KS 66604
- Contact us through our website: <http://curb.kansas.gov/>

SINCE  
1883

## *Kansas Corporation Commission*

### *Then & Now...*

In 1883, the Board of Railroad Commissioners was established by the Legislature and signed into law by Governor George Glick. Under the new law, Commissioners worked to ensure safe and reliable service for the public on the developing railroads. The Commission was charged with balancing the needs of Kansans and industry in reaching reasonable rates.

The Kansas Railroad Commission was one of the first and strongest regulatory agencies in the country. The Commission's role was primarily investigatory and advisory. Only on specific complaints from governing bodies or voter petitions could Commissioners issue awards that had legal force. The act establishing the Commission was a compromise that reflected the challenge of an emerging and necessary industry in the development of the Midwest.

As electricity and telephones became part of daily life, the 1911 Public Utilities Commission replaced the Railroad Commission. The role expanded to include the regulation of telephone service, water, light, heat, and pipeline and power companies.

In 1920, the Court of Industrial Relations was created to combine regulatory tasks with the arbitration of wages, hours, and industry and labor disputes. This evolved into the Public Utilities Commission with powers of the previous Commission. In 1925, the body became the Public Service Commission.

Eight years later in 1933, the present regulatory State Corporation Commission was established. Today the Commission's

challenge is the regulation of the ever changing electric, natural gas, telecommunications, oil and gas, and transportation industries.

Only one regulatory agency which focused on public utilities has been in existence since 1883. Each form of the Commission maintained the mission of safe and reliable service to the public. The industries and issues regulated over time have changed, but the commitment to Kansans has remained the same.

*Continuing to Serve the Citizens of Kansas*

# CONSUMER INFORMATION

## Who is the Kansas Corporation Commission and what does the Commission regulate?

- Three Commissioners: Chair Shari Feist Albrecht, Commissioner Jay Scott Emler, and Commissioner Dwight D. Keen.
- Appointed by the Governor and confirmed by the Kansas Senate.
- Serve staggered 4-year terms.

The Commission regulates public utilities including telecommunications, natural gas, electric and water companies, as well as motor carriers, oil and gas pipelines, and oil and natural gas production. The mission of the Commission is to serve the people of Kansas by regulating the State's energy infrastructure, oil and natural gas production, and commercial trucking to ensure public safety. Our vision is a Kansas served by safe, reliable, environmentally responsible, diverse energy supplied at the lowest cost and for safe travel for the motoring public.

*Please note that the Commission does not regulate cell phones, internet service, most municipal utilities, or electric and natural gas cooperatives.*

## Why does the Commission regulate public utilities?

- Kansas law requires a public utility to obtain a certificate of convenience from the Commission.
- Regulation helps protect consumers in areas where there is not competition or a reasonable alternative is not available.
- Kansas law requires the Commission to balance the needs of the utility company and the needs of consumers to determine just and reasonable rates and terms of service for the public utility.

## Regulatory Considerations

The Commission's regulatory oversight of public utilities primarily pertains to rates and terms of service. In order to ensure that customers of regulated utilities are provided sufficient and efficient service at just and reasonable rates, utilities may not change their rates without Commission approval. The Commission's primary objective is to balance the interests of the public and the utility while ensuring reliable and cost efficient service.

*Interests to consider:*

- The public's need for reliable utility services provided at just and reasonable rates.

- The utility's interest in being fairly compensated for the services it provides (this includes infrastructure and services).

## Commissioners' Duties and Obligations

- The Commissioners are essentially administrative judges who have the power to review, approve, reject, or modify an application by a utility company for rate increases or changes.
- Commission decisions are formal and are documented as orders in the dockets addressing the request or concern.
- Commissioners weigh the evidence and make a determination as to what rates are just and reasonable to both the company and ratepayers.
- While Commission orders are given great weight, their decisions are appealable to the Kansas Courts.

## Parties in a Utility Rate Case

1. The Utility Companies – represent the interest of the companies.
2. Commission Staff – represents the interests of the public generally. Staff includes accountants, auditors, economists, analysts, engineers, and attorneys.

# CONSUMER INFORMATION

- Staff reviews every filing for compliance with Kansas Statutes and Commission Regulations.
  - Staff reviews the data in the filing for accuracy; analyzes the company's financial records, and recommends revenue and income adjustments based upon Kansas law and regulatory theory.
  - Staff identifies the potential impacts (positive or negative) of any actions requested by the utility on the ratepayers, the utility, and the public generally.
  - Staff works to ensure rate designs are fair to each customer class and fair to the utility.
3. Interveners – represents specific interests from certain sectors of the public. Interveners provide testimony from experts and may address issues of revenue, policy, and cost allocation/rate design.
- Citizens' Utility Ratepayer Board (CURB)
    - CURB specifically represents the interests of residential and small business ratepayers.
  - Other interested parties include:
    - Large commercial customers.
    - Third party wholesale customers.

## The Process

An application for a rate increase is filed by the utility with supporting documentation and testimony. A complete copy of Kansas City Power & Light's application and supporting testimony is available on the Commission's website at [www.kcc.ks.gov](http://www.kcc.ks.gov) by searching Docket Filings for Docket No. 18-KCPE-480-RTS.

- Application filed: May 1, 2018.
- Commission Staff and Interveners review the application.
- Public Hearing: August 23, 2018
- Public Comment Period thru 5:00 p.m. CDT October 17, 2018.
- Each party prepares testimony and evidence supporting their position(s).
- Evidentiary Hearing: beginning October 23, 2018.
- Commission Order: December 27, 2018.

## Public Comments

Your comments are appreciated and requested. Participating in the public hearing and providing comment during the open comment period are the only two ways for the public to participate in the formal regulatory process. Public hearings provide an opportunity for you to learn more about a utility company's proposal to change its services, rates, or practices. The hearing also allows you to provide official comment that becomes part of the record and is considered by Commissioners when deciding the outcome of the case. Public hearings are generally scheduled for major rate cases, and public comments are accepted prior to the start of the evidentiary hearing.

The Commission will accept public comments from Kansas City Power & Light customers through 5:00 p.m. CDT, October 17, 2018. There are three convenient ways to submit a comment:

1. Go to the KCC website ([www.kcc.ks.gov](http://www.kcc.ks.gov)) to enter your comment. Click on the link under Your Opinion Matters.
2. Send a written letter to the Kansas Corporation Commission, Office of Public Affairs and Consumer Protection, 1500 SW Arrowhead Road, Topeka, KS 66604-4027. Be sure to reference Docket No. 18-KCPE-480-RTS.
3. Call the Commission's Public Affairs office at 1-800-662-0027 or (785) 271-3140.

Public Comments received during the comment period will be entered into the official case record and posted on the website at the end of the comment period.
