

We serve the people of Kansas...

UTILITIES & COMMON CARRIERS
REPORT | 2016

The mission of the Kansas Corporation Commission is to serve the people of Kansas by regulating the State's energy infrastructure, oil and gas production, and commercial trucking to ensure public safety.

Our vision is a Kansas served by safe, reliable, environmentally responsible, diverse energy supplied at the lowest cost and for safe travel for the motoring public.

About the KCC

Established in 1883 to regulate railroad activity, the Kansas Corporation Commission (KCC) was one of the first state regulatory bodies in the nation. In 1911, the Kansas Legislature created a three member Public Utilities Commission to regulate telegraph and telephone companies, pipeline companies, common carriers, water, electric, gas, and all power companies with the exception of those owned by municipalities.

The present regulatory body was established by the Legislature in 1933. Over the years, its jurisdiction was extended to include motor carriers, gas conservation, and supervision of plugging abandoned wells to protect fresh and useable water from pollution.

Today, the KCC regulates five cornerstone industries in the Kansas economy. The Commission has the responsibility of ensuring that natural gas, electricity, telephone, and transportation vendors provide safe, adequate, and reliable services at reasonable rates. The Commission also has the mandate of assuring that oil and gas producers protect correlative rights and environmental resources. The authority of the Kansas Corporation Commission is derived from KSA 74-601 to 74-631.

The Commission is comprised of three members who are appointed by the Governor with the approval of the Senate. Members serve staggered four-year terms. Law provides that no more

than two of the three commissioners may belong to the same political party. Commissioners elect one of their colleagues as Chair. The work of the Commission is supported by the Division of Administration, Public Affairs and Consumer Protection, Utilities, Conservation, Transportation, and Energy.

The KCC does not regulate most electric cooperatives, water cooperatives, municipalities, wireless telephone, long distance service, cable companies, or the internet.

Current KCC Leadership

Jay Scott Emler
Commissioner

Jay Scott Emler was appointed to the KCC by Governor Brownback on January 8, 2014. He was confirmed by the Kansas Senate on January 16, 2014. On May 21, 2015, Commissioner Emler was confirmed for a four year term, which expires on March 15, 2019.

Emler previously served in the Kansas Senate where he was elected Senate Majority Leader. He represented the 35th District in central Kansas for 13 years. Emler also served as Chairman of both Ways and Means and Utilities committees. Prior to the Senate, he was Vice President and General Counsel for Kansas Cellular.

He is the past national Chairman of the Council on State Governments. He also served on Governor Brownback's transition team.

Emler is a graduate of Bethany College, Lindsborg, where he earned a bachelor's degree and teaching certificate. He earned his law degree from the University of Denver, College of Law. In addition, Emler holds a master's degree in security studies from the Naval Postgraduate School in Monterey, California.

Emler and his wife Lorraine live in McPherson County, where they operate a small family farm and belong to Bethany Lutheran Church.

Shari Feist Albrecht
Chair

Shari Feist Albrecht was appointed to the KCC by Governor Brownback on June 25, 2012. She was elected Chair on January 9, 2014. Her term expires on March 15, 2016.

Albrecht served at the Kansas Department of Health and Environment from 1993 to 2012. Previously at the KCC, Albrecht held the positions of Director and Deputy Director of the Conservation Division, chairing numerous committees, including the Oil and Gas Advisory Committee. She also served as Acting General Counsel, Assistant General Counsel, and staff attorney for the Transportation Division.

She is a member of NARUC, serving on the Gas Committee, Subcommittee on Pipeline Safety, and the Washington Action Committee. Albrecht is a member of the Advisory Council of the New Mexico State University Center for Public Utilities and of the Energy Bar Association. She also serves as state representative for the Interstate Oil and Gas Compact Commission.

Albrecht earned a bachelor of arts degree in Spanish literature from KU in 1982. She graduated from WU School of Law in 1984 and is licensed in Kansas, the U.S. District Court for Kansas, and the U.S. Supreme Court. Albrecht and her husband live in Topeka and attend Faith Lutheran Church.

Pat Apple
Commissioner

Pat Apple was appointed to the KCC by Governor Brownback on March 24, 2014. He was confirmed by the Kansas Senate on April 6, 2014. His term expires on March 15, 2018.

Apple held a seat in the Kansas Senate from 2005 to 2014. He provided leadership in many capacities including Chairman and Vice-Chairman of the Utilities Committee. Apple also served on the Assessment and Taxation Committee, Commerce Committee, Confirmation Oversight Committee, Vice-Chair of Kansas Electric Transmission Authority, 911 Coordinating Council, and Chair of Telecommunications Study Committee.

Apple and his wife Debbie own Apple Electric, Inc., serving commercial and industrial customers in the greater Kansas City area. Apple learned the value of hard work from his father, a bricklayer by trade, leaving a life-long impression and a strong work ethic. Apple is certified as a Master Electrician.

He is a 2007 graduate of Leadership Kansas. He previously served on the Board of Education for USD 416 and was a Miami County Commissioner for District 4. Apple and his wife live in Louisburg, where they attend First Baptist Church.

Utilities Overview

The Utilities Division is responsible for administering the laws and regulations applicable to jurisdictional electric, natural gas, telephone, and water utilities. The Utilities Division staff is comprised of four sections that are responsible for providing recommendations and advice to the Commission to promote and ensure sufficient, efficient, and safe utility services at reasonable and non-discriminatory rates to consumers.

The four sections within the Utilities Division are Accounting and Financial Analysis, Economics and Rates, Energy Operations and Pipeline Safety, and Telecommunications. These sections are responsible for the following:

1. The Accounting and Financial Analysis section is responsible for investigating, analyzing and making recommendations to the Commission on accounting and financial issues relating to the electric, natural gas, telecommunication, and water industries. These issues include the development of a revenue requirement for rate cases and KUSF audits as well as yearly surcharge filings. The section is also involved in Federal Energy Regulatory Commission cases and participating in Southwest Power Pool workgroups.
2. The Economic Policy and Rates section is responsible for investigating and making recommendations on economic issues relating to the natural gas, electric, and telecommunications industries to the Commission as well as

the Kansas Legislature and other State Agencies. In rate cases, this section is also responsible for evaluating the cost of service and developing a rate design.

3. The Energy Operations and Pipeline Safety section provides technical expertise relating to electric utility operation, reliability, safety, electric transmission siting, and electric and gas consumer service as well as analyzing requested changes to natural gas and electric certificates. The section has primary responsibility to ensure safe operation of all gas utilities through enforcement of federal and state pipeline safety regulations. The section also has the responsibility to ensure the safe operation of electric utilities under the provisions of K.S.A. 66-101h.
4. The Telecommunications section is responsible for researching, investigating, analyzing, and making recommendations on courses of action for all telecommunications matters that come before the Commission.

Major Issues for FY 2015

EPA

- In 2012, the Commission initiated an internal EPA Work Group led by the Utilities Division. The primary role of the EPA Work Group is to (1) support the Kansas Department of Health and Environment (KDHE) in its lead role in monitoring and implementing EPA rules, (2) communicate with stakeholders, and (3) evaluate the impact of EPA issues on jurisdictional utilities. The EPA Work Group is primarily made up of a cross-section of Commission Divisions that consists of representatives from Utilities and Legal. The EPA Work Group meets regularly with KDHE to determine if the KCC can provide meaningful assistance to KDHE when it files comment letters with the EPA.
- In early 2013 President Obama issued a memorandum directing the EPA to re-propose carbon pollution guidelines for new and existing power plants. In September 2013, the EPA announced

proposed standards for new sources, and in June 2014, the EPA announced its proposed standards for existing sources (the Clean Power Plan). The EPA's use of the four building blocks required the re-dispatch of Kansas' affected electrical generating units (EGU) to natural gas combined cycle, renewable generation, and demand-side management and energy efficiency. As a result of the KDHE's and the KCC's discussion of the proposed plan, it was mutually agreed that each Agency would file separate comments focused on the respective expertise of each Agency. As a result, the KCC Staff filed comments on our concerns regarding jurisdictional authority, cost, and reliability on October 29, 2014.

- HB 2233, which became law May 28, 2015, requires KDHE and KCC to enter into a memorandum of understanding (MOU) regarding the implementation of the requirements and responsibilities under the Kansas Air Quality Act. KDHE and KCC signed the MOU on July 14, 2015. In addition, HB 2233 requires the KCC to submit the following information to the Clean Power Plan Implementation Study Committee: each utility's re-dispatch options along with the cost of each option; the lowest possible cost re-dispatch options on a statewide basis; and the impact of each re-dispatch option on the reliability of Kansas' integrated electric system.

- On August 3, 2015, the EPA issued final emission guideline rules for existing electrical generating units, final CO2 performance standards for new, modified and reconstructed EGUs, and proposed federal plan and model rule for existing EGUs. In order to fully evaluate the re-dispatch options available to Kansas and determine the impact of each re-dispatch option, Staff issued a Request for Proposal (RFP) to engage a consulting firm with the necessary experience and modeling programs to run re-dispatch and power flow models. The RFP closed on September 22.

- KCC Staff will continue to work with

KDHE and state utilities to develop any required compliance plan to ensure that the plan considers reliability and the lowest cost option.

SIGNIFICANT INCREASES IN CAPITAL INVESTMENT

- Electric utilities have effectively completed large-scale environmental retrofit projects on coal-fired generation assets. However, the Clean Power Plan has the potential to require significant investments in new generation and transmission assets. In addition, the Southwest Power Pool (SPP) continues to approve new transmission facilities to enhance reliability of the transmission system. Both the potential new generation assets and new transmission assets are extremely capital intensive and will continue to place upward pressure on utility rates. Moreover, the trend of increases in transmission investment related to current congestion issues is far from the end, and we expect these investments to continue to put upward pressure on utility rates for several years to come.

- Investor-owned natural gas distribution utilities in Kansas are facing aging infrastructure, some of which is constructed of materials that are considered to be obsolete or that present a safety risk. This has led to these gas utilities placing an increased emphasis on accelerating the rate of replacement of aging infrastructure. This effort has also increased capital expenditures levels and led to more frequent general rate cases. In March 2015, the Commission opened a general investigation to explore whether the use of alternative ratemaking mechanisms, instead of general rate cases, should be used to accelerate the rate of replacement of natural gas infrastructure.

- Telecommunications companies are continuing to invest in new technologies, primarily to enhance broadband services. The investment in broadband services is generally driven by the FCC's National Broadband Plan, which has a goal of supporting the provision of broadband

communications in areas that would be unserved or underserved without such support. However, the continued investment in new technologies should not increase the size of the KUSF. HB 2201, which was passed during the 2013 legislative session, caps the KUSF fund at \$30 million for rate of return regulated carriers and prohibits FUSF losses from being recovered through the KUSF, caps support for price cap regulated carriers, eliminates KUSF support for electing carriers, and caps and phases out KUSF support for competitive eligible telecommunications carriers.

IMPLEMENTATION OF SPP'S DAY 2 MARKET (THE INTEGRATED MARKETPLACE)

On March 1, 2014, the SPP's Integrated Marketplace (IM) went live. The IM is a centrally dispatched, financially binding, day-ahead market. This means that Kansas utilities that are a member of SPP sell all of their available energy to SPP, and buy all of their energy needs from SPP. To the extent that a utility is running its own power plants, the two transactions net out, and the end result is that the customer pays the cost of fuel for company owned generation assets, plus any unhedged congestion costs on the transmission system. The IM also contains a real-time balancing market which replaces the EIS (Energy Imbalance Services) market and price-based markets form four operating reserve products. Additionally, SPP now acts as the single balancing authority for the entire SPP footprint, replacing the 16 separate balancing authorities that existed previously. A single balancing authority allows greater load and resource diversity, which should allow for more efficient dispatch, less excess committed capacity, and cost savings. Studies conducted subsequent to the implementation of the IM indicate \$210 Million in net benefits across the SPP footprint due to these efficiencies. The KCC is monitoring on a monthly basis how jurisdictional utilities are faring in the IM.

Electric

OVERVIEW

The KCC regulates nine large (annual operating revenue greater than \$10 million) electric utilities. A list of the large electric utilities and a brief overview of the major activities for FY 2015 are noted below. A summary of each major docket associated with the companies follows this narrative section along with a listing of all other electric dockets. Also included in this narrative section is a discussion of the Federal, transmission, and wind issues that the Utilities Division Staff spent a significant amount of time on during FY 2015.

LARGE ELECTRIC UTILITY COMPANIES

(Annual operating revenue greater than \$10M)

Empire District Electric Company

Kansas City Power & Light Company

Mid-Kansas Electric Company
(Transmission)

Midwest Energy, Inc. (Transmission)

Southern Pioneer Electric Company

Sunflower Electric Power Corporation (Transmission)

Westar Energy, Inc.

Prairie Wind Transmission, LLC

ITC Great Plains, LLC (Transmission)

Three major electric utility companies filed applications to increase rates during FY 2015, including the state's two largest electric utilities, Westar Energy and Kansas City Power and Light Company (KCPL). In addition, Southern Pioneer filed its second annual filing under a formula based rate (FBR), which was originally adopted for the non-profit utility in FY 2013. Southern Pioneer also filed for an increase in rates to cover the costs of its 34.5 kV facilities that are used to provide transmission service in western Kansas. Southern Pioneer's FBR filing resulted in an increase to its rates of \$899,288 because its Debt Service Coverage levels were below

the levels originally agreed upon in the FBR proceeding. Additionally, Southern Pioneer's 34.5 kV filing resulted in an increase of \$1,803,909 in revenue. Both Westar and KCPL filed full general rate cases in FY 2015. The major driver for both was the completion of over \$1 billion in environmental upgrades at the LaCygne Generation Station, and the need to begin recovery of those investments through their inclusion in rates. KCPL requested \$67.3 million in additional revenue and was allowed \$48.6 million. Westar requested \$152 million in additional revenue and was allowed \$78 million.

FEDERAL ISSUES

The KCC intervened in several matters at FERC during FY 2015. Because of the proliferation of regional transmission organizations like SPP and the associated increase in transmission infrastructure, the KCC's involvement in FERC electric matters has continued to increase significantly. Additionally, after the implementation of SPP's competitive bid solicitation process for new transmission projects, as required by FERC's Order 1000, there have been numerous new Transmission Formula Rate (TFR) filings at FERC. These new TFR filings are being driven by the following factors: (1) the desire of new entities to calculate and report costs on an incremental cost basis for each new project, and (2) the desire of new entities for a flexible TFR template that allows for the recognition of any concessions that may be made in the competitive bidding process. FERC transmission formula rate dockets that the KCC has intervened in as a result of FERC Order 1000 are Transource (Docket No. ER15-958) and Kanstar (Docket No. ER15-2237). The KCC has also intervened in ITC's Petition for a Declaratory Order which requests that a "binding bid" submitted to an RTO under the FERC Order 1000 process is afforded a contract status (Mobile-Sierra Doctrine). This result would make challenging rates arising from such bids exceptionally difficult.

In docket EL14-93, the KCC filed a Section 206 complaint alleging Westar's transmission formula rate was unjust and unreasonable due to a base Return on Equity of 10.8%. The KCC and Westar reached a settlement resulting in a base Return on Equity of 9.8%. As of this writing, the KCC is waiting on approval of the settlement by FERC.

In docket numbers ER14-2850/2851, ER15-1775, and ER15-1777, the KCC protested the expansion of SPP to include the integrated system of the Western Area Power Authority, Basin Electric, and Heartland Electric. The KCC's primary protest is based on the fact that the new entities joining SPP do not have to pay for socialized transmission costs within the pre-existing SPP footprint that were incurred prior to the effective date of joining SPP. FERC issued an order on October 15, 2015, denying the KCC's protest. On December 14, 2015, the KCC filed a Petition for Review at the United States Court of Appeals for the District of Columbia Circuit. This issue is also discussed in the Southwest Power Pool section.

The KCC also intervened in docket ER09-548 wherein ITC Great Plains requests to recover approximately \$18 million related to two high voltage transmission projects as well as the associated start-up costs related to these initial business ventures in Kansas. In this docket, the KCC protested ITC's request to recover its start-up costs as well as development and pre-construction costs related to the KETA and V-Plan projects. The KCC and ITC Kansas reached a settlement, which has been filed at FERC. As of this writing, the KCC is waiting on approval of the settlement by FERC.

SOUTHWEST POWER POOL

The Southwest Power Pool (SPP) is mandated by the Federal Energy Regulatory Commission (FERC) to ensure reliable supplies of power, adequate transmission infrastructure, and competitive wholesale pricing

of electricity. SPP was approved as a Regional Transmission Organization (RTO) by FERC in 2004 and is a nonprofit corporation organized under the laws of the State of Arkansas. SPP is a regulated public utility in Kansas, having obtained a limited certificate of convenience and authority to manage and coordinate use of certain transmission facilities and to develop an energy imbalance market. Simultaneously, the existing electric public utilities in Kansas were authorized to transfer functional control of transmission facilities to and participate in an SPP energy imbalance market. SPP is a nonprofit corporation and not a regulatory or quasi-regulatory entity and is regulated by FERC.

When SPP became an RTO, it had 131 employees and 48 members including 28 (58% of membership) investor-owned utilities, municipal systems, generation and transmission cooperatives and state authorities who served retail loads in parts of eight states (Arkansas, Kansas, Louisiana, Mississippi, Missouri, New Mexico, Oklahoma, and Texas). Three Nebraska public power utilities became members of SPP in 2008. Most recently, on October 1, 2015, SPP membership expanded to include the Integrated Transmission System consisting of a portion of the Western Area Power Administration, Basin Electric Cooperative and the Heartland Consumers Power District. This integration, while contested by the KCC at FERC because of cost allocation concerns, added 5,000 MW of peak demand and 7,600 MW of generating capacity to SPP's system. Today SPP has around 600 employees and 95 members, with 59 (62% of membership) members directly or indirectly responsible for serving retail loads in the 14 state region.

Commission interaction with the SPP and participation in RTO matters is authorized by K.S.A. 74-633 and K.S.A. 66-106. The SPP organization has created approximately thirty primary working groups/committees as well as multiple subordinate task forces. The

Commission is represented by one KCC Commissioner on the Regional State Committee (RSC), which consists of one regulator or other state representative from each of the states in the SPP. The Cost Allocation Working Group reports to the RSC and is composed of one voting staff member from each of the states along with other state staff participants. The RSC fulfills an advisory role in SPP and does not "approve" any transmission projects. Its participation in the SPP process is mostly limited to providing collective state regulatory agency input and participation, as stated in the RSC By-Laws. However, the RSC does have specific authority over cost allocation methodology. For example, the RSC designed the original cost allocation methodology for committing retail ratepayer funds for construction of new transmission projects and has revised the methodology from time to time. The RSC has no "line" responsibility in approving the number or costs of specific projects which are ultimately approved for construction by the BOD. Thus, the KCC has no direct oversight through its SPP involvement over the amount of spending for Kansas-specific or regional transmission projects, which makes it imperative that the Commission be represented in a liaison capacity on multiple SPP stakeholder committees and task forces.

TRANSMISSION PLANNING AND CONSTRUCTION

Since its inception as an RTO, the SPP has added \$4.9 billion in new zonal and regional transmission projects that are in service. According to the SPP Third Quarter Project Tracking Report (August 2015), an additional 532 projects have been approved by the SPP Board of Directors for construction with a total estimated cost of \$3.9 billion. The approved projects in the report are not yet in-service and generally not in rates unless Construction Work In Progress (CWIP) is authorized. Depending on the operating voltages of a project, the costs are regionally or zonally recovered from

ratepayers inside the SPP Region.

The total annual transmission revenue requirement (ATRR) for region-wide transmission projects is \$412 million as of September 2015. This represents annual capital cost recovery, operation and maintenance (O&M), and other transmission related expenses for regional projects that are in-service or under construction as of September 2015. These revenue requirements are recovered through FERC-approved TFRs, FERC-approved stated rates, or, in some cases, state approved TFRs. The current annual cost to Kansas ratepayers is approximately 18% of the annual transmission revenue requirement for the region, or \$74 million. This amount is expected to grow significantly in the next few years as the remaining \$3.9 billion in new projects mentioned in the previous paragraph come in to service.

Kansas Project Status: V-Plan (a.k.a. Y-Plan)

In the summer of 2010, the Commission approved a Stipulation & Agreement between ITC- Great Plains (ITC) and Prairie Wind regarding the V-plan, a double circuit 345 kV transmission line project in Southwest Kansas. In the summer of 2011, the Commission approved line siting applications for ITC and Prairie Wind. Prairie Wind completed its portion of the line on September 12, 2014. The Prairie Wind portion of this line between Wichita and Thistle Substation (Medicine Lodge) was energized on June 4, 2014 and the portion from Thistle to an interconnection with Oklahoma Gas & Electric (OGE) at the Kansas-Oklahoma border is also complete and will be placed in-service when the OGE portion is operational. The ITC portion of the transmission line was energized on December 17, 2014.

Grain Belt Express

Clean Line Energy Partners (Clean Line) was certificated as a public utility by the Commission in December 2011. Clean Line subsequently filed a line siting application for the Grain Belt

Express Clean Line Project and this project was approved by the Commission on November 7, 2013. Clean Line is presently seeking similar approvals in Missouri and Illinois. The proposed line is a ±600 kilo-volt (kV), high voltage direct current (HVDC) transmission line along with associated facilities capable of delivering 4,000 megawatts (MW) of power from Kansas to load centers east of Kansas. The project will originate in western Kansas near Sunflower's Spearville substation and traverse east across the state (approximately 370 miles) into Missouri where it will interconnect in the MISO RTO market at the St. Francois substation in southeastern Missouri. From there, the line will continue into Indiana where it will interconnect with the PJM RTO market at the Sullivan substation. The Project has been estimated to cost \$2.2 billion with an in-service date of 2018. This project will be funded through the sales of transmission capacity to wholesale customers (referred to as merchant transmission) and, therefore, will not be funded by Kansas retail ratepayers. Clean Line recently was denied a Certification of Public Convenience and Necessity in Missouri. As of this writing, an Administrative Law Judge (ALJ) has recommended approval of the transmission line to the Illinois Commerce Commission. The ALJ's recommendation is not binding on the Commission, but it is a good indication the Commission may ultimately approve the line.

Summit to Elm Creek

ITC and Mid-Kansas Electric Company have entered an agreement to jointly build with Westar a 345 kV line from Westar's Summit substation near Salina, Kansas, to ITC's Elm Creek substation near the Cloud County wind farm. The Commission approved line siting applications for this 52 mile project on August 27 and August 29, 2013. ITC/Mid-Kansas and Westar expect to have their respective portions of the line completed by late 2016.

FERC Order 1000

The Commission Staff continues to monitor the effects of FERC Order 1000, which was issued in July 2011. This landmark Order affects the transmission planning process as it eliminated the right of first refusal to incumbent transmission owners for any projects receiving regional funding. The Order also requires RTO's to: (1) coordinate and share information in a transparent manner with neighboring RTO's; (2) establish cooperative procedures by which interregional projects might be addressed; and (3) develop a cost allocation methodology for those interregional projects. SPP's implementation of a competitive bid solicitation process for transmission projects with a region-wide funding component has led to a flood of new transmission companies filing for TFRs at FERC. This process may also lead to the KCC certifying new utilities in the State if the successful bidder for a new regional transmission project in Kansas is not a current Kansas utility.

WIND GENERATION AND THE RENEWABLE PORTFOLIO/ENERGY STANDARD (RPS/RES)

In May 2009, the Kansas Legislature passed the Renewable Energy Standards Act (RES) [K.S.A. 66-1256 through 66-1262]. The RES requires all non-municipal utilities in Kansas to satisfy a portion of their generation needs through renewable generation sources. Unlike most other states whose renewable portfolio standard requirements are set in terms of energy, the RES requires affected utilities to have renewable energy capacity that is equal to 10% of the utility's average prior three year annual peak retail sales for the years 2011 through 2015. The RES requirements increase to 15% capacity for the years 2016 through 2019, and 20% capacity for all years after 2020. The renewable capacity can either be owned by the utility or obtained through a purchase power agreement. Nearly all of the required renewable capacity is expected to be wind generation.

K.S.A. 66-1258 also stipulated that the KCC would establish rules and regulations governing specifics of the RES not covered within the statutes. In October 2010, the KCC finalized K.A.R. 82-16-1 through 82-16-6, establishing these rules and regulations. Under KAR 82-16-2(b) (8), each utility is required to submit a report to the Commission detailing compliance with the portfolio standards established in KSA 66-1258 and containing, among other things, "the calculated percentage increase in the utility's revenue requirements and retail utility rates that would be caused by compliance with the acts' portfolio requirement for the year, as determined pursuant to K.A.R. 82-16-4."

Senate Substitute for HB 2526, which amended K.S.A. 66-1260 was passed in the 2012 legislative session. Under HB 2526's new requirements, "The Commission shall annually determine the annual statewide retail rate impact resulting from affected utilities meeting the renewable portfolio requirement." The Commission will establish how the calculation will be done and the Commission will report "to the governor, the senate committee on utilities and the house committee on energy and utilities" every March 1st. The rules and regulations for the RES Act explicitly describe how the retail revenue requirement impact of the RES is to be calculated. However, it should be noted that, for the most part, transmission costs to transport the wind energy, generation costs to moderate the intermittency of wind, and production tax credits and other subsidies are not included in the calculation of the retail revenue requirement. In order to calculate the retail rate impact, the only additional information needed is the volumetric sales data. Much of this data is considered confidential, but the commission can aggregate the filings and provide the rate impact on a statewide basis for the March 1st report.

For 2013 and projected 2014, KCP&L reported less than a 1% rate increase due to Purchase Power Agreements (PPAs)

for wind generation at Spearville III, and hydro generation at Central Nebraska Public Irrigation District (CNPID), fees for the North American Renewable Registry (NARR), and customers subscribing to KCP&L's net metering tariff. Westar estimated a rate impact of 1.7% for purchase power agreements (PPAs) for wind generation. Midwest estimated a rate impact of 1.61% due to PPAs for wind generation. KCKBPU estimated a rate impact of less than 1% rate increase. Because KEPCo, Sunflower, and Empire did not add any renewable sources, this particular reporting requirement was moot for those companies this year. These increases in rates are minimal and reflect the low cost advantage of Kansas electric generation.

The comparison of new wind generation to long-existing fossil fuel and nuclear generation, which has been significantly depreciated, places wind generation in the worst possible light. Two additional factors in evaluating Kansas wind generation should be considered: (1) new wind generation compares favorably with new fossil fuel and nuclear generation, and (2) existing coal generation is experiencing increasing cost pressures from environmental regulations, which could tip the balance in favor of wind generation in the near future.

Natural Gas

OVERVIEW

The KCC regulates four large (annual operating revenue greater than \$10 million) natural gas distribution utilities. A list of the large gas distribution utilities and a brief overview of the major activities for FY 2015 are noted below. A summary of each major docket associated with the companies follows this narrative section along with a listing of all other natural gas dockets. In addition, included in this narrative section is a discussion of the Federal issues that the Utilities Division Staff spent a significant amount of time on during FY 2015.

LARGE GAS UTILITY COMPANIES

Anadarko Natural Gas Company

ATMOS Energy Corporation

Black Hills/Kansas Gas Utility Co.

Kansas Gas Service, a Division of ONEOK, Inc.

During FY 2015, there was one major gas rate case proceeding decided by the Commission. Black Hills Energy filed Docket No. 14-BHCG-502-RTS on April 14, 2014. This application requested a \$9.5 Million increase in base rates, and three new alternative ratemaking mechanisms. One for workforce development, one to track and refund revenues received from customers that were a bypass threat, and one to allow for additional revenues to accelerate the replacement of aging infrastructure. The case resulted in a unanimous settlement agreement calling for \$5.23 million increase in base rates, and none of the alternative ratemaking mechanisms. An evidentiary hearing was held on the settlement on November 12, 2014, and the Commission issued an Order approving the settlement on December 16, 2014.

In addition to this rate case, the Commission opened a general investigation, Docket No. 15-GIMG-343-GIG, to explore whether it was in the public interest to adopt an alternative ratemaking mechanism to accelerate the rate of replacement of obsolete natural gas infrastructure in the State. This docket is still in progress.

FEDERAL ISSUES

The Commission Staff monitors the rate and tariff activities of several interstate pipelines that serve Kansas local distribution companies, towns, and other large volume gas users. Chief among these is Southern Star Central which, in any given year, transports 50% - 70% of all natural gas consumed in Kansas. In gas storage matters, the KCC intervened in Southern Star Dockets CP14-542 Alden Storage Field expansion and CP14-537 Colony Storage Field expansion. In both of these dockets Southern Star is

expanding the boundaries of its storage fields. The KCC continues to monitor Docket CP11-481 Alden Storage Field, CP13-76 Alden Storage Field, and CP13-531 Elk City Storage Field. These dockets are all related to Southern Star's continued efforts to maintain storage containment in its natural gas storage fields. Continued monitoring of these dockets is important as the process of stemming the loss of storage gas can take several years to fully vet.

In other storage matters, the KCC continues to monitor the activities of Northern Natural Gas in Docket CP09-465. In this case, Northern Natural has requested an enlargement of its certificated storage boundaries at its Cunningham storage field in an attempt to contain migrating storage gas. Northern is required to make quarterly compliance filings at FERC regarding its efforts and the KCC receives and reviews these filings.

The KCC also intervened and protested the annual fuel and lost and unaccounted for recovery filings at FERC filed by Southern Star Central and Kansas Pipeline Company (KPC) in Dockets RP15-519 and RP15-594 respectively. In the Southern Star docket, the KCC argued against including gas lost to system breach as unaccounted for gas. In its final order in the matter, FERC agreed with the KCC and did not allow the gas lost to system breach in rates. In the KPC fuel and lost docket, the KCC protested KPC's lack of sufficient data and information. The FERC agreed and required KPC to make a compliance filing with the required data and computational processes.

In abandonment matters, the KCC intervened in pipeline abandonment filings by Kansas Pipeline Company (KPC) and Southern Star. In Docket CP15-538 Southern Star filed to remove a two mile line on a bridge crossing in Fairfax in the Kansas City area due to bridge construction and demolition authorized by the Missouri Department of Transportation. In Docket CP14-538

KPC requested approval to abandon approximately 98 miles of 6 inch pipe located in south central Kansas that was no longer used and useful. The KCC intervened and determined that the line was not needed for peak-day deliveries on the KPC system. Ultimately, both abandonments were approved by FERC. The KCC participated in these dockets to ensure that facilities taken out of service are not needed or required to be used in a peak day delivery situations.

Finally, the KCC intervened and filed comments in PL15-1 a Notice of Proposed Policy Statement on Pipeline Fuel Tracker mechanisms. On April 16, 2015, FERC issued a Policy Statement to provide greater certainty regarding the ability of interstate natural gas pipelines to recover the costs of modernizing their facilities and infrastructure to enhance the efficient and safe operation of their systems. The Policy Statement explains the standards FERC will require interstate natural gas pipelines to satisfy in order to establish simplified mechanisms, such as trackers or surcharges, to recover certain costs associated with replacing old and inefficient compressors and leak-prone pipes and performing other infrastructure improvements and upgrades to enhance the efficient and safe operation of their pipelines.

The KCC filed comments generally in support of the proposal, with an explanation of the risks and recommendations for further safeguards. At the time of this writing a final Order has not been issued.

Natural Gas Pipeline Safety

OVERVIEW

Pipeline safety personnel continue to conduct on-site inspections of intrastate natural gas facilities. The inspections monitor the gas systems for any areas of non-compliance with pipeline safety regulations. A typical audit will stress compliance with the operator's management of the integrity of the

pipeline delivery system including such topics as review of emergency response plans, odorization requirements, cathodic protection, leak surveys, and operator qualification requirements. In addition, engineers and pipeline safety inspectors investigate any incident suspected of being caused by natural gas and report these to the Commission. Any recommendations of Staff regarding prevention of potential incidents are included in the report and considered by the Commission. Statistics that provide a snapshot of the pipeline safety personnel's inspection activity as well as an overview of the regulated gas infrastructure in Kansas can be found in the pipeline safety section of this report.

Pipeline safety personnel also investigate violations of the Kansas Underground Utilities Damage Prevention Act (KUUDPA). Investigators work with excavators and utility operators to assure compliance with provisions of the act such as requesting locates prior to digging, and locating facilities within 48 hours of being notified of pending excavation work. To enhance our KUUDPA enforcement efforts, KCC receives two federal grants that provide funding for two inspector positions for the calendar year. From July 1, 2014, to June 30, 2015, the Commission acted upon 35 filings in which fines were levied to 15 excavators for failure to notify utilities prior to excavating over buried facilities and to 20 utility operators for failure to provide timely or accurate locates. For the 35 cases, a total of \$22,750 in fines was levied.

Kansas experienced no natural gas incidents in FY 2015.

Aging infrastructure remains a top concern with Kansas natural gas operators. In 2006, the state legislature passed the Gas Safety Reliability Surcharge (GSRS) which allows for alternative recovery of investments for pipe replacement investments. This program has been very successful in accelerating the replacement of aging pipelines. The replacement of

distribution piping continues at a rate of approximately 51 miles of steel main, 13 miles of cast iron main and 128 miles of bare steel service lines in CY 2014. In March of 2015, the Commission opened a general investigation into the need to accelerate the replacement of obsolete natural gas infrastructure and to consider the necessity of additional alternative rate treatment for pipe replacement programs. This investigation is ongoing.

Liquid Pipeline Common Carriers

OVERVIEW

Although there are relatively few intrastate pipeline common carriers in Kansas, the Commission is responsible for the economic regulation of this sector. The majority of Staff's work in this area is the review of tariff and rate filings in an effort to ensure efficiency, public interest, and balanced benefit to Kansas common carriers and shippers. Staff is responsible for the economic regulation, including but not limited to: processing tariff and rate filings; analyzing tariffs for compliance; monitoring complaints; processing and monitoring certificate filings due to sales, purchases, mergers and acquisitions, divestitures, service cessations and abandonment; and monitoring operations for unforeseeable events and capacity constraints. Additionally, Staff tracks all intrastate revenue reported from each pipeline company. Staff processed eight intrastate pipeline common carrier dockets during FY 2015. The intrastate liquids pipeline companies regulated by the KCC are noted below. A summary of each major docket follows this narrative section along with a listing of all other liquid pipeline dockets.

LARGE LIQUID PIPELINE UTILITIES

Jayhawk Pipeline (owned by NCRA)

Magellan Pipeline Company, LP

Other Liquid Pipeline Utilities

NuStar Pipeline Operating

Partnership, LP

Mid-America Pipeline Company, a subsidiary of Enterprise Products Partners, LP

ONEOK NGL

ONEOK North Systems

Plains Pipeline, LP

Telecommunications

The KCC regulates four primary types of telecommunications carriers with varying degrees of regulation: Incumbent Local Exchange Carriers (ILECs); Electing Carriers; Competitive Local Exchange Carriers (CLECs); and Interexchange Carriers (IXCs) (also known as long distance carriers). These telecommunications carriers serve a customer base ranging from as few as two customers to over 400,000 customers. The large telecommunications carriers regulated by the KCC are noted below. A summary of each major docket associated with the telecommunications carriers follow this narrative section along with a listing of all other telecommunications dockets.

LARGE TELECOMMUNICATIONS CARRIERS

Consolidated Communications Enterprise Services, Inc.

Cox Kansas Telecom, LLC

Pioneer Telephone Association, Inc.

Rural Telephone Service Co., Inc.

SBC Long Distance, Inc.

Southwestern Bell Telephone Company d/b/a AT&T Kansas

Time Warner Cable Information Services, LLC

United Telephone Company of Kansas, Inc. d/b/a Century Link

In addition to the eight large telecommunications utilities listed above, the Commission has certificated 33 incumbent local exchange carriers (ILECs), 118 competitive local

exchange carriers (CLECs), and 2,434 interexchange carriers (IXCs).

The KCC continues its effort in fulfilling its obligation to protect the rights and privileges of Kansas consumers in balance with the interests of the telecommunication carriers. The evolution of competition in providing local and long distance telecommunications has, in some instances, resulted in greater choice of available services at a variety of rates with a wider array of providers, packages, and bundles from which to choose. Technology developments have also continued to play a key role in the evolution of the telecommunications industry.

The KCC Staff is responsible for the economic regulation, including but not limited to: processing incumbent local exchange carrier tariff filings and switched access rate filings; analyzing tariffs for compliance with KCC rules and regulations; administering consumer and carrier complaints; processing certificate filings, service cessations, and name changes; reviewing carrier-to-carrier interconnection agreements and providing mediation when necessary; ensuring quality services of the incumbent local exchange carriers; administering the Kansas Universal Service Fund (KUSF); auditing rate-of-return regulated ILECs; and processing eligible telecommunications carriers filings.

KANSAS UNIVERSAL SERVICE FUND

The KUSF was established by the Commission in 1996, as required by the Kansas Telecommunications Act. The KUSF is in its nineteenth year of providing support to local telephone service providers to assist in making universal service available in high-cost areas of the state, to provide dual-party relay service and telecommunications equipment for persons with disabilities, and to provide assistance to those with lower incomes through the Lifeline program. Effective March 1, 2015, the

annual KUSF funding requirement is approximately \$51.3 million and the carrier assessment rate is 6.47%. The KUSF provides approximately \$47.6 million in high-cost support, \$2.1 million for low-income subscribers, \$680,000 for telecommunications relay service, \$390,000 for the telecommunications equipment program, and \$504,000 for the fund administration and carrier audits.

The Commission began audits of all ILECs receiving KUSF support in 2000. The Commission has completed the initial audits for all ILEC's and continues to monitor and initiate new audits when warranted based on an annual review of financial metrics. All of the rural LECs have elected rate-of-return regulation; therefore, the audits provide an opportunity for the Commission to determine whether or not the KUSF support is cost-based for each rural LEC.

FEDERAL ISSUES

On March 16, 2010, the FCC delivered to Congress a National Broadband Plan (NBP) recommending that the FCC adopt cost-cutting measures for existing voice support and create a Connect America Fund (CAF), without increasing the overall size of the fund. The broad goal of the NBP is to support the provision of broadband communications in areas that would be unserved without such support or that depend on universal service support for the maintenance of existing broadband service. The FCC has initiated numerous proceedings aimed at implementing the NBP and intends to initiate many more in the next few years in order to attain the goals outlined in the NBP.

The FCC has issued multiple orders and has various proceedings underway to:

- Create the Connect America Fund (CAF) to support broadband;
- Convert the "legacy" high-cost component of the Federal Universal Service Fund (USF) to the CAF;
- Create a Mobility Fund to support 3G (or better) wireless coverage;

- Expand the Lifeline (low-income) program to allow subsidies to be provided for broadband;
- Broaden the USF contribution base to ensure sustainability; and
- Transition intercarrier compensation to a bill-and-keep regime.

The KCC continues to implement the FCC reforms and determine how the reforms will affect Kansas, Kansas carriers, and the KUSF.

Most recently, the FCC offered over \$1.675 billion annually, for six calendar years (2015-2020), model-based CAF support to price cap carriers nationwide to fund the deployment of voice and broadband-capable services of at least 10 megabits per second (Mbps) downstream and 1 Mbps upstream in the eligible areas. CenturyLink accepted \$16.5 million to provide 10 Mbps downstream/1 Mbps upstream broadband to 29,018 eligible households in Kansas, and AT&T accepted \$35.8 million to provide 10 Mbps/1Mbps broadband to

64,890 eligible households in Kansas. Carriers are required to meet specific deployment milestones required by the FCC. The KCC will monitor the carriers' progress in meeting the deployment milestones.

Water

OVERVIEW

The Kansas Corporation Commission (KCC) regulates five water companies, none of which fall into the large utility category. These water companies serve a customer base ranging from as few as 60 to as many as 1,500, with little to no potential of increasing their customer base. Customers served by these companies typically live in a suburban area approximately two to ten miles outside the city. The water supplied varies from city water supplied by a nearby town to ground water supplied by the company's own water wells. The water companies regulated by the KCC are noted below. A summary of each major docket associated with the

companies follows this narrative section along with a listing of all other water dockets.

WATER COMPANIES

Barton Hills Water District

Green Acres Mobile Home Park, LLC

Howison Heights, Inc.

Suburban Water, Inc.

Wheatland Water Plant, A Division of Wheatland Electric Cooperative, Inc.

During FY 2015, the Commission continued its general investigation into Howison Heights' ability to provide efficient and sufficient service given the company's documented financial distress and numerous customer complaints. Although the number of complaints from Howison customers has diminished in 2015, Staff has continued to identify deficiencies in the business and operations practices of Howison and continues to be involved in the monitoring and investigation of this utility.

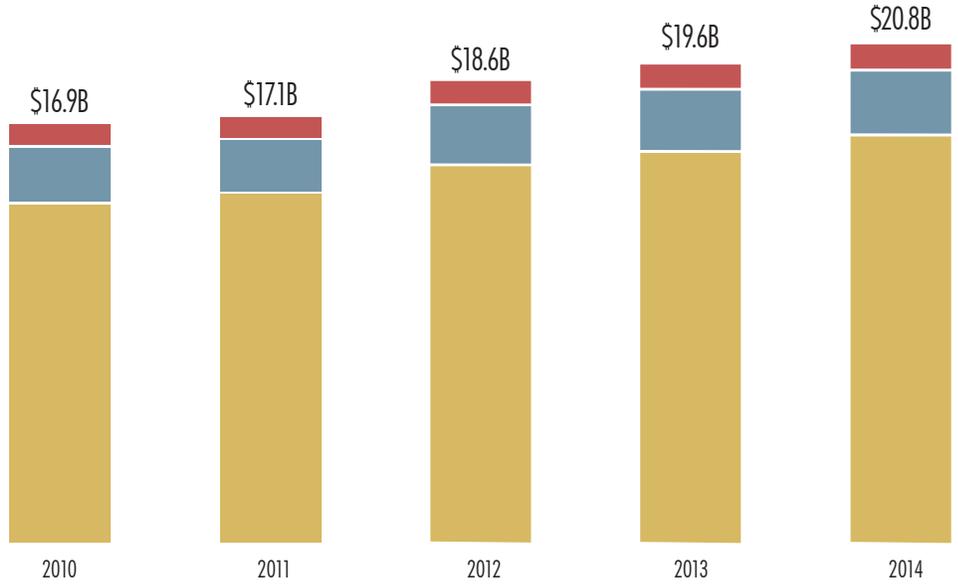

Financial Information and Other Metrics

OVERVIEW

The KCC sets rates for electric, natural gas, telecommunications, and water utilities on a rate base/rate of return basis for public or private utilities or a Times Interest Earned (TIER)/Debt Service Coverage Ratio (DSC) basis for cooperatives. For the electric, natural gas, and rural local exchange companies, the amount of capital investment, fuel and purchased power expense, total revenues, and total expenses are measured in billions of dollars. Following this overview section, more details are provided regarding financial information and other metrics for all the KCC jurisdictional utility industries on a consolidated and individual industry basis.

Electric Utilities

Financials

The following are selected Rate Base, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis. Empire District Electric and Kansas City Power & Light have operations in multiple states. The values represented in the following charts relate only to the Kansas operations of those two entities.

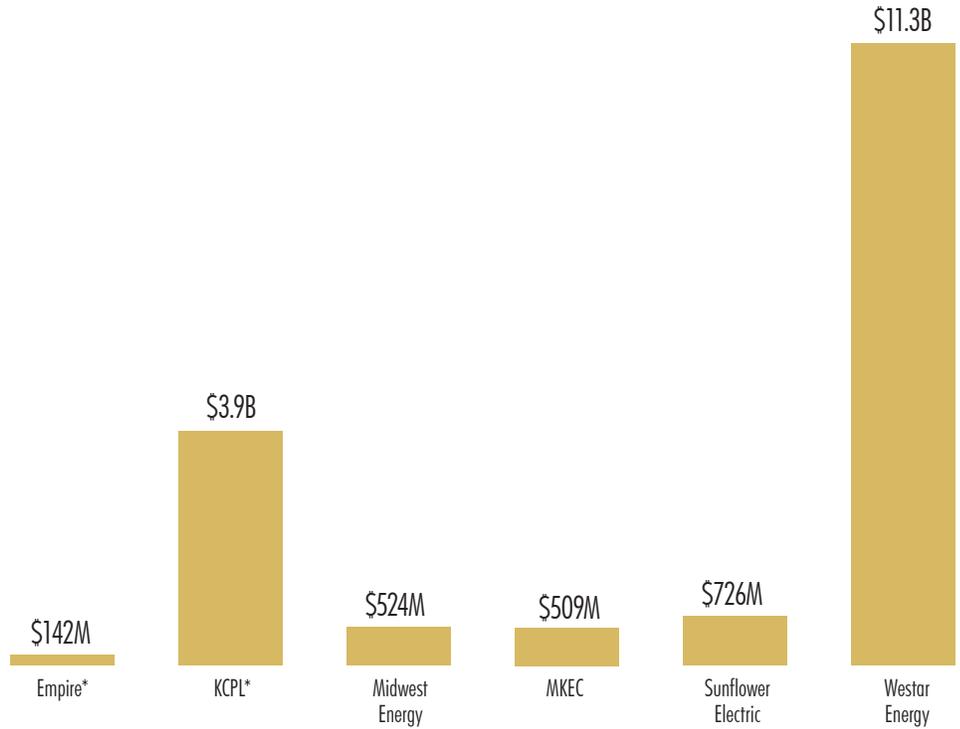

ELECTRIC COMPANIES STATEWIDE RATE BASE | 2010–2014

Rate Base is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility's rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total rate base of all regulated public utilities in Kansas for the past five years.

ELECTRIC COMPANIES RATE BASE, BY COMPANY | 2014

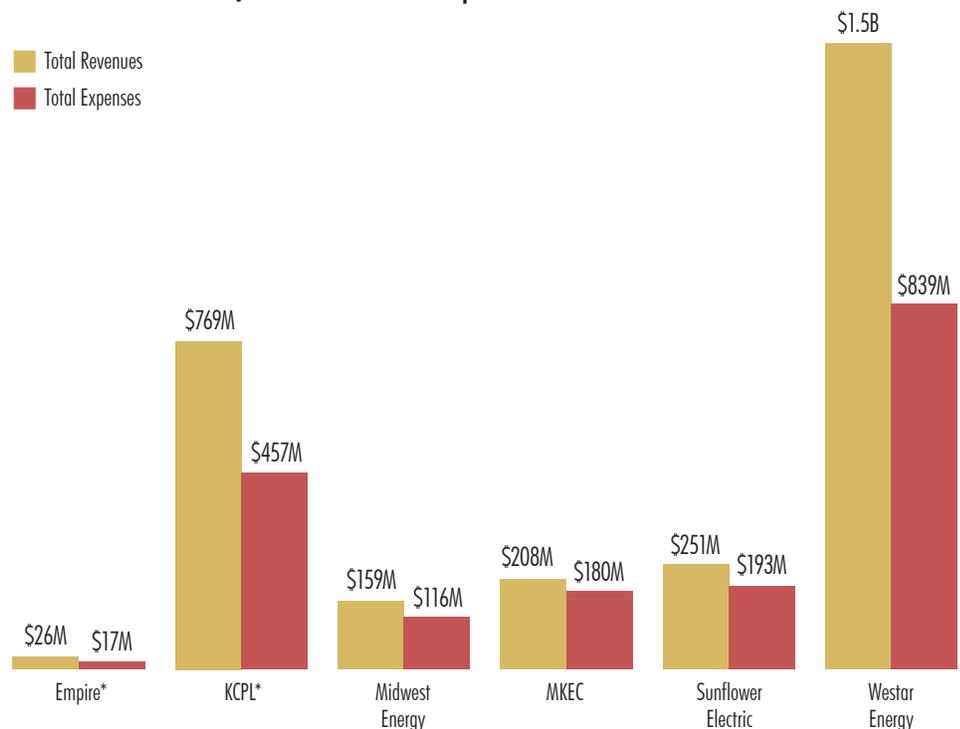

This chart takes the statewide aggregate rate base figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, two entities encompass a vast majority of utility rate base across Kansas.

*All figures for Kansas operations only.

ELECTRIC COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2014

This chart compares each utility's annualized revenues and expenses. The difference between the two represents the gross margin of each company. Worth noting is the difference in gross margins between the investor-owned utilities and the cooperatives. Embedded in that difference is the dividend cost that rewards and helps ensure continued shareholder investment.

*All figures for Kansas operations only.

ELECTRIC COMPANIES GENERATING AND PURCHASED POWER COSTS, BY COMPANY | 2014

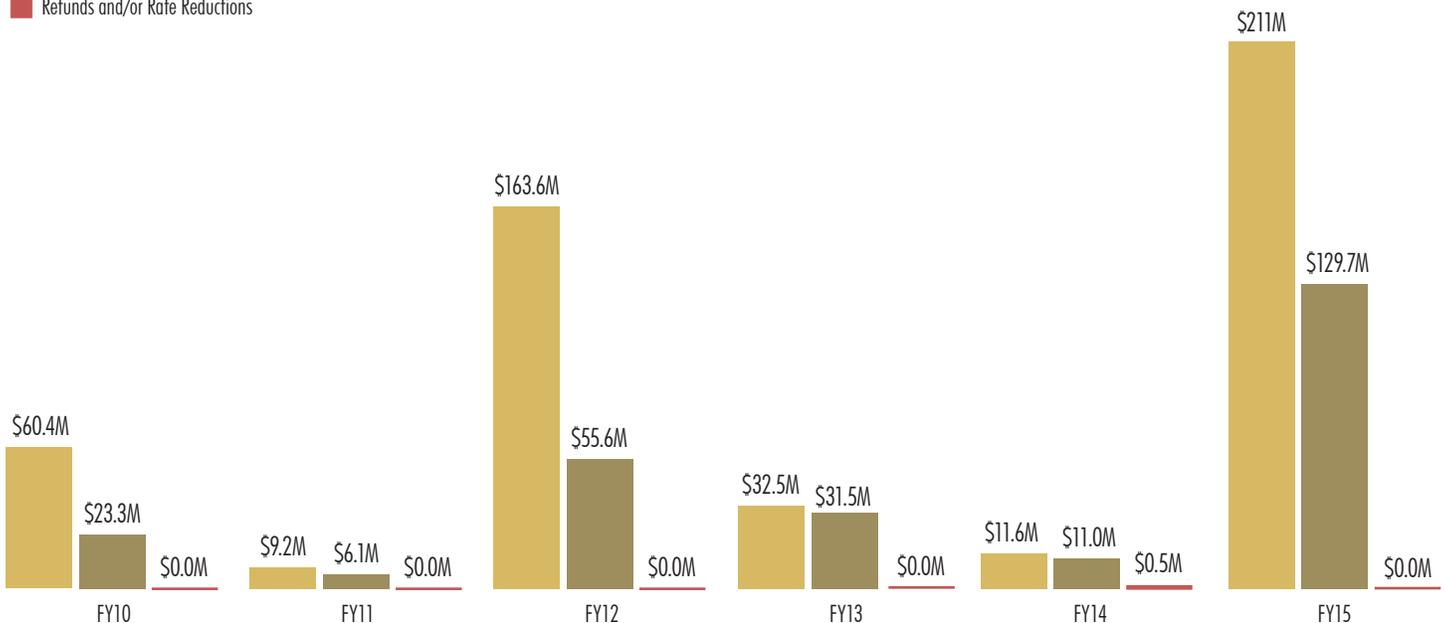

This chart takes the expense portion from each utility on the previous table and carves out the cost of generation and purchased power. As can be seen by comparing the two tables, generation and purchased power represent only about half the total cost of providing safe, reliable, and efficient electric service.

*All figures for Kansas operations only.

ELECTRIC COMPANIES WITH REVENUES OF OVER \$10M | RATE CASE RESULTS | FY10–FY15

Generation Planning Survey

The Commission continues to monitor the generation capacity and reliability of Kansas electric utilities. Staff members annually review generation and load forecasts of Kansas electric utilities to ascertain whether there is adequate electric supply to meet the needs of Kansas electric consumers. The findings of that survey can be

seen below. Based on its review, staff determined that, at this time, forecasted electric generation capacity and planning to meet future changes in system load in the State of Kansas appears sufficient given current load and generation forecasts planned. Although utilities in the chart do indicate deficiencies in the future,

planned generation capacity additions can be made that will satisfy future planning responsibility. The chart on this page describes the generation capacity situation major utilities in Kansas face going forward.

Large Electric Rate Cases

KANSAS CITY POWER & LIGHT

Docket number	15-KCPE-116-RTS
Docket type	Electric
Date filed	02 Jan 2015
Action date	10 Sept 2015
Commission action	Approved

In the Matter of the Application of Kansas City Power & Light Company to Make Certain Changes in Its Charges for Electric Service.

Kansas City Power & Light Company (KCP&L) filed its Application for a rate increase on January 2, 2015. The total request was a \$67.3 million increase in revenue requirement. Major drivers in this requested increase were to recover the remaining investments associated with the construction of environmental upgrades at the LaCygne Generating Station and significant capital expenditures at the Wolf Creek Generating Station. Additionally, KCP&L requested the establishment of alternative regulatory mechanisms including a transmission delivery charge rider, critical infrastructure protection standards tracker, and vegetation management tracker. On May 11, 2015, the parties filed their direct testimony. In its direct testimony, Staff recommended a rate increase of approximately \$44 million; CURB recommended roughly \$16.9 million; and all other intervenors who filed testimony took no position on KCP&L's revenue requirement. Subsequently, from June 5-12, 2015, the parties met collectively to discuss the possible settlement of contested issues in this matter. On June 17, 2015, the parties filed a Joint Motion for Approval of Unanimous Partial Settlement Agreement on Revenue Requirement and also a Joint Motion for Approval of Non-Unanimous Rate Design Settlement Agreement. An evidentiary hearing was held from June 22-24, 2015, to present the remaining issues in dispute as well as the two Settlement Agreements before the Commission. Following the evidentiary hearing, all parties submitted post hearing briefs. On September 10, 2015, the Commission approved a \$48.6 million increase in revenue requirement, a return on equity of 9.3%, and an overall rate of return of 7.4383%.

<http://estar.kcc.ks.gov/estar/ViewFile.aspx/20150910114007.pdf?Id=fce20218-fbcb-4a93-b060-5a0be2f9328f>

WESTAR ENERGY, INC. AND KANSAS GAS AND ELECTRIC COMPANY

Docket number	15-WSEE-115-RTS
Docket type	Electric
Date filed	02 Mar 2015
Action date	24 Sept 2015
Commission action	Approved

In the Matter of the Application of Westar Energy, Inc. and Kansas Gas and Electric Company to Make Certain Changes in Their Charges for Electric Service.

Westar Energy, Inc. and Kansas Gas and Electric Company (d/b/a Westar Energy) filed their Application for a rate increase on March 2, 2015. The request was for a net \$152 million increase in revenue requirement. Westar also made several policy-level requests, including the treatment of its unrecovered investment in analog meters, the implementation of the Electric Distribution Grid Resiliency program, the implementation of a Grid Security Tracker, the appropriate rate structure for residential customers with distributed generation, and others. On July 9, 2015, the parties filed their direct testimony. Staff recommended an increase of \$55 million; the Citizens' Utility Ratepayer Board recommended an increase of \$50.8 million; and Kansas Industrial Consumers recommended an increase of \$85.6 million. On August 3, 2015, the parties met collectively to discuss the possible settlement of issues in this matter. After extensive negotiations, the parties to the S&A agreed to an increase of \$78 million plus rate case expense and bad debt. An Order approving the S&A was issued on September 24, 2015.

<http://estar.kcc.ks.gov/estar/ViewFile.aspx/20150924104744.pdf?Id=29b7b55e-b40c-4f66-9335-153bfe44a81e>

SOUTHERN PIONEER ELECTRIC COMPANY

Docket number	15-SPEE-161-RTS
Docket type	Electric
Date filed	08 Oct 2014
Action date	28 April 2015
Commission action	Approved

In the Matter of the Application of Southern Pioneer Electric Company for Approval to Make Certain Changes in its Charges for Electric Service.

On October 8, 2014, Southern Pioneer Electric Company (Southern Pioneer) filed its Application requesting recovery of costs related to the provision of services to retail and local access wholesale customers utilizing Southern Pioneer's 34.5 kV sub-transmission system. The total request was a \$1,816,153 revenue increase. Citizens' Utility Ratepayer Board (CURB), Kansas Power Pool (KPP), and Kansas Electric Power Cooperative, Inc. (KEPCo) were granted intervention in this Docket. On February 5, 2015, Commission Staff, KPP, and KEPCo filed direct testimony. Staff recommended a revised revenue requirement increase of \$1,803,909. KPP discussed the administration of Southern Pioneer's Local Access Delivery Service (LADS) tariff by Mid-Kansas Electric Company, LLC as well as policy issues concerning the 34.5 kV facilities of the Mid-Kansas members. KEPCo discussed the billing demands used to calculate the rate and recommended a revised definition of the Monthly Billing Demand in Southern Pioneer's LADS tariff. CURB did not file testimony. On March 9, 2015, the parties met to discuss the possible settlement of issues in this matter. The parties were able to reach a unanimous settlement agreement and, on March 17, 2015, the Joint Motion for Approval of Unanimous Stipulation and Agreement was filed establishing that Southern Pioneer's overall annual increase should be Staff's recommended amount of \$1,803,909. On April 28, 2015, the Commission issued an Order Granting Joint Motion for Approval of Settlement Agreement, approving Staff's recommended revenue increase.

<http://estar.kcc.ks.gov/estar/ViewFile.aspx/15-161%20Order%20Granting%20Joint%20Motion%20for%20Approval%20of%20Settlement%20Agreement.pdf?Id=671d43d2-ab02-488f->

SOUTHERN PIONEER ELECTRIC COMPANY

Docket number 15-SPEE-519-RTS
Docket type Electric
Date filed 01 May 2015
Action date 30 July 2015
Commission action Approved

In the Matter of the Annual Filing of Southern Pioneer Electric Company for Approval to Make Certain Changes to Its Charges for Electric Services, Pursuant to the Debt Service Coverage Formula Based Ratemaking Plan Approved in Docket No. 13-MKEE-452-MIS.

On May 1, 2015, Southern Pioneer Electric Company (Southern Pioneer) filed its second Application under its five-year Debt Service Coverage Formula Based Ratemaking (DSC-FBR) Pilot Program approved in Docket No. 13-MKEE-452-MIS. In its Application, Southern Pioneer was seeking a rate increase of \$899,288 or 1.3%. On July 1, 2015, Staff and the Citizens' Utility Ratepayer Board (CURB) filed direct testimony in the docket. Staff recommended a minor adjustment to various advertising, dues, and donations expenses, which ultimately had no effect on Southern Pioneer's proposed increase. CURB also recommended making adjustments to Southern Pioneer's expenses related to donations, advertising, sponsorships, etc. However, the proposed adjustments did not have any effect on Southern Pioneer's proposed revenue increase. On July 16, 2015, Southern Pioneer filed rebuttal testimony stating that the parties accept that Southern Pioneer's DSC-FBR filing supports the Company's proposed revenue increase of \$899,288, despite the immaterial adjustments recommended by Staff and CURB. On July 30, 2015, the Commission issued its Order Approving Proposed Revenue Increase, approving Southern Pioneer's original proposed revenue increase.

16-WSEE-066-COM
Docket type Electric
Date filed 19 Nov 2014 thru
7 Aug 2015
Action date n/a
Commission action Open

In the Matter of the Complaint Against Westar Energy by Jami Reihm.

Four Dockets have been consolidated for the purposes of investigating similar issues. The Complaints ask for a Commission investigation into the health effects of radio frequency emissions from meter data, and security and privacy concerns of customers related to the deployment of automated meters, also known as "smart meters." Commission Staff's investigation is ongoing.

Major Dockets | ELECTRIC UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Electric Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.” That year runs from July 1, 2014 through June 30, 2015.

KANSAS CITY POWER AND LIGHT COMPANY, WESTAR ENERGY, AND KANSAS GAS AND ELECTRIC COMPANY

<i>Docket number</i>	15-GIME-025-GIE
<i>Docket type</i>	Electric
<i>Date filed</i>	21 July 2015
<i>Action date</i>	09 Sept 2015
<i>Commission action</i>	Approved

In the Matter of a Joint Application Requesting Approval of Certain Timing and Process Terms Regarding the 2015 and 2016 Rate Applications of Kansas City Power & Light Company, Westar Energy, Inc. and Kansas Gas and Electric Company.

On July 21, 2014, Kansas City Power and Light Company (KCP&L), Westar Energy Inc., and Kansas Gas and Electric Company (Westar), Staff of the Commission, and the Citizen Utility Ratepayer Board (CURB) jointly filed an Application with the Commission requesting certain accounting authorities and procedural accommodations regarding Westar and KCPL's 2015 and 2016 rate cases in order to include the cost of environmental retrofits at the LaCygne Generation Station in customers rates. The Joint Application requested that KCPL be allowed to utilize budgeted cost treatment for its portion of the LaCygne environmental upgrade costs, Westar be allowed to utilize construction accounting treatment for its portion of the environmental upgrades, and that both companies' rate case procedural schedules be coordinated in order to avoid the filing of both of these major rate cases with the Commission simultaneously. Both of these accommodative and alternative ratemaking methodologies reduced the financial impact of regulatory lag on Westar and KCPL associated with these mandated environmental regulations, and allowed the utilities the financial flexibility of staggering their rate case applications, as requested in the Joint Application. Staff filed testimony in support of the Joint Application on July 30, 2014, and the Commission approved the Joint Application on September 9, 2014.

EMPIRE DISTRICT ELECTRIC COMPANY

<i>Docket number</i>	15-EPDE-233-TAR
<i>Docket type</i>	Electric
<i>Date filed</i>	05 Dec 2014
<i>Action date</i>	14 April 2015
<i>Commission Action</i>	Approved

In the Matter of the Application of The Empire District Electric Company for Approval of its Asbury Environmental Cost Recovery (AECR) Rider.

Empire filed an Application on December 5, 2015, proposing approval for its AECR Rider, which would produce additional annual revenue of \$859,674. The Application requested that Empire be able to recover costs associated with the Asbury environmental retrofit in the AECR Rider, instead of filing a full rate case in both 2015 and 2016. On March 16, 2015, Staff filed its Report and Recommendation. Staff recommended a revised AECR Rider amount of \$782,479 with the following conditions:

- Empire shall file a general rate proceeding no later than September 30, 2016;
- The AECR Rider would be subject to refund;
- The AECR Rider will terminate with the rates effective date of the Commission's Order in Empire's 2016 general rate case;
- Empire shall file a revised AECR Rider Tariff containing Staff's recommended changes; and
- Customer Notice shall be sent to Empire's customers and a public comment period would be open until May 15, 2015.

All conditions Staff proposed were accepted by Empire and not opposed by the Citizens' Utility Ratepayer Board. On April 14, 2015, the Commission issued an Order approving Empire's Application as modified by Staff's Report and Recommendation.

GENERAL INVESTIGATION

<i>Docket number</i>	13-GIMX-150-GIV
<i>Docket type</i>	General Investigation
<i>Date filed</i>	27 Sept 2012
<i>Action date</i>	30 Oct 2014
<i>Commission Action</i>	Comments Filed

In the Matter of a General Investigation to Monitor Ongoing Environmental Regulatory Developments Affecting Jurisdictional Utilities and Licensed Oil and Gas Operators.

On September 27, 2012, the KCC opened a general investigation to gather information about the EPA's environmental regulations and their impact on jurisdictional utilities and operators. Initially, Staff filed periodic regulatory updates reports to the Docket to provide information to the Commission and other interested parties. The regulatory updates ended on February 19, 2014. On June 2, 2014, Staff filed its report on the retail rate impact of EPA regulations in Kansas. On October 30, 2014, Staff filed its comments submitted to the EPA in response to the proposed Clean Power Plan.

WESTAR ENERGY, INC.

Docket number *15-WSEE-365-MIS*
Docket type *Electric*
Date filed *20 Feb 2015*
Action date *11 July 2015*
Commission Action *Approved*

In the Matter of the Application of Westar Energy, Inc. for a Siting Permit for the Construction of a 345 kV Transmission Line in Riley and Pottawatomie Counties, Kansas.

Westar Energy, Inc. (Westar) filed its Transmission Line Siting Application on February 20, 2015, seeking approval to build a 345 kV transmission line from Westar's Jeffrey Energy Center Substation to Westar's East Manhattan Substation, located near Manhattan, Kansas. The new line will replace 26 miles of existing 230 kV line between those substations. It will be engineered and constructed to 345kV standards, but will continue to be operated at 230 kV until such time in the future that SPP authorizes operation at 345 kV. The project is estimated to cost \$58 million. For the most part, the requested easement followed the existing Westar utility easement with a 50 foot increase to accommodate the higher voltage design. Completion is expected by June of 2017. The Commission issued an Order approving the route on June 11, 2015.

Dockets

LARGE ELECTRIC UTILITIES (revenues of more than \$10M)

The Commission acted upon the following dockets filed by Large Electric Utilities from July 1, 2014 to June 30, 2015. These filings involved companies with operating revenues of more than \$10,000,000.

Natural Gas Utilities

Financials

The following are selected Rate Base, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis.

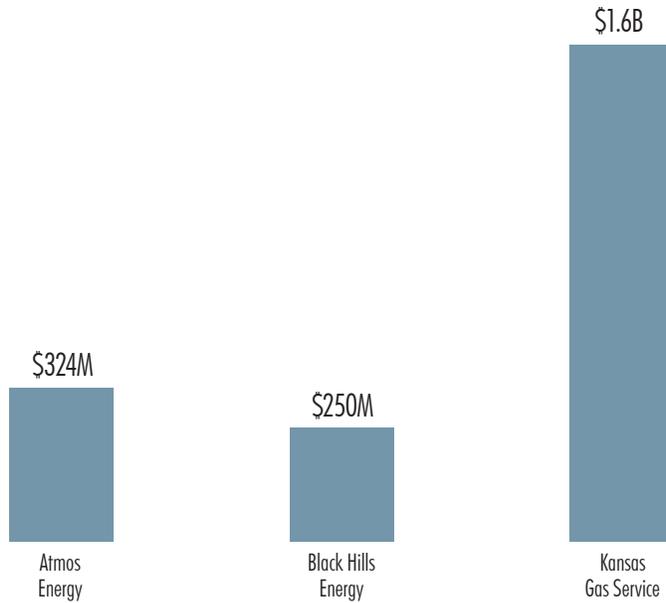

GAS COMPANIES STATEWIDE RATE BASE | 2010–2014

Rate Base is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility's rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total rate base of all regulated public utilities in Kansas for the past five years.

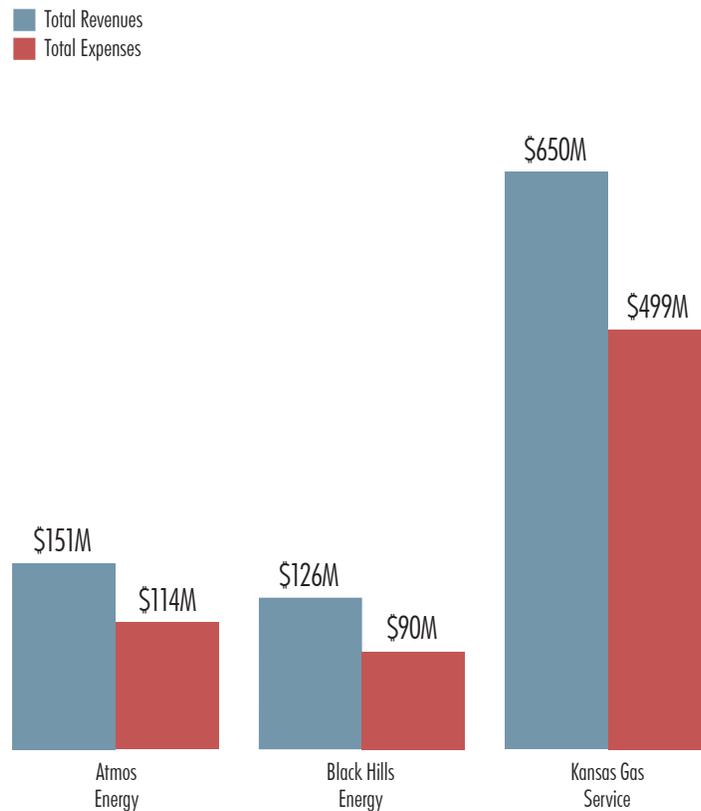

GAS COMPANIES RATE BASE, BY COMPANY | 2014

This chart takes the statewide aggregate rate base figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, one entity encompasses a vast majority of utility rate base across Kansas.

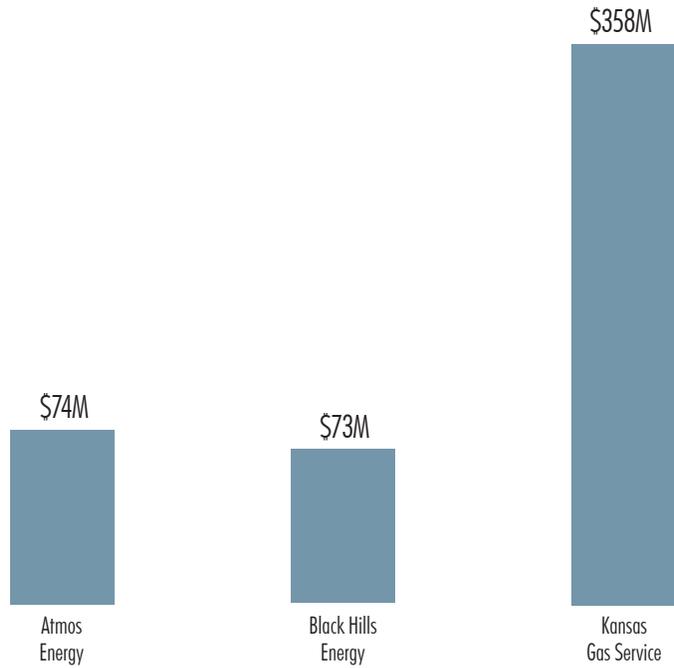

GAS COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2014

This chart compares each utility's annualized revenues and expenses and the difference between the two represents the gross margin of each company.

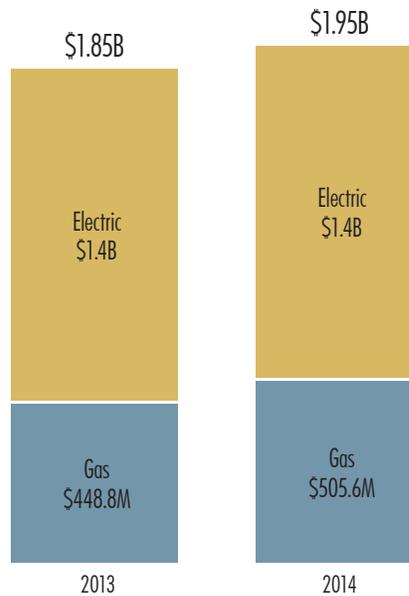

GAS COMPANIES PURCHASED GAS COSTS, BY COMPANY | 2014

This chart takes the expense portion from each utility on the previous table and carves out the cost of purchased gas.

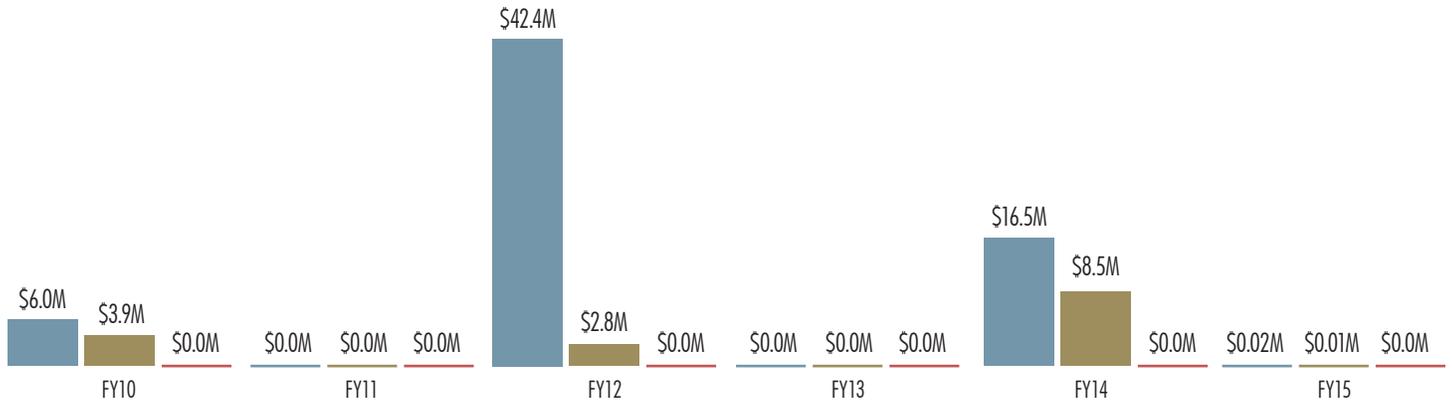

TOTAL PURCHASED GAS (GAS UTILITIES) AND TOTAL PURCHASED FUEL FOR GENERATION (ELECTRIC UTILITIES)

This chart shows the total natural gas purchased for utility use for the last two years. Each column bar is broken down into blue and yellow portions. The blue represents gas purchased by the gas utilities for regulated delivery to their retail and wholesale customers. The yellow represents natural gas “fuel” purchased by electric utilities for natural gas-fired generation of electricity. Whereas the bulk of retail gas use (blue) is for winter heating, utility gas fuel use is predominantly during peak electric usage summer months where baseload nuclear and coal generation have already been dispatched and the remaining load must be served by gas-fired generation.

Large Gas Rate Cases

BLACK HILLS ENERGY

Docket number 14-BHCG-502-RTS
Docket type Gas
Date filed 29 April 2014
Action date 16 Dec 2014
Commission action Approved

In the Matter of the Application of Black Hills/Kansas Gas Utility Company, LLC, d/b/a Black Hills Energy, for Approval of the Commission to Make Certain Changes in Its Rates for Natural Gas Service.

Black Hills/Kansas Gas Utility Company, LLC, d/b/a Black Hills Energy (Black Hills) filed its Application for a rate increase on April 29, 2014. The total request from the Company was a \$9.5 million increase in revenue requirement. The \$9.5 million increase in base rates includes \$4.4 million relating to rebasing Gas System Reliability Surcharge and Ad Valorem Tax Surcharge revenues, making the net requested increase \$5.1 million. Black Hills also requested approval of three alternative ratemaking mechanisms: (1) FutureTrack Workforce Development Program; (2) an Accelerated Pipeline Replacement Rider; and (3) a Bypass Revenue Rider. The Company also requested implementation of Pension and Post Retirement and Other Benefits trackers and also sought new depreciation rates. On September 12, 2014, the parties filed their direct testimony. In its direct testimony, Staff recommended that the Commission increase Black Hills' revenue requirement by \$4.69 million; and The Citizens' Utility Ratepayer Board (CURB) recommended an increase of \$3.61 million. Both parties opposed Black Hills' alternative ratemaking mechanisms. On October 10, 2014, the parties met collectively to discuss the possible settlement of issues in this matter. After extensive negotiations, the parties agreed to a total revenue increase of \$5.23 million. On December 16, 2014, the Commission issued an Order approving the Stipulated Settlement Agreement.

Major Dockets | GAS UTILITIES

ANADARKO NATURAL GAS CO.

<i>Docket Number</i>	<i>14-ANGG-119-COM</i>
<i>Docket type</i>	<i>Gas</i>
<i>Date filed</i>	<i>27 Aug 2013</i>
<i>Action date</i>	<i>n/a</i>
<i>Commission action</i>	<i>Open</i>

In the Matter of the Complaint of SWKI-Seward West Central, Inc. and SWKI-Stevens Southeast, Inc. Against Anadarko Natural Gas Company.

Two non-profit utilities filed a Complaint against Anadarko Natural Gas Company alleging Anadarko had failed to file certain contracts with the Commission for approval. The non-profit utilities also asked the Commission to find all rates charged by Anadarko in excess of the latest Commission-approved rate are unlawful and subject to refund with interest. The Commission issued an Order dismissing the Complaint and approving a settlement agreement between Staff and Anadarko which included a \$50,000 penalty assessed against Anadarko. The non-profit utilities have appealed the Commission's decision regarding the Complaint dismissal. Negotiations between the parties to settle the complaint issues continue while waiting for District Court review in Stevens County.

GENERAL INVESTIGATION

<i>Docket Number</i>	<i>114-GIMG-514-GIG</i>
<i>Docket type</i>	<i>Gas</i>
<i>Date filed</i>	<i>12 June 2014</i>
<i>Action date</i>	<i>n/a</i>
<i>Commission action</i>	<i>Open</i>

In the Matter of a General Investigation Regarding the Development of Distribution Infrastructure for Natural Gas in Rural Kansas.

On June 12, 2014, the Commission opened a general investigation regarding the development of distribution infrastructure for natural gas in rural Kansas that explores the rights, duties, and obligations that should be expected of a gas provider or consumer. The general investigation is limited to the following six issues:

- (1) Developing or relinquishing certificated territory held by existing public utilities;
- (2) Allowing open competition/multiple Certificates of Convenience and Necessity to entities wishing to distribute natural gas in rural areas;
- (3) Providing transparency and objectivity in line extension policies;
- (4) The appropriate mechanism for recovery of line extension costs that encourages rural development without cross-subsidization of customer classes;
- (5) The use of customer specific Certificates of Convenience and Necessity and what, if any, obligation to serve exists for the certificated utility to serve future customers; and
- (6) The ability to access gas supply from interstate pipelines.

At this time, members of the industry have responded to Staff's initial Report and Recommendation, and Staff has filed a subsequent report compiling the industry's comments and offering further clarification on the above listed issues. The Docket remains open.

ATMOS ENERGY CORPORATION

<i>Docket Number</i>	<i>14-ATMG-230-TAR</i>
<i>Docket type</i>	<i>Gas</i>
<i>Date filed</i>	<i>15 Nov 2013</i>
<i>Action date</i>	<i>07 Apr 2015</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of the Application of Atmos Energy to Amend its Purchase Gas Adjustment (PGA) Schedule to Add a Demand Charge Savings and Pipeline Bypass Savings Component to the PGA.

On November 15, 2013, Atmos Energy filed an Application with the Commission to establish a performance based rate mechanism that incentivized Atmos to negotiate more favorable gas supply contracts for its customers. A joint settlement agreement was reached between Staff, Atmos, and CURB that resulted in any savings from contract renegotiations to be shared between the customers and Atmos with the customers receiving 78% of the savings. The Commission approved the settlement agreement on April 7, 2015.

KANSAS GAS SERVICE, A DIVISION OF ONE GAS, INC.

Docket Number 15-KGSG-015-COM
Docket type Gas
Date filed 10 Jul 2014
Action date 21 Oct 2014
Commission action Approved

In the Matter of the Complaint Against Kansas Gas Service, a Division of ONE Gas, Inc. by Great Plains Manufacturing, Inc.

In its Complaint, Great Plains alleged Kansas Gas Service failed to bill Great Plains for \$333,229 of gas costs over a period of four years due to incorrect billing calculations. Although Great Plains did not dispute receiving the gas service, it noted that KGS's billing error had interfered with its business operations by denying Great Plains the ability to keep its costs low and to collect from its customers any of the increased cost of gas. By receiving a bill four years late, Great Plains argued it could not adjust its prices for goods already sold. Staff, KGS and Great Plains proposed a joint settlement agreement that was approved by the Commission on October 21, 2014. The settlement agreement allowed Great Plains to pay for only the cost of gas included in the under-billed amount and further reduce its payment related to the time value of money and litigation risk. Total savings to Great Plains was \$175,000 with an estimated saving to the ratepayers of \$40,000. In addition, KGS was required to revise its billing operations to assure this type of oversight does not recur.

TEXAS-KANSAS-OKLAHOMA, LLC

Docket Number 15-TKOG-236-COM
Docket type Gas
Date filed 02 Dec 2014
Action date n/a
Commission action Open

In the Matter of the Complaint Against Texas-Kansas-Oklahoma, LLC (TKO) for an Order for Adjustment and Refund of Unfair, Unreasonable and Unjust Rates for the Sale of Natural Gas for Irrigation Based on Inaccurate and/or False Pressure Base Measurements by Circle H Farms, LLC, Richard L. Hanson, Rome Farms, and Stegman Farms Partnership.

In this Complaint, a group of irrigation and rural gas customers allege TKO incorrectly calculated the amount of thermal energy that was charged for in their bill. Staff reviewed the Complaint and recommended the Commission order TKO to refund 9.5% of the cost of gas to all of its Kansas jurisdictional irrigation customers for all invoices since March of 2012. The Docket remains open at this time.

GENERAL INVESTIGATION

Docket Number 15-GIMG-343-GIG
Docket type Gas
Date filed 12 Mar 2015
Action date n/a
Commission action Open

In the Matter of a General Investigation Regarding the Acceleration of Replacement of Natural Gas Pipelines Constructed of Obsolete Materials Considered to be a Safety Risk.

In March of 2015, the Commission opened a general investigation into the need to accelerate the replacement of obsolete natural gas infrastructure and to consider the necessity of alternative rate treatment for pipe replacement programs. In its recommendation to open the general recommendation, Staff noted there are 5,300 miles of obsolete piping in natural gas distribution service. While acknowledging the progress of current pipe replacement programs, Staff argued that accelerating the rate of replacement for all utilities would be in the public interest because it would provide the public with the benefit of achieving these safety goals sooner than a program that simply replaces pipe based on the current leakage rate. The Docket remains open at this time

The Commission acted upon the following dockets filed by Large Gas Utilities from July 1, 2014 to June 30, 2015. These filings involved companies with operating revenues of more than \$10,000,000.

ATMOS ENERGY CORPORATION

Docket Number 14-ATMG-230-TAR

GENERAL INVESTIGATION

<i>Docket number</i>	<i>14-KGSG-566-GIP</i>
<i>Docket type</i>	<i>Pipeline Safety</i>
<i>Date filed</i>	<i>17 June 2014</i>
<i>Action date</i>	<i>06 Jan 2015</i>
<i>Commission action</i>	<i>Fined</i>

In the Matter of the General Investigation Into the Operations of Kansas Gas Service, A Division of One Gas, Inc., Regarding the Natural Gas Incident That Occurred in the Vicinity of the Intersection of NW Grant Street and Tyler Street, Topeka, Kansas.

On June 2, 2014, a natural gas flash fire and small explosion occurred in an underground piping vault in Topeka, Kansas. The resulting explosion caused minor injuries to one KGS employee who was hospitalized for a brief period. On October 14, 2014, Staff filed a Report and Recommendation that determined KGS violated three provisions of the Kansas Pipeline Safety regulations regarding developing and following procedures and qualifying its personnel to an adequate procedure for work performed in underground vaults. Staff recommended KGS modify its procedures and qualification requirements to include more specific instructions, and it recommended the Commission impose a \$10,200 civil penalty on KGS for violation of the Kansas Pipeline Safety Regulations. On January 6, 2015, the Commission issued an Order assessing KGS a penalty of \$10,200 for failing to follow a required procedure and requiring KGS to modify its plans and procedures to address the deficiencies listed in Staff's report.

HOWISON HEIGHTS, INC.

<i>Docket number</i>	<i>13-HHIW-460-GIV</i>
<i>Docket type</i>	<i>Water</i>
<i>Date filed</i>	<i>14 Jan 2013</i>
<i>Action date</i>	<i>n/a</i>
<i>Commission action</i>	<i>Not final</i>

In the Matter of the Investigation of Howison Heights, Inc's Ability to Provide Sufficient and Efficient Service.

On February 8, 2013, the Commission ordered an investigation into Howison's ability to provide sufficient and efficient service to its customers. This report provides an update on the progress of events in this matter from September 2014 to October 2015. Staff began a review of the Company's accounting and business practices in November 2014 and issued its report on March 30, 2015. The report concluded that Howison Heights had complied with only three of twelve Commission-ordered business practice requirements. On April 28, 2015, the Commission ordered Howison Heights to hire a bookkeeper, prepare a long-term plan, and refund \$1,000 per month to its customers as a result of continued indifference towards its regulatory requirements. On July 16, 2015, Howison filed a status report with the Commission reporting that the Company had been unable to comply with the requirements of the April 15th Order because the Company was involved in discussions with neighboring Ottawa County Rural Water

District No. 2 with the hope that the rural water district would soon acquire the water distribution assets of Howison. The status report stated that ongoing attorney fees being incurred to effectuate the sale of the water system made it impossible to refund \$1,000 per month to the customers of Howison as Ordered by the Commission. On Thursday September 10, 2015, the Ottawa RWD No. 2 Board of Directors denied a motion to allow the President of Ottawa RWD No. 2 to negotiate with Howison for the eventual transfer of the water system to Ottawa RWD No. 2's control. The Ottawa RWD No. 2's Board did however authorize an engineer to look at the Howison system to assess the feasibility of servicing the Howison customers. In addition, Howison customers were invited by Ottawa RWD No. 2 to a meeting scheduled on October 31, 2015, to gauge their level of interest towards the water system being transferred to its system. Staff attended and continues to be actively involved in the monitoring and investigation of this utility.

SUBURBAN WATER CO.

<i>Docket number</i>	<i>15-SUBW-138-FIN</i>

GENERAL INVESTIGATION

Docket number 14-GIMT-105-GIT
Docket type Telecom
Date filed 27 Aug 2013
Action date 20 Oct 2015
Commission action Order Issued

In the Matter of an Investigation to Determine the Assessment Rate for the Eighteenth Year of the Kansas Universal Service Fund, Effective March 1, 2014.

The KCC opened this proceeding to determine the appropriate assessment rate for the eighteenth year of the KUSF. The KCC adopted KCC Staff’s recommended KUSF assessment rate for March 1, 2014, through February 28, 2015, of 6.42 percent in an Order issued January 23, 2014. The KCC issued an Order on March 18, 2014, soliciting comments on issues related to KUSF contributions that were raised by KCC Staff and the Third Party Administrator, GVNW Consulting, Inc., earlier in the proceeding. Staff filed a Report and Recommendation on the contribution issues on October 3, 2014. The KCC issued an Order allowing parties until October 27, 2014, to respond to the Report and Recommendation. The KCC issued an Order on October 20, 2015: (1) adopting the Federal Communications Commission’s (FCC) rules regarding allocation and repotting of end-user discounts for KUSF contribution purposes; (2) adopting the FCC’s safe harbor provisions for all bundled services that include assessable telecommunications service; (3) requiring providers, including interconnected Voice over Internet Protocol (VoIP) providers, to follow the bundled service safe harbor provisions for all bundled service offerings, including those marketed as offering free telecommunications service; (4) requiring companies to maintain customer billing records for a period of no less than three-years after the end of a KUSF fiscal year; (5) allowing companies to report Early Termination Fee (ETF) revenue using the

accrual, modified cash, or cash method of accounting provided the company’s external auditor agrees with such method; and (6) not to take action on the global contribution methodology issue at this time due to a pending FCC proceeding on FUSF contribution methodology.

GENERAL INVESTIGATION

Docket number 14-GIMT-300-GIT
Docket type Telecom
Date filed 07 Jan 2014
Action date 20 Sept 2014
Commission action Order Issued

In the Matter of an Investigation into the Appropriate Management of the Telephone Relay Service and Telephone Assistance Program in Kansas.

Recognizing that the Kansas Telecommunications Industry Association (KTIA) had provided notice to the KCC that it decided to cease administering the Telecommunications Access Program (TAP) and the Telecommunications Relay Service (TRS) programs in Kansas, the KCC opened this proceeding to determine the appropriate management of the TRS and TAP programs. An RFP was issued and the bid was awarded by the Kansas Department of Administration to Assistive Technologies for Kansans (ATK). The KCC issued an Order on April 17, 2014, recognizing ATK as the new TRS and TAP administrator in Kansas. The KCC also recognized the need to re-examine the current structure of the Kansas Relay Services, Inc., the TRS program, and the TAP programs in general and directed staff to provide its recommendations to the KCC on these matters. KCC Staff recommended: (1) KRSI be dissolved; (2) Physicians Assistants and Advanced Practice Registered Nurses be added to

the list of professionals allowed to certify impairments or disabilities for purposes of TAP program qualification; and (3) the requirement for vouchers to be issued under the TAP program be removed. The KCC issued an Order on September 8, 2014, adopting Staff’s recommendations.

GENERAL INVESTIGATION

Docket number 14-GIMT-468-GIT
Docket type Telecom
Date filed 22 April 2014
Action date 18 Sept 2014
Commission action Order Issued

In the Matter of Certification of Compliance with Section 254(e) of the Federal Telecommunications Act of 1996, and Certification of Appropriate use of Kansas Universal Service Fund Support.

This proceeding was opened on April 22, 2014, for purposes of collecting data from eligible telecommunications carriers (ETCs) in Kansas. The data was to be filed by July 1, 2014. The data is used to determine whether the KCC will certify to the FCC and the Universal Service Administrative Company (USAC) that ETCs are using federal universal service funds only for the provision, maintenance and upgrading of facilities and services for which the support is intended. The data is also used to determine whether ETCs in Kansas utilized their KUSF monies appropriately. The KCC issued an Order on September 18, 2014, in which it determined that: (1) KCC Staff shall submit letters to the FCC and USAC to certify that the carriers listed have certified that their federal universal service fund support used in 2013 and will be used in 2015 only for the provision, maintenance, and upgrading of facilities and services for which support was intended; (2) the KCC Staff shall commence company-specific

audits proceedings for Gorham and Twin Valley to adequately determine whether the amount of KUSF support received is appropriate or if an adjustment to the carrier's KUSF support is necessary; and (3) nine carriers listed in KCC Staff's Report should be assessed a late fee for failing to file the data by the ordered due date.

<http://estar.kcc.ks.gov/estar/portal/kcc/page/docket-docs/PSC/DocketDetails.aspx?DocketId=241e6f91-6438-479a-8ff6e-851e8938d77b>

S&T TELEPHONE COOPERATIVE, INC.

Docket number 14-S&TT-525-KSF
Docket type Telecom
Date filed 15 May 2014
Action date 20 Nov 2014
Commission action Order Issued

In the Matter of the Application and Request of the S&T Telephone Cooperative, Inc., for an Increase in its Cost-Based Kansas Universal Service Fund Support.

S&T filed an Application requesting an increase of \$1,620,205 in its high-cost KUSF support on May 15, 2014. Direct testimony was filed on behalf of Commission Staff on September 30, 2014, recommending an annual increase to S&T's KUSF support by \$746,959 from the current annual support level of \$415,334, for a total KUSF support of \$1,162,293. Rebuttal testimony was filed on October 14, 2014, on behalf of S&T stating that Staff's proposed level of KUSF support for S&T was for the most part reasonable; however, it was noted that Staff had agreed with S&T to modify the allocation of lease revenue, causing an addition of \$83,732 to Staff's position. S&T's also argued in its rebuttal testimony that Staff should continue to update Federal High Cost Loop Support in the same manner it has in the past for an approximate impact of \$410,000, and that it believed Staff had improperly removed legal expenses as "lobbying" for an approximate impact of \$2,500. S&T and Commission Staff filed a Joint Motion for approval of S&T's annual cost-based KUSF support on October 20, 2014. The Joint Motion indicates that after discussions, Staff and S&T agreed that S&T's cost-based KUSF support amount should increase an additional \$835,923 annually, effective the first day of the month following a Commission Order granting the Joint Motion, for a total annual KUSF draw of \$1,251,257. The KCC issued an Order on November 20,

2014, approving the Joint Motion.

GENERAL INVESTIGATION

Docket number 15-GIMT-068-GIT
Docket type Telecom
Date filed 26 Aug 2014
Action date 25 Nov 2014
Commission action Order Issued

In the Matter of a General Investigation Into the Adjustment of Intrastate Switched Access Charges for Rural Telephone Companies in Compliance with K.S.A. 2013 Supp. 66-2005(c) and FCC Reforms.

This proceeding was opened on August 26, 2014, to facilitate the adjustment of the Rural Local Exchange Carriers' (RLECs) intrastate access rates and accompanying KUSF adjustments under K.S.A. 66-2005(c) with respect to originating switched end office and traffic sensitive transport. Direct testimony was filed by Commission Staff on October 28, 2014, stating the following: (1) the RLECs' filed access rate and revenue calculations were aligned with Commission Staff's; (2) the RLECs would receive an aggregate increase of \$33,611 in annual intrastate originating access revenues due to the intrastate originating access adjustments proposed for July 1, 2015; and (3) the intrastate access revenue increases result in an aggregate decrease of \$30,862 in annual KUSF support for the RLECs. Rebuttal testimony was filed on November 10, 2014, on behalf of the RLECs, taking issue only with Commission Staff's testimony regarding preemption of K.S.A. 66-2005(c) (1) by the FCC. The Commission issued an Order on November 25, 2014, adopting the adjustments to the RLECs' intrastate originating intrastate access rates as stated in Staff's Direct Testimony and directing the RLECs to file revised intrastate access tariffs by June 1, 2015, for a July 1, 2015, implementation date.

<http://estar.kcc.ks.gov/estar/portal/kcc/PSC/DocketDetails.aspx?DocketId=1440005a-0179-4d25-8c67-085c4f45d622>

GENERAL INVESTIGATION

Docket number 15-GIMT-073-GIT
Docket type Telecom
Date filed 28 Aug 2014
Action date 21 May 2015
Commission action Order Issued

In the Matter of An Investigation to Determine the Assessment Rate and the Affordable Local Service Rate for Rate-of-Return Regulated Carriers for the Nineteenth Year of the Kansas Universal Service Fund, Effective March 1, 2015.

The KCC opened this proceeding to determine the appropriate assessment rate for the nineteenth year of the KUSF and to determine the affordable local rates for local exchange service provided by rural telephone companies subject to rate-of-return regulation pursuant to K.S.A. 66-2005(e). The KCC issued an Order on January 15, 2015, in which it: (1) adopted a KUSF assessment rate for March 1, 2015, through February 29, 2016, of 6.47 percent; (2) adopted an affordable monthly local service rate of \$17 for residential service and \$20 for single-line business service for rate-of-return regulated carriers; (3) adopted a per-line KUSF assessment of \$1.56 for the RLECs, \$1.99 for United Telephone Companies of Kansas d/b/a CenturyLink (CenturyLink) and \$3.28 for Southwestern Bell Telephone Company of Kansas d/b/a AT&T (AT&T); (4) required the RLECs to file revised tariffs by January 30, 2015; and (5) requested interested parties to file comments addressing the issue of maintaining per-line KUSF assessment rates for the RLECs, CenturyLink and AT&T. The KCC issued an Order on May 21, 2015, finding that, consistent with the direction in K.S.A. 66-2008(a), all carriers' and telecommunications providers' contribution to the KUSF will be assessed using the percentage assessment rate methodology. The change is to be made by carriers no later than March 1, 2016.

GENERAL INVESTIGATION

Docket number 15-GIMT-389-GIT
Docket type Telecom
Date filed 04 March 2015
Action date 24 Sept 2015
Commission action Order Issued

In the Matter of Certification of Compliance with Section 254(e) of the Federal Telecommunications Act of 1996 and Certification of Appropriate Use of Kansas Universal Service Fund Support.

This proceeding was opened on March 4, 2015, for purposes of collecting data from eligible telecommunications carriers (ETCs) in Kansas. The data was to be filed by July 1, 2015. The data is used to determine whether the KCC will certify to the FCC and the Universal Service Administrative Company (USAC) that ETCs are using federal universal service funds only for the provision, maintenance and upgrading of facilities and services for which the support is intended. The data is also used to determine whether ETCs in Kansas utilized their KUSF monies appropriately. The KCC issued an Order on September 24, 2015, in which it determined that: (1) KCC staff shall submit letters to the FCC and USAC to certify that the carriers listed have certified that their federal universal service fund support used in 2014 and will be used in 2016 only for the provision, maintenance, and upgrading of facilities and services for which support was intended; and (2) the KCC Staff shall open a company-specific proceeding for Blue Valley Tele-Communications, Inc. for the purpose of evaluating whether a KUSF audit of the company is warranted.

Commission action Order Issued

In the Matter of a General Investigation into the Adjustment of Intrastate Switched Access Charges Pursuant to the Federal Communications Commission's Reforms, Effective July 1, 2015.

The KCC opened this proceeding to implement Phase 4 of the FCC's intercarrier compensation reform. Phase 4 of the FCC's reform, effective July 1, 2015, required

carriers to further reduce intrastate and interstate terminating switched end-office and reciprocal compensation rates towards \$.005 for rate-of-return carriers and \$.0007 for price-cap carriers. Competitive local exchange carriers subject to the benchmarking rules were also required to reduce their terminating switched end-office rates. The KCC issued an Order on April 14, 2015, requiring carriers to make the appropriate tariff filings reflecting the new intrastate access rates. The KCC issued an Order on June 4, 2015, approving the proposed tariffs filed by CenturyLink with an effective date of July 1, 2015.

MOUNDRIIDGE TELEPHONE COMPANY, INC.

Docket number 15-MRGT-097-KSF
Docket type Telecom
Date filed 03 Sept 2014
Action date 27 April 2015
Commission action Order Issued

In the Matter of the Application of Moundridge Telephone Company, Inc. for Additional Kansas Universal Service Fund Support.

Moundridge filed an Application requesting an increase of \$725,818 in its high-cost KUSF support on September 3, 2014. Direct testimony was filed on behalf of Commission Staff on January 20, 2015, recommending an intrastate revenue decrease of \$571,441. Since Staff's proposed revenue requirement was a reduction greater than the Company's KUSF draw, Staff recommended Moundridge's annual level of KUSF support be set at \$0. Rebuttal testimony was filed on February 4, 2015 on behalf of Moundridge stating that Moundridge is entitled to a KUSF revenue increase of approximately \$215,000. An evidentiary hearing was held on February 25, 2015. Moundridge filed its Post Hearing Brief on March 13, 2015, Staff filed its Closing Brief on March 20, 2015, and Moundridge filed its Reply Brief on March 27, 2015. The KCC issued an Order on April 27, 2015, finding that Moundridge is entitled to negative \$220,533, therefore, the KCC set Moundridge's KUSF at zero. On May 6, 2015, Moundridge filed its Motion for Increased KUSF Support; Alternative Petition for Reconsideration; and Motion for Stay. The KCC issued its Order Denying Petition for Reconsideration; Denying

Motion to Increase KUSF Support; and Denying Motion for Stay on June 4, 2015. Moundridge appealed the KCC's Order to the Kansas Court of Appeals. On November 25, 2015, the Court of Appeals affirmed the KCC's Order. (Moundridge Tel. Co. v. Kansas Corp. Comm'n, No. 114,064. 2015 WL 7693784 (Kan. Ct. App. Nov. 25, 2015) (Unpublished)).

TWIN VALLEY TELEPHONE, INC.

Docket number 15-TWVT-213-AUD
Docket type Telecom
Date filed 09 Dec 2014
Action date 10 Dec 2015
Commission action Order Issued

In the Matter of an Audit of Twin Valley Telephone, Inc. to Determine its Cost-Based Kansas Universal Service Fund Support Pursuant to K.S.A. 66-2008.

On December 9, 2014, the KCC ordered that Twin Valley be subjected to an audit to determine its cost-based KUSF. On October 16, 2015, following the filing of direct, errata and rebuttal testimony, Twin Valley and Commission Staff filed a Joint Motion requesting the KCC approve a partial stipulation and agreement, waive the evidentiary hearing, and determine the lost FUSF support impact. The KCC issued an Order on October 27, 2015, approving the partial stipulation and agreement. On November 12, 2015, Twin Valley and Commission staff filed briefs on the remaining issue of the lost FUSF support, and Twin Valley also filed its documentation of audit expenses. On December 10, 2015, the KCC issued an Order denying Twin Valley's request for an annual increase of \$856,627 in KUSF support due to the decrease in FUSF support, but approving Twin Valley's request for the recovery of additional audit expenses. The KCC authorized a \$14,688 annual increase in Twin Valley's KUSF support, effective January 1, 2016. The KCC's orders contain a provision for recovery of a total of \$212,480 in audit expense, which shall be amortized over five years.

 Docket type Telecom
 Date filed 08 Aug 2014
 Action date 16 Sep 2014
 Commission action Approved

In the Matter of the Application by Carson Communications, L.L.C. Requesting the Name on its Certificate of Public Convenience and Necessity be Changed to Rainbow Communications, L.L.C.

Transportation

The role of the Transportation Division of the Kansas Corporation Commission (KCC) is to ensure appropriate and effective regulatory oversight of motor carriers, with the goal of protecting the public interest and promoting safety through comprehensive planning, licensing, education, and inspection to the extent not preempted by federal law.

Motor Carriers

The chief responsibility of the Transportation Division is to develop, modify and implement licensing, auditing, inspection and other administrative procedures that promote safe and efficient motor carrier operations, while balancing public interest and minimizing administrative burdens to the extent possible. Likewise, State law requires the KCC to verify that each new motor carrier is in compliance with the Commission's safety rules and regulations within 18 months of granting the motor carrier Commission operating authority. To advance the Division's established mission, Transportation Staff conducts both comprehensive and focused off-site investigations and audits on new and existing motor carriers, taking appropriate action upon discovering unsafe conditions. The Transportation Division also works closely with the Kansas Highway Patrol (KHP) and the Federal Motor Carrier Safety Administration (FMCSA) to reduce accidents involving motor carriers through promotion of safety education to the motor carrier industry and oversight of State and Federal regulations.

Regarding safety education, the KCC sends e-mails and postcard invitations to each Kansas-based motor carrier that applies for and receives a new USDOT number. The invitations are mailed monthly and are designed to encourage the new motor carriers to attend the free Commission-sponsored safety seminars focused on the state and federal motor carrier rules and regulations. KCC Special Investigators (SIs) conduct the educational safety seminars throughout Kansas six times per month. Currently, motor carriers may attend one of these seminars in Bonner Springs, Topeka, Chanute, Hutchinson, Hays or Garden City. These seminars are designed to inform and educate new, existing, and out-of-compliance motor carriers of the Commission's rules and regulations. Additionally, the Transportation Staff also conducts educational safety seminars for the graduating classes at the truck driving technical schools in Liberal, Kansas City, Topeka, Wichita, and Fort Scott.

Since the inception of the federal Comprehensive Safety Analysis (CSA) program, the FMCSA has responded to concerns from industry and enforcement by updating the program in an effort

to improve their motor carrier safety compliance program. The goal of the CSA program has been to intervene early enough in a motor carrier's operation to permit the identification of problem areas and an opportunity for the motor carrier to correct the concerns before an accident occurs. The Federal New Entrant program requires all motor carriers seeking a federal interstate USDOT number to pass a safety audit within 12 months of beginning operations.

The CSA program focuses on 16 regulations that are considered essential to a motor carrier's basic safety plan and therefore necessary to operate in interstate commerce. The CSA audit uses on-road safety performance data to measure a carrier's safety fitness. The data is classified into seven specific categories of carrier/driver behavior to include: unsafe driving; fatigued driving (Hours of Service violations); driver fitness concerns; controlled substances/alcohol programs; vehicle maintenance concerns; cargo-related safety concerns; and the carrier's crash indicator. A motor carrier's failure to comply with any one of the 16 regulations results in an automatic failure of the safety audit. A motor carrier who fails a new entrant

safety audit is provided formal notice of the failure and 60 days to correct the problems identified. Only those carriers who fail to correct the problems or who fail to request either additional time or a formal review are subject to revocation of the carrier's interstate operating authority. On the other hand, a carrier who passes the review is moved to the bottom of the review list until such time as the carrier's safety indicators decline and require official intervention.

Regarding motor carrier safety, the KCC, the Kansas Department of Revenue and the Kansas Highway Patrol implemented a system aimed at halting the intrastate motor carrier operation of those interstate carriers who have failed to meet the minimum safety requirements of a New Entrant Safety Audit. The KCC Staff will formally recommend that the Commission suspend a carrier listed on a federal out-of-service order. The Director of Vehicles will issue a "tag pick-up" request to the Kansas Highway Patrol.

The KCC, KHP, KDOR and FMCSA share responsibilities in the oversight of both the state and federal motor carrier safety and economic rules and regulations. This partnership has proven to be extremely efficient and effective in contacting more carriers and drivers and in identifying high risk carriers and drivers. As a result, it is possible for the FMCSA and state oversight agencies to apply a wider range of interventions aimed at correcting high risk behavior.

Commercial Driver's License (CDL) Reciprocity Agreements

Currently Kansas has active agreements with our counterparts in Missouri, Nebraska and Oklahoma. Kansas has entered into Reciprocity Agreements which permit Kansas farmers to operate their commercial driver's license (CDL) class commercial motor vehicles (CMV) in interstate commerce within 150 miles of the farmers place of operation without the necessity of obtaining a CDL under

certain conditions. A farmer may benefit under this exemption when the farmer operating a vehicle holds a valid driver's license in the farmer's home state and the vehicle is properly operated as a farm vehicle under the laws of the state. The vehicle must be registered as a farm vehicle and be controlled and operated by a farmer for the exclusive purpose of transporting agricultural products, farm machinery, and/or farm supplies to or from the farmer's farm. The federal statutory provisions in the Moving Ahead for Progress in the Twenty-First Century (MAP-21) legislation were self-executing and took effect on October 1, 2012. This exemption eliminates the need for our CDL Reciprocity agreements for the purpose of safety regulations; however, farm vehicle drivers still need the agreements for the Hazardous Materials exemptions. We continue to work on a similar agreement with representatives from Colorado.

Due to MAP-21, our CDL Reciprocity Agreements are more important than ever. Currently if farmers transport Hazardous Materials in interstate commerce they are not allowed to use the MAP-21 exemptions. Our agreements allow a farm vehicle driver to operate up to a 150 air-mile radius from the farm in interstate commerce without requiring a commercial driver's license (CDL) and without registering in a Substance and Alcohol Testing program. The Transportation Division is currently working with the Department of Revenue to resolve this issue.

Civil Assessment Program

In 2006, the KCC and KHP partnered to enhance the Kansas Safety Compliance Program with the goal of reducing the number of injury/fatality accidents involving Commercial Motor Vehicles. The Civil Assessment Program was designed and implemented for the purpose of distinguishing the responsibilities of drivers from those of the motor carriers under the Federal Motor Carrier Safety Regulations'

(FMCSRs) "Out-Of-Service" violations. Out-of-Service (OOS) violations are violations designated as serious by the Commercial Vehicle Safety Alliance (CVSA), and require that a driver or vehicle be removed from service until the violations are corrected. CVSA is a non-profit organization consisting of federal and state regulatory agencies, motor carrier industry, and representatives dedicated to improving motor carrier safety.

STRATEGIES

The program focuses on the safety of the driver, equipment and the traveling public. The KCC and KHP work together on enforcement and education regarding OOS violations of the FMCSRs discovered during roadside inspections. The KCC will only issue one civil penalty for each OOS violation per category. For example, if the truck-tractor of a combination vehicle is placed OOS for brakes and the trailer is also placed OOS for brakes, the company will be documented for both OOS violations, but only fined for one. The KHP and KCC will allow the civil assessment to be waived for OOS violations that are outside the obvious normal method of company operations. The KHP Trooper or local enforcement officer will have the ability to provide information to recommend that no civil assessment be issued. If the carrier has demonstrated, at the roadside inspection, that the violation was 1) potentially unavoidable; 2) the carrier has processes in place to prevent the violation; and 3) the carrier clearly has the means to correct the violation, the Trooper/Officer may recommend no civil assessment be issued. In all cases, the field decision may be superseded after the inspection is reviewed.

OBJECTIVE

The effectiveness of the roadside inspection program is based on information provided by the FMCSA Analysis and Information (A&I) database. The State of Kansas experienced a greater than 5% increase in roadside inspections between the

Federal fiscal year (FFY) 2011 and FFY 2015 (the most recent information as of 9/25/2015). While the number of inspections increased, the OOS rate for drivers has decreased from a 5.91% in 2011 to 5.42% in 2015. The vehicle OOS rate experienced a slight decrease from 15.16% in 2011, to 15.08% in 2015. Our continued education efforts are designed to help maintain downward OOS trends, or actively correct short term OOS rate increases.

Nationally, A&I information indicates Kansas continues to have a slightly higher driver OOS rate of 5.42% compared to the National driver OOS rate of 4.92%. For the vehicle OOS, Kansas continues to have significantly lower vehicle OOS rate of 15.08% compared to the National vehicle OOS rate of 20.32%. In hazardous materials (HM) OOS, Kansas maintains a slightly higher OOS rate of 5.43% compared to the National HM OOS rate of 3.92%. These numbers reflect a continuing downward trend in driver and vehicle OOS rates both nationally and Statewide.

Federal Unified Carrier Registration (UCR)

HISTORY

The Unified Carrier Registration (UCR) Agreement is found in 49 USC 14504a (hereinafter referred to as section 14504a). The UCR Agreement is established by federal law in the UCR Act, which is part of the federal highway reauthorization bill known as the Safe, Accountable, Flexible, Efficient Transportation Equity Act, A Legacy for Users (“SAFETEA-LU”), Public Law 109-59, enacted August 10, 2005.

The UCR Act is sections 4301 through 4308 of SAFETEA-LU. In particular, the structure of the UCR Agreement is set forth in section 4305 of the UCR Act, which enacts section 14504a as a new section in 49 USC.

The UCR Agreement was amended under Section 301 of the SAFETEA-

LU Technical Corrections Act of 2008, Public Law 110-244, enacted June 6, 2008, and in the Rail Safety Improvement Act of 2008, Public Law 110-432, enacted October 16, 2008. As of September 2011, SAFETEA-LU is currently under extension awaiting a new act of Congress. In the meantime, UCR remains in full force and effect and compliance is mandatory.

SUMMARY

Forty one states submitted a state plan to the Secretary prior to the August 10, 2008, deadline and are eligible to participate in the UCR agreement. The federal UCR agreement requires all for-hire motor carriers transporting property or passengers, and motor private carriers transporting property in interstate commerce, as well as brokers, freight forwarders, and leasing companies to register with the United States Department of Transportation and pay UCR fees. Wholly intrastate carriers and private motor carriers transporting only passengers are not subject to UCR fees.

The UCR fees are structured based on fleet size, and trailers have been permanently removed from the fee calculation. Oversight of non-payment of UCR fees began January 1, 2009, and is conducted through KHP compliance verification at roadside inspections, at Ports of Entry and through the KCC Transportation Division Compliance Reviews. Additionally, the Transportation Division mails notices to each Kansas-based motor carrier which acknowledges interstate activity on its USDOT profile, but has not registered or paid UCR fees for the appropriate year.

PURPOSE

Collection of UCR fees directly affects a state’s receipt of its allotment of federal funds. These funds are used specifically for the enforcement of Kansas motor carrier safety programs. Kansas is focused on making the UCR program work as effectively and efficiently as possible. The Transportation Staff closely monitors the program and participates

through quarterly conference calls with the FMCSA and fellow state representatives. Staff has consistently responded to any calls for assistance and has shared information now found in the program’s oversight best practice guide. Kansas remains dedicated to this program and is annually ranked among the top states for compliance with the UCR as measured by the registration of motor carriers.

Kansas Trucking Regulatory Assistance Network (KTRAN)

FEDERAL GRANT

The Kansas Department of Revenue (KDOR) is the lead agency for the Kansas Commercial Vehicle Information Systems and Networks (CVISN) program. Other agencies involved in the Kansas Expanded CVISN Program Plan are the KCC, KHP and KDOR. These agencies have a longstanding relationship and have partnered on numerous projects in the past. The CVISN team shares a strategic vision which includes providing unparalleled customer service; safety compliance education; and effective, balanced enforcement of our state motor carrier rules and regulations.

BACKGROUND

In May of 2009, the FMCSA reviewed and accepted the KDOR Core CVISN Program Plan/Top-Level Design and certified Kansas as Core CVISN compliant. The mission of the Kansas CVISN program is to create an information network using advanced technology that will enhance efficiency, safety, compliance, and enforcement for commercial vehicle operations. The information network includes the exchange of information and ideas between the government partners and the motor carrier industry. CVISN initiatives will promote the economic well-being of Kansas by facilitating the

movement of goods for business and industry. The Kansas CVISN team is dedicated to applying cost-effective, intelligent transportation technologies and streamlining of existing processes that will improve transportation safety and administrative efficiency for both the motor carriers and the state.

In February 2010, the FMCSA announced the availability of \$17,000,000 in additional CVISN grant funds. Additional federal funds under Section 4126(d)(3) provides up to \$1,000,000 in funding for States to deploy, operate, and maintain elements of their CVISN programs. The elements include the commercial vehicle, commercial driver, and carrier specific information systems and networks. The KCC made a timely application seeking \$1,000,000 in grant funding. The grant requires a 50% soft match and the Transportation Division's budget will be used for that match.

PROJECT SUMMARY

The KTRAN project will serve to further integrate information about Kansas motor carriers, commercial vehicles and commercial drivers. For example, roadside enforcement will be able to access KCC authority information through Kansas Commercial Vehicle Information Exchange Window (CVIEW) query windows utilizing a new system-to-system interface built as part of this project. Further, KCC officials will be automatically notified of PRISM OOS status changes as well as having a real-time interface to KSCVIEW for PRISM checking of carriers and vehicles prior to issuing KCC authorities.

Additionally, this project will serve to enhance the Kansas E-Credentialing capability through establishing an interactive process whereby carriers are walked through a logical set of questions to determine what authorities, forms and processes need to be followed to

meet the carrier's needs. The project will build an intelligent, interactive front-end to the TruckingKS.org portal, thus creating a more efficient business process for carriers and state motor carrier personnel. The phases of this project include:

- Creating a porting system into a modern database environment with Internet-based functionality. (Public-facing functions allowing for electronic submission of information.)
- Developing a "wizard" based portal to provide carriers with a question and answer process to obtain information needed to conduct online motor carrier business in Kansas. A preliminary interview of the user would determine which credentials and authorities are needed.
- Establishing key system interfaces with other agencies to share information. This activity includes developing PRISM functionality for testing intrastate carriers prior to issuing KCC authorities and tying civil assessments to renewals and roadside enforcement activities.
- Developing a real-time link to KSCVIEW to provide roadside enforcement with improved access to permit information and intrastate operating authority data.

SUMMARY OF WORK PERFORMED

The Kansas Trucking Regulatory Assistance Network (KTRAN) project will be completed in two subprojects: Subproject I - Detailed Design and Subproject II - System Development.

The KCC received approval on January 8, 2014, to begin Subproject I for the KTRAN project. The subproject included requirements for the wizard, modules, and data interfaces with other Kansas State agencies. The KTRAN project team developed a flyer to communicate to motor carriers and stakeholders the project, benefits, and timelines. The

project team held a meeting with the KTRAN Project Advisory Group to present the KTRAN project progress, timelines, and obtain feedback for requirements for the KTRAN modules.

The web-based wizard will give motor carriers the capability to determine what is required to conduct business as a motor carrier based in Kansas. The modules and templates completed were the Drivers Module that will enable drivers to apply for and manage their waivers; correspondence templates to create ad hoc and form correspondence; Correspondence Module that will provide tools for creating, managing and producing correspondence; Compliance and Training Module that will encompass the functions required to manage compliance reviews and safety training seminars; Unified Carrier Registration (UCR) Module that will let a motor carrier pay its UCR in the Kansas Trucking Regulatory Assistance Network (KTRAN) system via the Information Network of Kansas (INK); and the Financial module that will display the motor carrier's fees, fines, and penalties. The KTRAN project team also completed the design of the agency and public user interfaces.

The KCC worked and finalized data agreements and interface control documents with several Kansas state agencies, including the KHP, Kansas Secretary of State, and the KDOR, to establish system-to-system interfaces that will allow the state agencies to exchange the information needed for regulatory compliance and roadside enforcement.

The KCC successfully completed the KTRAN Subproject I – Detailed Design on July 2, 2015.

The KCC developed the KTRAN Subproject II detailed project plans and submitted them to the Chief Information Technology Officer (CITO) for approval. The KCC received approval on June 9, 2015, to begin the system development, testing, and implementation of the KTRAN Subproject II on July 3, 2015.

The KCC started the system development with completing the database design and starting to build the database. The KTRAN programmers have begun the development of the Customer Account Module and the Wizard. The KCC completed the Electronic Recordkeeping Plan and Record Retention schedule. The Record Retention schedule will be presented to the State Records Board in October 2015 for approval. The

KCC, KDOR, Information Network of Kansas, and the Kansas Information Consortium have completed and signed the Memorandum of Understanding for the KCC to obtain motor vehicle records.

Authority System project to February 23, 2017, and to revise the budget between Object Class Categories (Personnel, Fringe Benefits, Supplies, and Contractual).

GRANT AMENDMENT, AND MODIFICATIONS OF ACTIVITIES

The KCC received approval on January 6, 2015, from the FMCSA to extend the grant for the KCC Motor Carrier

Kansas Active CVISN Grant Funded Projects and Time Lines		
Milestone	Expected Completion Date	Budget Estimate

Conclusion

The Transportation Division has undertaken significant efforts to enhance the oversight responsibilities within its purview and has made significant improvements in motor carrier safety and economic regulation. The Transportation Division continues to explore ways to enhance and refine its role to the benefit of the motor carrier industry and the Kansas public.

The Commission acted upon the following Transportation filings from July 1, 2014 to June 30, 2015. These filings pertained to rates, operating authority, and safety-related matters for motor carriers.

MOTOR CARRIERS

Docket number 15-TRAM-224-OOS
Docket type Transportation
Date filed 04 Dec 2014
Action date 04 Dec 2014
Commission action Suspended

In the Matter of the Emergency Suspension of Operating Authority of Jose D. Menjivar, d/b/a Jose D. Menjivar Construction of Kansas City, Kansas, for Failure to Comply With New Entrant Safety Requirements as Required by Motor Carrier Safety Statutes, Rules and Regulations.

MOTOR CARRIERS

Docket number 15-TRAM-300-PEN
Docket type Transportation
Date filed 10 Feb 2015
Action date 10 Feb 2015
Commission action Fined

In the Matter of the Investigation of S&K Leimkuehler, Inc. of Kansas City, Kansas, Regarding the Violation(s) of the Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

MOTOR CARRIERS

Docket number 15-TRAM-358-PEN
Docket type Transportation
Date filed 03 Mar 2015
Action date 03 Mar 2015
Commission action Fined

In the Matter of the Investigation of Osage Trucking, LLC of Osage City, Kansas, Regarding the Violation(s) of the Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

MOTOR CARRIERS

Docket number 15-TRAM-374-OOS
Docket type Transportation
Date filed 03 Mar 2015
Action date 03 Mar 2015
Commission action Suspended

In the Matter of the Emergency Suspension of Operating Authority of John D. Walker of Oswego, Kansas, for Failure to Comply With New Entrant Safety Requirements as Required by Motor Carrier Safety Statutes, Rules and Regulations.

MOTOR CARRIERS

Docket number 15-TRAM-392-PEN
Docket type Transportation
Date filed 26 Mar 2015
Action date 26 Mar 2015
Commission action Fined

In the Matter of the Investigation of Eugene R. Wells and Gail R. Wells, d/b/a Wells Trucking of Garden City, Kansas, Regarding the Violation(s) of the Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.
