

2025

UTILITIES AND
COMMON CARRIERS

Serving the people of Kansas by regulating the State's energy infrastructure, oil and gas production and commercial trucking to ensure public safety.

About the Commission

Andrew J. French
Chairperson

Dwight D. Keen
Commissioner

Annie Kuether
Commissioner

The Commission consists of three members appointed by the Governor to overlapping four-year terms. No more than two members may be of the same political party. The authority of the Kansas Corporation Commission is derived from K.S.A. 74-601 to 74-631.

The Commission regulates investor-owned utilities operating in the state, the Kansas oil and gas industry and motor carrier safety. The KCC does not regulate most electric cooperatives, water cooperatives, municipalities, wireless telephone, long distance service, cable companies, or internet services.

To carry out its multi-faceted mission, the Commission is financed from assessments, registration fees, operating charges, federal funds, and other fee funding sources. The KCC does not receive funding from the state general fund.

FY2024

Business Meetings	95	3,748 Total orders issued by the Commission in FY2024.
Evidentiary Hearings	17	
Public Hearings	6	

The Commission meets bi-weekly at 10 a.m. on Tuesday and Thursday. The meeting is broadcast live on the KCC's YouTube channel. To preview the agenda in advance, sign up for meeting notifications at:

<https://kcc.ks.gov/>

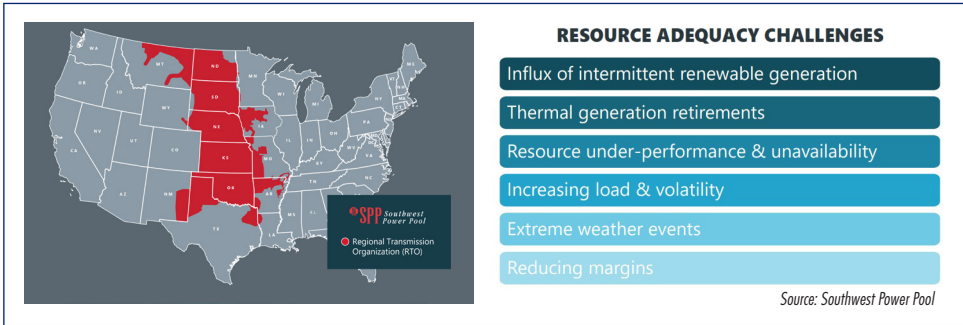

For more information, access the KCC Legislative reports at:

<https://kcc.ks.gov/commission-activity-reports-to-the-legislature/2025>

Resource planning remains critical as energy needs continue to grow

As businesses, manufacturers and other high volume electricity users announce plans to locate or expand in the State, the complex process of predicting and planning for future energy needs becomes increasingly important.

Kansas is a member of the Southwest Power Pool (SPP), along with 13 other states. SPP is a non-profit Regional Transmission Organization (RTO) regulated by the Federal Energy Regulatory Commission (FERC). SPP's role is to ensure reliable supplies of wholesale power, adequate transmission infrastructure, and competitive pricing of electricity for its members. Resource adequacy is a critical area of focus for the KCC, the SPP, and FERC.

The KCC actively engages in the SPP stakeholder process to influence sound resource adequacy policy and ensure our local utilities are effectively planning to meet their obligations. In addition, the KCC maintains an internal working group dedicated to tracking and participating on FERC & SPP issues. Chairperson French established the Resource and Energy Adequacy Leadership (REAL) team at the SPP in January 2023. The team monitors resource adequacy and anticipated challenges resulting from resource mix changes, extreme weather impacts, increased demand and evolving consumer behaviors.

Planning reserve margin increases requested

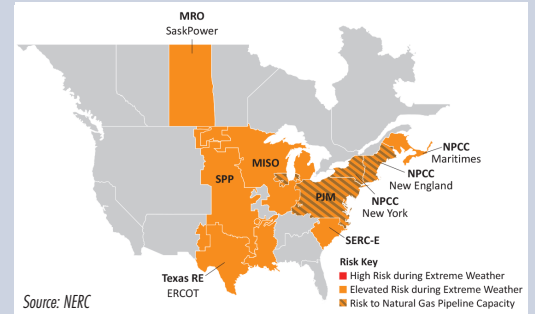

The Southwest Power Pool (SPP) Regional State Committee and Board of Directors is proposing an increase in the planning reserve margin (PRM) member utilities are required to maintain in support of regional grid reliability. PRM represents the amount of back-up power utilities must have to guard against unplanned conditions or events on the regional power grid, such as an extreme weather event. Any changes must be approved by FERC before taking effect.

The proposal calls for a new requirement of a 36% winter-season PRM and a 16% summer-season PRM to take effect in summer 2026 and winter 2026/2027. If approved, this is the first time winter and summer PRMs have been defined differently. The PRM is currently 15% (up from 12% in 2022) and applies to both winter and summer.

The chart above illustrates how summer reserves are projected to fall under the current 15% with no excess capacity if changes are not made.

NERC 2024-2025 Winter Reliability Assessment

The North American Electric Reliability Corporation's 2024–2025 Winter Reliability Assessment finds that while regulatory and industry initiatives have improved winter readiness, many parts of North America are once again at an elevated risk of energy shortfalls under extreme conditions. However, no areas are identified as having a high risk of energy shortfalls in extreme weather conditions and all areas are expected to have adequate resources under normal winter peak load conditions.

SPP confident in meeting energy needs this winter

SPP conducts an assessment each year to identify and mitigate threats to energy reliability during the winter season lasting from December to March. The analysis considers factors such as historical and predicted future electricity use, weather forecasts, the variability of available wind energy, drought conditions and generation and transmission outages. Based on its assessment results, SPP anticipates a 98.5% probability that it will have sufficient resources to meet the projected peak demand for electricity and maintain energy reserves throughout the upcoming winter season. SPP further anticipates an even greater chance that it can meet region-wide demand with the help of reserves if needed.

- Ensure sufficient and safe utility services at just rates.
- Enforce state and federal pipeline safety regulations.
- Administer Kansas Universal Service Fund (KUSF).

Utilities Electric

The Kansas Corporation Commission regulates the state’s investor-owned electric companies: Evergy, Liberty-Empire, and Southern Pioneer. The KCC also has limited jurisdiction over a number of additional electric utilities operating in the State, primarily for certification and siting of electric transmission lines.

The KCC regularly intervenes in electric matters at the Federal Energy Regulatory Commission (FERC) to protect the interests of Kansas ratepayers. The KCC also has representation in transmission matters at the Southwest Power Pool (SPP).

Regionally competitive rates remain a focus

Improving the regional competitiveness of Kansas’ electric rates is a goal shared by the Commission, the Legislature, and energy stakeholders. While the State has made great progress in the last five years, the Commission will continue to look for ways to improve regional rate competitiveness over time, where our legal authority allows, while ensuring continued access to safe, reliable electric service. As in past years, KCC staff is prepared to provide an update to the Legislature on the current status of state’s regional rate competitiveness in the first few weeks of the Legislative Session if requested.

Here are some highlights from this year’s report:

- Over the past five years, Kansas electricity rates increased in total by 0.77%, which ranks No. 49 out of 50 states during this time for the highest growth in electricity prices (No. 1 being the highest growth in prices).
- This growth in rates is slower than Arkansas (25.13%), Texas (18.38%), Minnesota (17.78%), Colorado (17.40%), Oklahoma (14.96%), Missouri (9.50%), Iowa (5.56%), and South Dakota (5.18%). Kansas electric rates grew faster than North Dakota (-9.92%).
- In 2023, average electricity rates in Kansas declined 5.80% compared to 2022. This ranks 47th out of 50 states, with No. 1 being the fastest increase in prices. Only 3 states in the country reduced electricity prices by more than Kansas in 2023. Oklahoma, Georgia, and Louisiana.
- In 2023 Kansas electricity rates were 14.81% lower than the national average (compared to 1.8% higher than national average in 2018).
- Kansas electricity rates have fallen from 15th highest in the Country in 2018 to 30th highest in 2023.

Residential Electric Bill Comparison | July 2023 to June 2024

	Company**	Customer Charge	Energy Charge	ECA**	Winter Storm Uri	Energy Efficiency Rider	Trans. Delivery Charge	Property Tax Surcharge	Tax Change Rider	Total Bill Without Tax	Cost Per KWH	Utility Bill as a % of National Average Bill	Utility Bill as a % of Kansas Wt. Avg. Powering Kansas into the future

Ensuring adequate power to serve Kansas customers is a top priority for the Commission and its Staff. Several risk factors have materialized in recent years that have the potential to disrupt the ability of the electric utility industry in Kansas to provide continuous, reliable power to customers. These issues are present throughout the Southwest Power Pool (SPP) and to varying degrees, nationwide. These factors include:

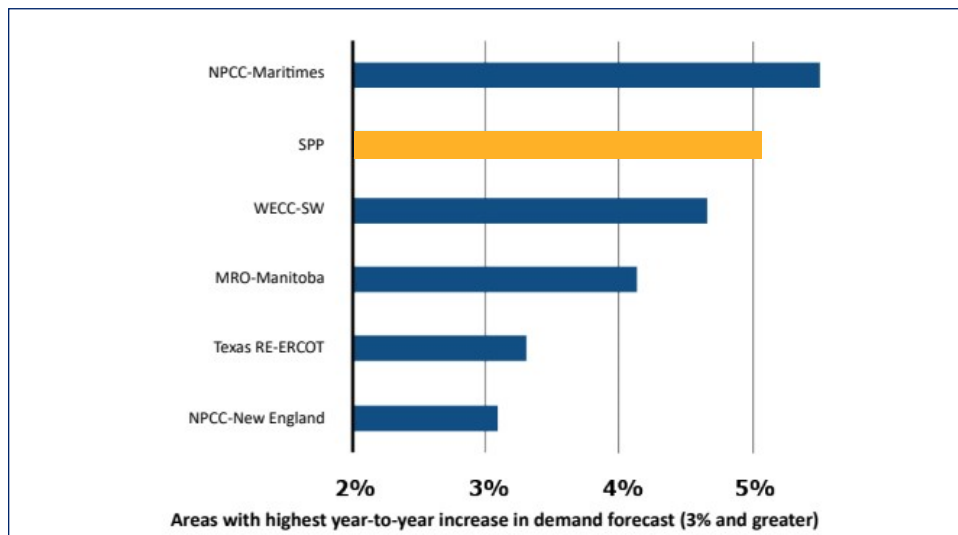

- The pace of transition away from fossil-fueled baseload generation, towards intermittent renewable resources.
- Substantial growth in peak electricity demand, driven by economic development, as well as electrification for home heating, transportation, and data center loads.
- Increasingly severe weather events.

Regulated utilities are required to file reports, known as Integrated Resource Plans (IRP), on a regular basis to share their forecasts, modeling and plans for meeting customer needs. When an IRP results in a decision to retire or add new generation, the utility can make a Predetermination filing pursuant to K.S.A. 66-1239, which allows a utility to petition the Commission for a determination of ratemaking principles and treatment to be applied prior to retiring or acquiring a stake in a generating facility.

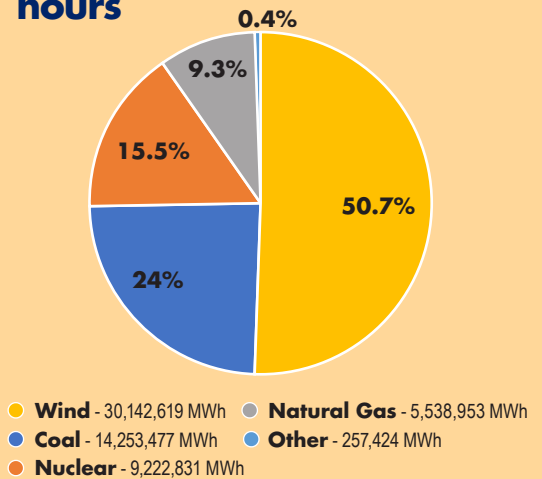

Based on anticipated needs, Evergy announced plans to build two new gas-fired generating facilities and a solar facility. The gas plants are being proposed in Reno County and Sumner County. In response to a November filing, the Commission will make a predetermination on when and how costs will be recovered and the potential impacts to ratepayers before the projects move forward. As part of the predetermination process, the Commission will consider input from intervening parties as well as the general public.

Load Growth could increase reliability risk

Rapid demand growth in many areas is further straining parts of the system. While demand has grown, over 4.5 GW of generation has been retired over the same period in the United States increasing reliability risk.

Kansas Electric Generation Sources by Total Megawatt hours

Source: U.S. Department of Energy, The Energy Information Administration (EIA) August 2023 to July 2024

Future transmission development planned

The Southwest Power Pool (SPP) continues to approve new transmission facilities to serve expected load growth, enhance reliability of the transmission system, and improve the affordability of wholesale power through the SPP Integrated Marketplace. Recently the SPP approved a \$7.7 billion portfolio of transmission projects as part of the 2024 Integrated Transmission Planning (ITP) process. This includes 89 transmission projects across the 14-state SPP region, including 3 new large 345 kV transmission projects in Kansas:

Buffalo Flats – Delaware	KS/OK	154.6 miles	\$480,090,326
Elm Creek – Tobias	KS/NE	85.2 miles	\$148,419,672
Holcomb – Sidney	KS/NE	300 miles	\$887,460,816

Resource Adequacy Series

The KCC has been proactively engaged in addressing resource adequacy challenges. The Commission conducted a series of five public workshops to explore these issues throughout 2023 and 2024. The workshops have allowed industry experts to present their views and to answer questions from the Commissioners and Commission Staff in a public setting. A link to view recordings of the workshops can be found at <https://www.kcc.ks.gov/resource-adequacy-work-study-series>.

Utilities Natural Gas & Pipeline Safety

KCC Utility Operations and Pipeline Safety staff play an important role in keeping Kansans safe in their homes and neighborhoods. They enforce federal and state pipeline safety regulations ensuring the safe operation of all gas utilities. The staff also provides technical expertise relating to electric utility operations, reliability, safety, electric transmission siting, and electric and gas consumer service, as well as analyzing requested changes to natural gas and electric certificates.

The KCC regulates three large (annual operating revenue greater than \$10 million) natural gas distribution utilities: Atmos Energy Corporation, Black Hills/ Kansas Gas Utility Co., and Kansas Gas Service, a Division of ONEOK, Inc. In addition, the Commission Staff monitors the rate and tariff activities of several interstate pipelines that serve Kansas local distribution companies, towns, and other large volume gas users.

FY2024

Pipeline Safety Penalty Orders

with **\$23,250**

in assessed fines.*

*Fines are payable to state general fund. The KCC receives no funding from the state general fund.

On-Site inspections increase compliance, safety

Pipeline safety personnel continue to conduct onsite inspections of intrastate natural gas facilities. The inspections monitor the gas systems for any areas of non-compliance with pipeline safety regulations. A typical audit will stress compliance with the operator’s management of the integrity of the pipeline delivery system including a review of emergency response plans, odorization requirements, cathodic protection, leak surveys, and operator qualification requirements.

Engineers and pipeline safety inspectors also investigate any incident where natural gas is suspected to be the cause or there is an alleged violation of the Kansas Underground Utilities Damage Prevention Act (KUUDPA). Their findings are reported to the Commission.

In calendar year 2023, the Commission acted upon 25 filings in which fines were levied to 21 excavators for failure to notify utilities prior to excavating over buried facilities. Fines were also levied to 3 utility operators for failure to provide timely or accurate locates. For the 25 cases, a total of \$31,250 in fines was levied. Kansas experienced one natural gas incident in CY 2023.

Underground Damage Prevention Statistics for CY2023

Location	Total Gas Damage Incidents	Gas Damages Investigated	Gas Locates Requested	Damages Per 1000 Locates
Johnson County	181	352	157,009	2.2
Sedgwick County	153	180	150,363	1.2
Remaining State	127	760	372,750	3.8

Safety education classes for industry professionals

The KCC hosts an annual pipeline safety seminar and participates in workshops across the state to help professionals managing pipeline operations, maintenance and emergency response learn new skills and stay up-to-date with current regulations.

KCC Telecommunications staff is responsible for administering the Kansas Universal Service Fund as well as researching, investigating, analyzing and making recommendations to the Commission on all telecommunications matters. Staff is also involved in Federal Communications Commission cases and participates on National Association of Regulatory Utility Commission (NARUC) subcommittees and Federal-State Joint Boards.

Kansas Universal Service Fund

The Kansas Universal Service Fund (KUSF) was established by the Commission in 1996, as required by the Kansas Telecommunications Act. Now in its 28th year, the KUSF continues to provide much needed services to Kansans. Those services include telephone discounts to low-income families, phone services and adaptive equipment for persons with disabilities, and network enhancements and upgrades in rural areas.

All telecommunications companies must contribute to the KUSF. Assessments are a percentage of intrastate (within Kansas) retail revenues. Companies are allowed to pass the assessment on to its customers, but not required to. Effective March 1, 2024, the current KUSF funding requirement is \$37.1 million. The carrier assessment rate is 11.69%.

FY2024

Telecom Penalty Orders with

\$3300

in assessed fines.*

*Fines are payable to state general fund. The KCC receives no funding from the state general fund.

How are KUSF dollars used?*

Enhancements/upgrades in rural areas	\$36 million
Lifeline Program	\$143,800
Kansas Relay 711	\$179,800
Telecommunications equipment program	\$269,900
Fund administration/carrier audits	\$554,500

* Annual budget effective March 1, 2024

Lifeline helps low-income Kansans stay connected

The Lifeline program connects low-income families and individuals to the services they need to access healthcare, find jobs, attend classes, stay in touch with family, and call for help in an emergency.

Those who qualify, based on income or participation in other assistance programs, receive up to \$17.02 per month in combined federal and state assistance to pay for telephone service or broadband internet. The state portion of the benefit (\$7.77) comes from the Kansas Universal Service Fund (KUSF), administered by the KCC, and may only be used on phone service. The federal discount (\$9.25) may be used on internet, bundled phone/internet or voice only phone service. Only \$5.25 of federal portion may be applied to voice only plans.

Currently, nearly 8 million Americans, including 23,000 in Kansas, are enrolled in the program. More information on income eligibility, participating providers, and the enrollment process is available on the [KCC's website](#).

- Provide regulatory oversight of motor carriers.
- Conduct audits, inspections and licensing.
- Promote safety through education.

Transportation

The role of the KCC Transportation Division is to ensure appropriate and effective regulatory oversight of motor carriers, with the goal of protecting the public interest and promoting safety through comprehensive planning, licensing, education, and inspection. Transportation Staff conducts both comprehensive and focused off-site investigations and audits on new and existing motor carriers, taking appropriate action upon discovering unsafe conditions. The staff works closely with the Kansas Highway Patrol and the Federal Motor Carrier Safety Administration to reduce crashes involving motor carriers through promotion of safety education.

Education and regulation make roads safer

On average, 940 new motor carriers take to Kansas roads each year. It's a highly regulated industry and there is a lot for a rookie to learn. Mistakes can be costly, if not deadly, if safety isn't a priority. That's why the KCC Transportation Division's mission is to educate, then regulate.

The KCC provides free and easily accessible resources to help new drivers get off to a good start.

Educational Safety Seminars

Educational Safety Seminars are conducted weekly and are available to new drivers or as a refresher to educate out of compliance motor carriers. The classes are held virtually, which provides easy access from any location. Motor carriers are notified of seminar dates at the time they apply for KCC authority. Information is also available on the KCC website and in various transportation association newsletters and websites.

Local Assistance

Local assistance is always nearby. The KCC employs a team of Special Investigators (SIs) located in assigned regions throughout the state. The SIs teach at safety seminars, conduct roadside inspections, and provide assistance and answer questions for motor carriers in their area. Investigators are located in Concordia, Colby, Garden City, Hutchinson, Kansas City, Parsons, Lawrence, La Crosse, Paola, Topeka and Wichita. Contact information for each location can be found [here](#).

Kansas Trucking Regulatory Assistance Network

The Kansas Trucking Regulatory Assistance Network (KTRAN), an online tool launched in 2017, benefits new and veteran drivers. One aspect of the site that is helpful to those entering the business is the Wizard. After answering a series of questions related to their potential operation, the Wizard provides a customized checklist of the laws that apply, required registrations and estimated costs. For those already operating, KTRAN helps keep track of applicable state and federal laws and regulations to maintain compliance.

KTRAN - Kansas Trucking Regulatory Assistance Network

KTRAN, an online tool launched by the KCC in 2017, benefits the industry and regulators alike. Motor carriers have the ability to view and manage their operating authority, driver waiver and UCR registration 24/7. They also receive messages, emails and timely alerts. Regulators and law enforcement have access to the database to help ensure safety compliance leading to safer roadways for the motoring public.

Kansas continues to be a top performer nationally in UCR compliance

Kansas has been the top performer in Unified Carrier Registrations (UCR) among 41 participating states since the program’s inception in 2007. The KCC Transportation Division reports that 99.15% of the state’s motor carriers met Unified Carrier Registration (UCR) requirements for 2023. The national average was 94.12%.

The UCR fees collected fund safety education and motor carrier enforcement efforts. Those efforts are paying off. When comparing ten similarly situated Midwest states, Kansas has the third lowest percentage of CMVs and Carriers involved in crashes over the past three years.

Truckers against trafficking

Since 2016, the KCC has partnered with the Attorney General’s Office, Kansas Highway Patrol (KHP), Kansas Motor Carriers Association (KMCA) and Truckers Against Trafficking (TAT) to provide training in identifying and reporting suspected human trafficking as part of the motor carrier safety seminars. To date, more than 6,000 Kansas motor carrier representatives have received the training. In 2018, Kansas joined a growing number of states that require the one-time training to receive or renew a Commercial Drivers License.

Public Affairs & Consumer Protection

The KCC Office of Public Affairs and Consumer Protection (PACP) supports the core mission of the agency by educating and protecting the general public on regulatory issues. PACP staff assists Kansas utility customers when they have questions or need help in resolving a service or billing issue with a regulated utility. In addition, the staff provides information about assistance programs and encourages community involvement and input through public hearings and comment sessions on matters important to Kansans.

Community outreach plays an important role

Public input is an important part of the regulatory process. PACP plans and promotes public hearings and comment periods on issues important to Kansas ratepayers, giving them a forum to share their opinions and get more information. In FY2024, six public hearings were held in various locations throughout the state. Rate change requests from utilities are the most common matters discussed at public hearings. However, public meetings are also held on some types of transmission line siting projects.

Kansas Gas Service customers attended a public hearing on June 13 to learn more about the company's rate increase application and express their opinions on the matter to the Commission.

Public Hearings may be held in-person, virtually (offering members of the public an opportunity to be an active participant from home) or a combination offering both options. For those that prefer to watch without participating, livestreaming and recordings are available for online viewing on the KCC YouTube channel.

In addition to public hearings, the Commission offers many convenient ways for the Kansans to submit a public comment on rate cases and other dockets with comment periods – online, email, via letter or a phone call to the Public Affairs office. In FY2024, PACP documented 3924 public comments related to Commission dockets.

Identifying needs and making referrals

PACP staff is instrumental in making Kansans aware of programs and services available to help them. Explaining the protections offered by the Cold Weather Rule, phone and internet discounts offered by the Lifeline program, and making referrals to public assistance agencies are just a few examples.

Stay Warm. Stay Connected.

Cold Weather Rule
November 1 – March 31

The Cold Weather Rule is designed to keep your utilities connected during the winter months, even when you're unable to pay your bill in full. Contact your utility company to see if you qualify to make payment arrangements under the Cold Weather Rule.

Lifeline

Lifeline connects eligible low-income families and individuals to the services they need to live, learn, work and participate fully in their communities. Federal and state discounts of up to **\$17.02** per month on phone or internet services are available.

Eligible Services
Residential phone service | Wireless phone service | Broadband internet

We're here to help! Utility Assistance Programs

Check our state-wide resource guide for organizations in your area that offer financial assistance with utility bills or upgrading your home to be more energy efficient.

Advocating for Kansas Customers

Consumers from all parts of the state turn to the KCC for help with utility issues. Our Public Affairs staff answers consumer questions, investigates complaints, and works to reduce the amount of time it takes to resolve disputes between the customer and the utility. Nearly 80% of complaints worked are resolved in one day.

Utilities Overview

The Utilities Division is responsible for administering the laws and regulations applicable to jurisdictional electric, natural gas, telephone, and water utilities. The Utilities Division is comprised of four sections that are responsible for providing recommendations and advice to the Commission to promote and ensure sufficient, efficient, and safe utility services at reasonable and non-discriminatory rates to consumers.

The four sections within the Utilities Division are Accounting and Financial Analysis, Economics and Rates, Energy Operations and Pipeline Safety, and Telecommunications. These sections are responsible for the following:

1. The Accounting and Financial Analysis section is responsible for investigating, analyzing and making recommendations to the Commission on accounting and financial issues relating to the electric, natural gas, telecommunication, and water industries. These issues include the development of a revenue requirement for rate cases and KUSF audits as well as yearly surcharge filings. The section is also involved in Federal Energy Regulatory Commission (FERC) cases and participating in Southwest Power Pool work groups.
2. The Economic Policy and Rates section is responsible for investigating and making recommendations on economic issues relating to the natural gas, electric, and telecommunications industries to the Commission as well as the Kansas Legislature and other state agencies. In rate cases, this section is also responsible for evaluating the class cost of service and developing a rate design.
3. The Energy Operations and Pipeline Safety section provides technical expertise relating to electric utility operations, reliability, safety, electric transmission siting, and electric and gas consumer service, as well as analyzing requested changes to natural gas and electric certificates. The section has primary responsibility to ensure safe operation of all gas utilities through enforcement of federal and state pipeline safety regulations. The section also has the responsibility to ensure the safe operation of electric utilities under the provisions of K.S.A. 66-101h.
4. The Telecommunications section is responsible for researching, investigating, analyzing, and making recommendations on courses of action for all telecommunications matters that come before the Commission. This section is also involved in Federal Communications Commission cases and participating on National Association of Regulatory Commissioners (NARUC) subcommittees and Federal-State Joint Boards.

Major Issues for FY2024

REGIONALLY COMPETITIVE ELECTRIC RATES

- During the 2021 Legislative session, several Kansas energy stakeholders (Kansas Industrial Consumers Group, Kansans for Lower Electric Rates, Citizens' Utility Ratepayer Board, Kansas Municipal Utilities, Kansas Electric Power Cooperative, and Evergy) were able to collaborate and agree on a process to monitor Kansas' electric rates for regional competitiveness. This agreement was reached on March 11, 2021, and called for Staff to present a report to the Senate Utilities Committee during the first few weeks of the 2022 through 2024 Legislative Sessions. The states of Kansas, Colorado, Missouri, Oklahoma, Arkansas, Iowa, Minnesota, North Dakota, South Dakota, and Texas were agreed to be the peer group by which regional rate competitiveness would be measured using agreed-upon metrics. The following information was to be reported:

- All of the data will be sourced from the Energy Information Administration (EIA). Specifically, Tables 6, 7, and 8—released around October of every year for the previous year's data.

- The regional electricity rate comparison would consist of the following: average residential, industrial, and commercial electricity rate for each Investor Owned Utility operating in these states, as reported by the EIA.

- The average monthly electric bill for residential customers for each Investor Owned Utility operating in these states, as reported by the EIA.

- The statewide average electricity rate for cooperative utilities in each of the states, presented for residential, commercial, and industrial customers as reported by the EIA.

- The statewide average electricity rate for municipal utilities in each of the states, presented for residential, commercial, and industrial customers are reported by the EIA.

- The statewide average electricity rate for all consumers across all utility types for each state.

- Last year's report was presented on January 25, 2024, to the Senate Utilities Committee and can be viewed here: <https://www.youtube.com/watch?v=fv5Q4KgP870>

- The presentation materials from last year's report can be found here: https://www.kcc.ks.gov/images/PDFs/presentations-and-legislative-testimony/2024_0125_KCC_CompElecRates.pdf

• While the agreement to accumulate and present this data each year ended with the 2024 Legislative Session, Staff stands ready to provide a presentation to the Legislature to provide an update on Kansas' regional rate competitiveness if desired. Some highlights from this year's report are as follows:

- Over the last five years, Kansas electricity rates increased in total by 0.77%, which ranks No. 49 out of 50 states during this time for the highest growth in electricity prices (No. 1 being the highest growth in prices).

- This growth in rates is slower than

Arkansas (25.13%), Texas (18.38%), Minnesota (17.78%), Colorado (17.40%), Oklahoma (14.96%), Missouri (9.50%), Iowa (5.56%), and South Dakota (5.18%). Kansas electric rates grew faster than North Dakota (-9.92%).

- In 2023, average electricity rates in Kansas declined 5.80% compared to 2022. This ranks 47th out of 50 states, with No. 1 being the fastest increase in prices. Only 3 states in the country reduced electricity prices by more than Kansas in 2023: Oklahoma, Georgia, and Louisiana.

- In 2023, Kansas electricity rates were 14.81% lower than the national average (compared to 1.8% higher than national average in 2018).

- Kansas electricity rates have fallen from 15th highest in the Country in 2018 to 30th highest in 2023.

- The Average Peer State rate from 2018 to 2023 grew by 11.42%, less than the U.S. Average of 20.42%. Average Kansas rates grew by 0.77% during this period.

- The Average Peer State rates from 2022 to 2023 declined by 0.96%. Average Kansas rates declined 5.80% last year.

• The Commission supports the shared goal of improving the regional competitiveness of Kansas' electric rates over time, where our legal authority allows. While the State has made great progress in improving regional rate competitiveness in the last five years, the Commission will continue to look for ways to make Kansas' electric rates more competitive, while ensuring that Kansans continue to have access to safe, reliable electric service.

ELEVATED CAPITAL INVESTMENT

• 41 Edison Electric Institute members have adopted a net-zero carbon emissions target by 2050 or sooner. This movement has been driven by both environmental concerns about greenhouse gasses emitted by fossil-fuel generation sources as well as the significant decline in the all-in cost of energy production from renewable

generation sources. In addition, many major banks, investment firms, and rating agencies have adopted policies designed to limit their exposure to risk associated with utilities that have coal-fired generation. This movement has the potential to drive significant capital investment to replace existing generation assets much sooner than the current net-zero carbon emissions target date of 2050. The timing of any retirement of existing generation, what generation technology will be used to replace any retired assets, and the ultimate rate impact of these decisions continues to be evaluated in Integrated Resource Planning (IRP) Dockets before the Commission. When an IRP results in a decision to retire or add new generation, that typically results in a Predetermination proceedings filed with the Commission pursuant to K.S.A. 66-1239.

• Another issue becoming prevalent in the electric utility industry is hardening, and in some case replacing, the aging distribution network of electric utilities to improve both reliability and resiliency and to set the stage for what many view is the coming surge in electric vehicle adoption. The aging distribution network of the Kansas-jurisdictional electric utilities is an issue that has long been discussed at the Commission, and this issue is likely to be a major driver of additional capital investment in Kansas in years to come.

• The Southwest Power Pool (SPP) continues to approve new transmission facilities to serve expected load growth, enhance reliability of the transmission system, and improve the affordability of wholesale power through the SPP Integrated Marketplace. Recently the SPP approved a \$7.7 billion portfolio of transmission projects as part of the 2024 Integrated Transmission Planning (ITP) process. This includes 89 transmission projects across the 14-state SPP region, as well as 3 new large 345 kV transmission projects in Kansas. While these transmission projects are capital intensive, and will place upward pressure on utility rates, they are also expected to increase reliability of electric power (including during extreme winter weather events) and to produce corresponding

reductions in fuel and purchased power costs for customers. SPP projects an 8-to-1 Benefit to Cost ratio for this transmission portfolio. The 2024 ITP Report can be found here: <https://spp.org/documents/72605/2024%20itp%20report%20draft%20v0.6.pdf>

- Investor-owned natural gas distribution utilities in Kansas are facing aging infrastructure, some of which is constructed of materials that are considered to be obsolete or that present a safety risk. This has led to these gas utilities placing an increased emphasis on accelerating the rate of replacement of aging infrastructure. This effort has also increased capital expenditures levels and led to more frequent general rate cases. Senate Bill 279 took effect January 1, 2019, and amended K.S.A. 66-2202, 66-2203, and 66-2204. This bill expanded the definition of eligible capital investments that are recoverable through the Gas System Reliability Surcharge (GSRS) and doubled the size limitations previously in effect for the GSRS. With these revisions, gas utilities in the state will be able to file for Commission approval of an annual cost recovery mechanism to recover up to \$.80 per month, per residential customer, in new revenues each year. This surcharge may recover up to 20% of a company's currently approved base revenue level. The surcharge may only be in effect for five years (with an additional year extension available upon Commission approval) until a rate case must be filed in order for the utility to regain eligibility to file for a new GSRS surcharge.

- Telecommunications companies are continuing to invest in new technologies, primarily to enhance broadband services. The investment in broadband services is generally driven by the FCC's National Broadband Plan, which has a goal of supporting the provision of broadband communications in areas that would be unserved or underserved without such support. However, the continued investment in new technologies should not increase the size of the KUSF. The 2013 Kansas Legislature passed House Bill 2201, which modified K.S.A. 66-2008. K.S.A. 66-2008, as revised, caps

the KUSF at \$30 million for rate of return regulated carriers, caps support for price cap regulated carriers, eliminates KUSF support for electing carriers, and phased out KUSF support for competitive eligible telecommunications carriers.

RISKS TO ELECTRIC RELIABILITY IN KANSAS AND SOUTHWEST POWER POOL

- Several risk factors have materialized over the last several years that have the potential to disrupt the ability of the electric utility industry in Kansas to provide continuous, reliable power to customers. These issues are present throughout the SPP and to varying degrees, nationwide. A non-exhaustive list of these factors is as follows:

- The pace of transition away from fossil-fueled baseload generation, towards intermittent renewable resources;
- Substantial growth in peak electricity demand, driven by economic development, as well as electrification for home heating, transportation, and data center loads; and
- Increasingly severe weather events.

These risks have been highlighted in recent National Electric Reliability Corporation (NERC) publications, including the 2023 Long Term Reliability Assessment, found here:

https://www.nerc.com/pa/RAPA/ra/Reliability%20Assessments%20DL/NERC_LTRA_2023.pdf

The NERC 2024 Summer Reliability Assessment can be found here:

https://www.nerc.com/pa/RAPA/ra/Reliability%20Assessments%20DL/NERC_SRA_2024.pdf

For the last few years, SPP has reported declining capacity reserve margins (the amount of capacity over and above the anticipated level needed to serve peak load). SPP's recent Summer 2024 Resource Adequacy (RA) report shows a capacity reserve margin of 20% in 2024, falling to a level of 10.5% by 2027, below the required level to maintain the industry standard (and FERC

required) 1-day-in-10-year reliability standard. The 2024 RA report can be found here: <https://www.spp.org/documents/71804/2024%20spp%20june%20resource%20adequacy%20report.pdf>

The Commission has been actively monitoring these issues, and has devoted substantial time and resources to address these resource adequacy challenges both at the KCC and the SPP. As one example, Chairperson French established the Resource and Energy Adequacy Leadership (REAL) team at the SPP in January 2023. The link for this organizational group can be found here:

<https://www.spp.org/stakeholder-groups-list/organizational-groups/regional-state-committee/resource-and-energy-adequacy-leadership-team/>

The purpose of the REAL team is as follows:

The REAL team shall assess SPP's current resource adequacy construct and anticipated challenges resulting from resource mix changes, extreme weather impacts, increased demand and evolving consumer behaviors. REAL shall provide guidance, prioritization, and policy recommendations needed to increase assurance that energy can be continuously and cost-effectively provided within the SPP Balancing Authority Area (BAA). The team shall address applicable recommendations from the Future Grid Strategy Advisory Group and initiatives identified in the SPP Resource Adequacy roadmap.

The REAL team is actively working to address these resource adequacy challenges, and the SPP Board has recently approved several policies that will strengthen the reliability of the SPP region when implemented. This includes the establishment of a Performance Based Accreditation (PBA) standard for conventional generation, Effective Load Carrying Capability (ELCC) accreditation standard for renewable generation, an improved Outage Coordination Policy, an improved Availability Policy, a Winter Resource

Adequacy requirement, a new 36% Winter Planning Reserve Margin (PRM) requirement, an increased 16% Summer PRM, and a new Fuel Assurance requirement for conventional generation sources. Many of these initiatives are currently pending before FERC, with binding compliance dates of Summer 2026/Winter 2027.

During FY2024, the KCC remained active in the SPP stakeholder processes to support Resource and Energy Adequacy in Kansas and throughout the SPP region. In addition, the KCC has performed a series of five workshops to explore these issues throughout 2023 and 2024 in a public setting. These workshops have allowed industry experts to present their views and to answer questions from the Commissioners and Commission Staff. A link to this series of workshops can be found here: <https://www.kcc.ks.gov/resource-adequacy-work-study-series>

Electric

OVERVIEW

The KCC regulates nine large (annual operating revenue greater than \$10 million) electric utilities. A list of the large electric utilities and a brief overview of the major activities for FY2024 are noted below. A summary of each major docket associated with the companies follows this narrative section along with a listing of all other electric dockets. Also included in this narrative section is a discussion of the Federal Energy Regulatory Commission (FERC) activity and transmission issues that the Utilities Division spent a significant amount of time on during FY2024.

LARGE ELECTRIC UTILITY COMPANIES

(Annual operating revenue greater than \$10M)

Empire District Electric Company

Evergy Metro (formerly Kansas City Power & Light Company)

Southern Pioneer Electric Company

Sunflower Electric Power

Corporation (Limited per K.S.A. 66-104d)

Evergy Kansas Central (formerly Westar Energy Inc.)

Wheatland Electric Cooperative, Inc.

Prairie Wind Transmission, LLC (Transmission Only)

Midwest Energy, Inc. (Limited per K.S.A. 66-104d)

ITC Great Plains, LLC (Transmission Only)

There were no major electric utility rate cases in FY2024. However, in FY2024, the Commission issued an Order approving the Stipulation and Agreement (Settlement Agreement) filed in Evergy Kansas Central and Evergy Kansas Metro rate case. The Commission also reviewed a Southern Pioneer Electric Company (Southern Pioneer) Formula Based Rate (FBR) adjustment filing for Southern Pioneer's retail and wholesale Local Access Charge rates in Docket No. 24-SPEE-688-RTS and a filing for the modification of Southern Pioneer's rate design in Docket No. 24-SPEE-415-TAR.

SUMMARY FOR EVERGY RATE CASE (UPDATE FROM FY2023)

On April 25, 2023, Evergy, Inc. filed a rate case for Evergy Kansas Central, Inc., (formerly Westar Energy) and Evergy Kansas Metro (formerly Kansas City Power and Light Company). Evergy's rate case requested a \$278.9 million increase in base rate revenues for EKC, or \$204.2 million (9.77%) net of other surcharge reductions. For EKM, Evergy requested an increase of \$25.1 million, or \$14.2 million net of surcharge reductions (1.95%). The Parties to this Docket submitted a Unanimous Settlement Agreement agreeing to a base rate increase of \$148.8 million for EKC, which equates to a net impact of \$74 million (+3.54%) after the rebasing of the RECA and PTS, and a base rate reduction of \$22 million, which equates to a net rate decrease of \$32.9 million (-4.53%) after the rebasing of the PTS, for EKM. The Commission issued an order approving the Settlement Agreement on November 21, 2023.

SUMMARY OF SOUTHERN PIONEER RATE CASE AND RATE DESIGN PROCEEDINGS

On November 30, 2023, Southern Pioneer filed an Application requesting to make certain revenue neutral changes to its rate design in Docket No. 24-SPEE-415-RTS (24-415 Docket). On May 1, 2024, Southern Pioneer filed its annual request to increase its retail rates by \$914,833 and wholesale rate of \$4.34 per kW for its Local Access Delivery Service (LADS) through its FBR mechanism in Docket No. 24-SPEE-688-RTS (24-688 Docket). In addition, Southern Pioneer requested that the changes to its cost of service and rate design in the 24-415 Docket be implemented concurrently with its request to increase its retail and wholesale rates in the 24-688 Docket.

On July 30, 2024, the Commission issued an Order approving its requested adjustments to increase Southern Pioneer's retail rates by \$840,462 and its LADS rate of \$4.34/kW in the 24-688 Docket. The Commission also issued an Order on its cost of service and rate design studies in the 24-415 Docket on July 30, 2024. In the Order, the Commission approved the Unanimous Partial Settlement Agreement in its entirety, which included the following provisions:

- (1) Southern Pioneer's mandatory three-part rate structure for Residential and General Service Small customers;
- (2) Southern Pioneer's proposed \$3.00 per kW Demand Charge for Residential and General Service Small customers;
- (3) Southern Pioneer's proposal to increase the Residential Customer charge by \$16.67.

Finally, the Commission approved Southern Pioneer's request to utilize the rate design contained in the Settlement Agreement in the 24-415 Docket, when implementing the retail rate increase included in the 24-688 Docket.

FEDERAL ISSUES

The KCC intervened or participated in several electric matters at the FERC during FY2024.

FERC Rulemaking Dockets:

• RM22-14: FERC Order No. 2023 (Order 2023) Generator Interconnection Agreements:

FERC issued its final Notice of Public Rulemaking (NOPR) regarding improvements in Generator Interconnection procedures on July 27, 2023. The final rule incorporated several areas of reforms that were open for public comment in its Notice of Public Rulemaking Docket No. RM 22-14 in 2022. The primary reforms in Order 2023 include:

- A shift from a serial first come, first served study process to a first-ready, first-served where transmission providers perform interconnection studies for a large number of projects, rather than separate studies for each individual interconnection request. Multiple RTOs/ISOs have or are in the process of shifting to such a cluster process.
- Greater transparency and public information on available interconnection capacity by location (such as a heatmap) to reduce the uncertainty faced by interconnection customers.
- Interconnection customer payment of commercial readiness deposits that increase as the interconnection process proceeds, and are based on network upgrade costs in later stages.
- Penalties for withdrawal from the queue that increase in amount as projects proceed through the queue process.
- Elimination of the “reasonable efforts standard” for the completion of studies with transmission providers subject to penalties when studies are not completed on time, ranging from \$1,000 to \$2,500 per day depending upon the type of study.
- Standardization of the affected system study agreement to minimize disputes and delays in such studies, which examine the impact of proposed interconnection requests on

neighboring transmission systems and are often the cause of interconnection delays.

- Allowing more than one generating facility to co-locate on a shared site and provide access to the use of surplus interconnection.
- At the request of the interconnection customer, require transmission providers to use operating assumptions in the studies that reflect the proposed charging behavior of electric storage resources (such as whether it will charge during times of peak load).
- Require transmission providers to evaluate a specified list of alternative transmission technologies in the interconnection studies, including advanced conductor, and to explain the results of this evaluation.
- As stated in the Order, Transmission operator’s compliance filings were required within 90 days of publication.

SPP STAKEHOLDER PROCESS

The KCC participates in SPP’s stakeholder processes concerning any compliance filing(s) as they worked through various workgroups at SPP.

On March 21, 2024, FERC issued an Order No. 2023-A that addresses arguments raised on rehearing, sets aside, in part, and clarifies Order No. 2023, which amended the Commission’s regulations of its Large Generator Interconnection Agreement, Small Generator Interconnection Procedures and Small Generator Interconnection Agreement to address interconnection queue backlogs, improve certainty, and prevent undue discrimination for new technologies.

On May 20, 2024, the Southwest Power Pool filed a Petition for Review in the U.S. Court of Appeals for the DC Circuit, regarding FERC’s Order No. 2023-A under RM22-14. On August 20, 2024, FERC issued an Errata Order No. 2023-A to address issues raised under Appeal.

• RM21-17: FERC Advanced NOPR on Long-term Transmission Scenario

planning was issued on July 15, 2021.

- The KCC intervened on October 12, 2021, and submitted multiple sets of comments over the course of the proceeding. Commissioner Keen submitted comments in response to the proposal on August 18, 2022, discussing some of the problematic aspects of the proposal.
- On August 23, 2022, the KCC filed comments that (1) expressed disappointment with FERC’s decision not to pursue reforms relating to interregional transmission planning, and (2) provide input on several discrete questions and topics implicated by the scenario-planning proposal.
- FERC issued its final rule Order No. 1920 on May 31, 2024, adopting requirements for transmission providers to engage in long-term scenario planning. Requests for rehearing have been denied by operation of law on July 15, 2024, and petitions for review have been submitted to nine different circuits. The United States panel on Multi-District Litigation has yet to complete the lottery that will determine, at random, which circuit will hear the appeals.
- FERC Order No. 1920 was published in the Federal Register on June 11, 2024, making the rule effective on August 12, 2024, and puts the compliance filing deadline on June 12, 2025.
- RM18-9 – FERC Order No. 2222 (Order 2222) Notice of Final Rulemaking in Order 2222 on Distributed Energy Resources (DER) in April of 2021. DER are any resources located on the distribution system or behind the meter. DER is a broad definition that can include decentralized, modular, and more flexible technologies. These systems provide energy, capacity and other ancillary services.
- Order 2222 was issued on September 17, 2020, and it removed barriers to the participation of DER aggregations in the capacity, energy, and ancillary service markets operated by Regional

Transmission Organizations (e.g. the Southwest Power Pool or SPP). RTO/ISO's must amend their tariffs to allow DER aggregators to participate in their markets. RTO's have until spring 2022 to implement the changes required in Order 2222. The Commission has intervened in this docket at FERC and submitted comments, largely focusing on the need to respect principles of cooperative federalism and state jurisdiction. Staff actively participated in the stakeholder process at SPP.

- In Docket ER22-1697: SPP issued its Compliance tariff filing on April 28, 2022 for Order 2222. On March 1, 2024, FERC accepted SPP's compliance filing, subject to a further compliance filing and informational report to provide an update on the implementation timeline milestones. In its March 1 Order, FERC found that SPP did not demonstrate that it complied with the location requirements of Order 2222 for distributed energy resources to participate in aggregation as geographically broad as technically feasible. FERC directed SPP to file a further compliance filing to either: (1) provide a detailed technical explanation to demonstrate that it is not technically feasible for DERs to aggregate more broadly than a single-node, as proposed; or (2) propose alternative locational requirements that are as geographically broad as technically feasible, as well as a detailed technical explanation for the geographic scope of the alternative locational requirement.

As discussed, FERC requested additional data from SPP to submit responses and answers to the filing throughout 2023 and 2024. SPP has filed for time extensions to thoroughly respond to FERC's requests. Most recently, SPP filed a motion on June 28, 2024, requesting an extension of time to submit its compliance filing on December 26, 2024. On July 11, 2024, FERC authorized the time extension requested by SPP. Currently, there is one company, Voltus, in Kansas operating as a DER. Voltus issued Comments regarding SPP's Dual Participation Rule,

beginning in 2022.

FERC DOCKETS INVOLVING KANSAS-JURISDICTIONAL UTILITIES IN FY2024

• ER22-1657, ER23-1762, ER23-1764, ER23-1820 - Following the disallowance of amortized costs of unapproved regulatory assets in EL21-18, Evergy Kansas Central (Evergy) filed this Section 205 application to obtain approval of multiple regulatory assets in its transmission formula rate and generation formula rates. The KCC filed a doc-less notice of intervention on May 6, 2022.

In an October 3, 2022 order, FERC accepted the filing subject to hearing procedures. It held those procedures in abeyance pending the outcome of settlement judge procedures.

After several settlement conferences were scheduled without resolve, an impasse was declared and FERC terminated Settlement Judge Procedures and approved a Procedural Schedule and Hearing rules, set for early 2024. Following the declaration of an impasse, FERC Trial Staff and the KCC submitted a joint settlement offer to resolve the issue prior to litigation. Evergy, the Kansas Electric Power Cooperative (KEPCo), the KCC, and Trial Staff reopened negotiation between the parties that led to the filing of a Settlement Agreement on January 26, 2024. Per the terms of the Agreement, Evergy would recover a "black box" settlement amount of \$1 million in generation and transmission revenues over a six-year recovery period. FERC approved the Settlement Agreement on April 4, 2024.

SOUTHWEST POWER POOL

The Southwest Power Pool (SPP) was approved as a Regional Transmission Organization (RTO) by the Federal Energy Regulatory Commission (FERC) in 2004 and is, therefore, required to ensure reliable supplies of wholesale power, adequate transmission infrastructure, and competitive wholesale pricing of electricity. SPP is a non-profit corporation organized under the laws of the State of Arkansas and regulated by the FERC.

SPP is also a regulated public utility in Kansas, having obtained from the Commission a limited Certificate of Convenience and Authority to manage and coordinate use of certain transmission facilities and to develop an energy imbalance market. Simultaneously, the Commission authorized the existing electric public utilities in Kansas to transfer functional control of transmission facilities to SPP and to participate in an SPP energy imbalance market.

When SPP became an RTO, it had 131 employees and 48 members including 28 (58% of membership) investor-owned utilities, municipal systems, generation and transmission cooperatives and state authorities who served retail loads in parts of eight states (Arkansas, Kansas, Louisiana, Mississippi, Missouri, New Mexico, Oklahoma, and Texas). Three Nebraska public power utilities became members of SPP in 2008. On October 1, 2015, SPP membership expanded to include the Integrated Transmission System consisting of a portion of the Western Area Power Administration, Basin Electric Cooperative and the Heartland Consumers Power District. This integration, while contested by the KCC at FERC because of cost allocation concerns, added 5,000 MW of peak demand and 7,600 MW of generating capacity to SPP's system. In 2019, SPP launched the first of its Western Energy Services, Western Reliability Coordination, followed by operating the Western Resource Adequacy Program for the Western Power Pool in 2020 and adding the Western Energy Imbalance Services Market in 2021 thereby expanding its service territory to encompass parts of 23 states or provinces. SPP currently has around 800 employees and 117 members directly or indirectly responsible for serving 19 million people in the 17 states that exclude the Western Energy Imbalance Services Market, 552,000-square-mile region, including more than 72,000 miles of high-voltage transmission lines. By FERC approved tariff, SPP's administrative costs are recovered from

load throughout the 15 state region, at a rate not to exceed \$.515 (cents) per MWh.

Commission interaction with the SPP and participation in RTO matters is authorized by K.S.A. 74-633 and K.S.A. 66-106. The SPP organization has created approximately thirty primary working groups/committees, as well as multiple subordinate task forces. The Commission is represented by one KCC Commissioner on the Regional State Committee (RSC), which consists of one regulator or other state representative from each of the load-serving states in the SPP. The Cost Allocation Working Group reports to the RSC and is composed of one voting staff member from each of the states, along with other state staff participants. The RSC fulfills an advisory role in SPP and does not “approve” any transmission projects. Its participation in the SPP process is mostly limited to providing collective state regulatory agency input and participation, as stated in the RSC By-Laws. However, the RSC does have authority over specific areas within SPP, including cost allocation methodologies and resource adequacy policies. For example, the RSC designed the original cost allocation methodology for committing retail ratepayer funds for construction of new transmission projects and has revised the methodology from time-to-time. The RSC has no responsibility in approving transmission projects or their associated costs. Approval of specific transmission projects and their associated costs are ultimately approved for construction by the SPP Board of Directors. Thus, the KCC has no direct oversight through its SPP involvement over the amount of spending for Kansas-specific or regional transmission projects, which makes it imperative that the Commission be represented in a liaison capacity on multiple SPP stakeholder committees and task forces.

In March 2022, SPP and the Mid-Continent Independent System Operator (MISO) released the results of their collaborative study that originated in 2020. Referred to as the Joint Targeted Interconnection Queue (JTIQ)

study, its purpose was to identify transmission projects required to address the significant transmission limitations restricting the opportunity to interconnect new generating resources near the MISO-SPP seam. The study initially identified a seven-project JTIQ Portfolio with a planning level estimated cost of \$1.65 billion. In addition to substantial reliability benefits, economic analysis conducted by the SPP and MISO show customers can anticipate an Adjusted Production Cost (APC) benefit of \$724 million in the MISO footprint and \$247 million in the SPP region. When two of the projects were later determined to be eligible for MISO’s long-range transmission plan funding and removed from the JTIQ portfolio, the estimated cost dropped to \$1.06 billion with APC benefits for MISO and SPP valued at \$55.7 million and \$132.9 million, respectively. The JTIQ proposal received approval in robust stakeholder processes in both SPP and MISO, including the SPP RSC and its advisory Cost Allocation Working Group. In May 2023, through the Minnesota Department of Commerce, SPP and MISO made application to the Department of Energy’s Grid Resilience and Innovative Partnership Program (GRIP) for federal funding to support the JTIQ projects. On October 18, 2023, DOE awarded \$464 million in GRIP funding to the JTIQ projects.

In 2024, SPP and MISO continued development of the JTIQ process, including developing tariff language and seeking approval of the JTIQ Report and cost allocation policies through the various working groups at SPP. The RSC and SPP Board both approved the JTIQ tariff revisions and cost allocation policies in June 2024. SPP and MISO both filed for approval of the JTIQ Report, Tariff, and Cost Allocation at FERC in August of 2024. It remains pending in Docket No. ER24-2825.

Chair Andrew French, the Kansas RSC member, was instrumental in creating the Resource Energy and Adequacy Leadership (REAL) Team, an RSC subgroup composed of SPP

stakeholders, board members, RSC and CAWG members. The purpose of the REAL Team is to assess SPP’s current resource adequacy construct and to anticipate challenges resulting from resource mix changes, extreme weather impacts, increased demand, and evolving consumer behaviors. REAL Team’s charge is also to provide guidance, prioritization, and policy recommendations needed to increase assurance that sufficient energy to meet load requirements can be continuously and cost-effectively provided within the SPP Balancing Authority Area (BAA). The team is also to address applicable recommendations from the Future Grid Strategy Advisory Group and initiatives identified in the SPP Resource Adequacy roadmap.

TRANSMISSION PLANNING AND CONSTRUCTION

Since its inception as an RTO, the SPP has planned and approved more than \$12.2 billion in new transmission projects. The total ATRR for region-wide transmission projects is \$567 million as of October 2024. This represents annual capital cost recovery, operation and maintenance (O&M), and other transmission related expenses for regional projects that are in-service. These revenue requirements are recovered through FERC-approved Transmission Formula Rates (TFR), FERC-approved stated rates, or, in some cases, state approved TFRs. The current annual cost to Kansas ratepayers is approximately 16.5% of the annual transmission revenue requirement for the region, or \$94 million. The amount of expected transmission investment is currently expected to grow by approximately \$2.1 billion for the entire SPP footprint in the next three years as new SPP-approved projects come in to service. These projects are expected to come into service during the years 2025 through 2027.

Grain Belt Express

Clean Line Energy Partners (Clean Line) was certificated as a public utility by the Commission in December 2011. Clean Line subsequently filed a line siting

application for the Grain Belt Express Clean Line Project and this project was approved by the Commission on November 7, 2013. On November 9, 2018, Clean Line entered into a purchase agreement to sell the Grain Belt Express assets to Invenergy Transmission LLC. The assets primarily consist of a proposed ±600 kilo-volt (kV), high voltage direct current (HVDC) transmission line along with associated facilities capable of delivering 5,000 megawatts (MW) of power from Kansas to load centers east of Kansas. The project will originate in western Kansas near Sunflower's Spearville substation and traverse east across the state into Missouri where it will interconnect in the MISO RTO market. From there, the line will continue into Indiana and Illinois where it will interconnect with the PJM RTO market. This project will be funded through the sales of transmission capacity to wholesale customers (referred to as merchant transmission) and, therefore, will not be funded by Kansas retail ratepayers through regional SPP rates.

On December 28, 2018, Invenergy Transmission LLC and Clean Line filed an Application seeking approval of Invenergy purchasing the Kansas assets of Clean Line. On June 18, 2019, the Commission issued an order approving the transaction with certain conditions. The Kansas docket approving the siting of the proposed transmission line required the Grain Belt Express to begin construction in Kansas by November of 2018. In an October 4, 2018, Order issued in Docket 13-GBEE-803-MIS (13-803 Docket), the Commission extended the sunset term of the siting approval to March 1, 2019, conditioned upon Grain Belt submitting evidence of its financial, managerial and technical ability to complete the Project. Some of the conditions contained in the settlement agreement that was approved as part of the sale of the Grain Belt assets to Invenergy are related to the sunset provisions contained in the 13-803 Docket. On September 26, 2019, the Commission replaced the 13-803 Docket

sunset provisions with requirements for Invenergy to meet specific deadlines to obtain easements in Kansas for the new line. Failure to meet the deadlines will subject Invenergy to financial penalties.

On July 26, 2022, Grain Belt Express filed an application with the Illinois Commerce Commission (ICC) for an Order (1) granting Grain Belt Express a Certificate of Public Convenience and Necessity (CPCN) to, directly or through one or more affiliates or third-party contractors, construct, operate and maintain a high voltage direct current electric service transmission line and related facilities to be known as the Grain Belt Express transmission line and to conduct a transmission public utility business in connection therewith; (2) authorizing Grain Belt Express, to construct the high voltage direct current electric service transmission line and related facilities; and (3) granting Grain Belt Express certain other relief in connection with its operations in Docket No. 22-0499.

On March 8, 2023, the ICC issued a Final Order granting Grain Belt Express' request subject to certain conditions outlined in Sections IV.E., IV.D.1 and Appendix B and Section VII.A. of the Order.

On August 24, 2022, Grain Belt Express filed to amend its existing certificate of public convenience and necessity with the Missouri Public Service Commission (MPSC) (Docket No. EA-2023-0017), in order to reflect an updated project configuration and to seek approval to construct the project in two phases. On October 12, 2023, the MPSC issued a Report and Order granting the request, subject to conditions set forth in the Order.

On August 8, 2024, the Illinois 5th District Court of Appeals reversed the decision by the Illinois Commerce Commission (ICC) to grant a certificate of public convenience and necessity (CPCN) to the Grain Belt Express project. On October 3, 2024, Grain Belt Express and the ICC jointly with the Illinois Attorney General's office filed a

petition for leave to appeal the 5th Circuit decision with the Illinois Supreme Court, which stays the lower court's ruling until additional action is taken by the Supreme Court.

Summary of Siting Docket No. 24-GBEE-790-STG:

On May 31, 2024, Grain Belt Express filed an Application under the Kansas Siting Act, K.S.A. 66-1,177, requesting a siting permit establishing the route for two interrelated transmission lines and associated facilities as part of the previously Commission-approved alternating current (AC) Collector System. The proposed inter-related transmission lines include (1) a double-circuit 345 kV AC transmission line of approximately 46 miles long across portions of Gray, Meade, and Ford Counties (the Meade-Dodge City Line), and (2) a single or double-circuit 345 kV AC transmission line of approximately 16 miles long traversing a portion of Ford County (the Bucklin-Dodge City Line). To accommodate the transmission structures, Grain Belt seeks voluntary easements that are typically 150 feet wide.

The Commission held a public hearing in Dodge City, Kansas on July 10, 2024.

On August 23, 2024, Grain Belt and the Boyds submitted a Joint Motion for Approval of a Settlement Agreement (Agreement) that finds that the Collector Lines are necessary and the outstanding dispute among the parties on location of line [Original Location vs Boyd Alternative 2] be deferred to allow reasonable time for Grain Belt to develop a routing analysis; legal notice to all landowners; a second public hearing related to the relevant portion of the Meade Proposed Route; and additional procedures necessary for the Commission to make a decision regarding the Bifurcated Route Options. In the Agreement, the Parties stated the KCC should condition the siting permit to require: i) Grain Belt to develop a routing analysis study of the alternatives, ii) Grain Belt will file its routing analysis with the Commission by January 15,

2025, iii) At least 15-days before filing the Routing Analysis, Grain Belt, the Boyds, and Staff will submit a Procedural Schedule appropriate for the Commission to determine the most reasonable route. As part of the Agreement, the Boyds and Grain Belt agree not to contest the Commission's determination of the ultimate route.

On August 26, 2024, the Commission held an evidentiary hearing on Grain Belt's Application for Staff and intervening parties to discuss the merits of their positions. Following the Commission's post hearing brief processes, the Commission issued its Order on September 26, 2024. In the Order, the Commission conditionally approved the citing request based on the following findings: (1) the AC Collector Lines are Necessary; (2) the AC Collector Routes, Subject to the Boyds' Challenge are Reasonable (3) the Agreed upon Conditions in the Agreement are Approved; (4) additional studies requested by Sunflower are unnecessary.

See KCC Order in Docket No. 24-GBEE-790-STG: https://estar.kcc.ks.gov/estar/ViewFile.aspx/Order_Granteeing_Siting_Permit_with_Conditions.pdf?Id=cbe11137-262b-4d9d-b789-8a0aefb7e38d

Natural Gas

OVERVIEW

The KCC regulates three large (annual operating revenue greater than \$10 million) natural gas distribution utilities. A list of the large gas distribution utilities and a brief overview of the major activities for FY2024 are noted below. A summary of each major docket associated with the companies follow this narrative section along with a listing of all other natural gas dockets. In addition, included in this narrative section is a discussion of the Federal issues that the Utilities Division Staff spent a significant amount of time on during FY2024.

LARGE GAS UTILITY COMPANIES

ATMOS Energy Corporation

Black Hills/Kansas Gas Utility Co.

Kansas Gas Service, a Division of ONEOK, Inc.

During FY2024, there was one rate case filed involving a major natural gas company.

On March 1, 2024, Kansas Gas Service (KGS) filed an Application to make changes in its rate and charges for natural gas service.

KGS's request indicated a gross revenue deficiency of \$93.1 million. After rebasing \$35 million of the Gas Safety and Reliability Surcharge (GSRS) collected from KGS customers, the net impact of KGS's requested revenue requirement is an increase of \$58.1 million. KGS's request included: (1) a 10.25% return on equity, (2) a proposal to implement the Annual Performance-based Rate Adjustment (APRA) that would provide for an annual review and adjustment of the cost of operations and actual return on equity, (3) a proposal to implement a two-part A/B rate plan separating residential customers into to subclasses based on usage levels to provide customers more options to control their bills, and (4) the implementation of new Depreciation Rate Study, and a proposal to allow a portion of financially based executive and officer incentive compensation in the cost of service.

On August 2, 2024, the parties (KGS, Staff, CURB, and WoodRiver) filed a Joint Motion to approve a "black box" Settlement Agreement.

The Agreement included a gross revenue increase of \$70 million. After rebasing \$35 million of the GSRS, the impact of the Agreement resulted in a net revenue requirement increase of \$35 million. The Agreement included: Staff's recommended depreciation rates and KGS's withdrawal of its proposed APRA and its two-part A/B rate plan. For GSRS purposes, the Agreement included a carrying charge of 8.97% gross of taxes, which Staff derived as a 60/40 capital structure and an ROE of 9.5%.

The Commission issued an Order approving the Agreement on October, 3, 2024.

FY2023 Gas Update:

On March 3, 2022, Kansas Gas Service (KGS) filed Docket No. 23-KGSG-719-TAR to evaluate and change several aspects of its natural gas transportation tariffs. These changes to the transportation tariffs resulted from the lessons learned as a result of the Commission general investigations into Winter Storm Uri. Several natural gas marketers that are active in the natural gas transportation market in Kansas intervened in the case, as well as Sunflower Electric Power Cooperative (Sunflower), Atmos Energy, and Kansas Municipal Gas Agency (KMGA).

On September 22, 2023, the Parties all filed a Unanimous Settlement Agreement with the Commission. The Agreement called for several important revisions and improvements to KGS's transportation tariffs, including a mechanism to compensate gas marketers and others (like Sunflower and KMGA) for instances in which they deliver more natural gas to the KGS system than they use, during periods of extremely high demand coupled with very high gas prices. This mechanism makes it possible for shippers on the KGS system to be compensated for taking actions which improve the reliability of the natural gas or electric systems in Kansas, either by supplying more gas when it is sorely needed, or by consuming less.

The Agreement also called for lowering the maximum penalty that can be assessed during events like Winter Storm Uri. The Agreement calls for changes to the way these penalties are calculated, from the greater of a less significant dollar amount per MMBtu (\$5 to \$20) or a multiple of the Gas Daily Index, to the lesser of a much more significant dollar amount per MMBtu (\$15 to \$100), plus the underlying Gas Daily Index, or a multiple of the Gas Daily Index. This allows any potential penalties to not be so draconian as to cause severe distress on the Kansas Economy, while at the same time ensuring that they convey the intended punitive effect in order to incent compliance with KGS's critical directives during times of system stress, such as an Operational Flow Order or

Period of Curtailment.

Additionally, the Agreement called for all transportation customers, with the exception of School customers and Irrigation customers using less than 3,000/Mcf/year, to install EFM equipment by January 15, 2027, or be converted to Sales Service. For Schools using more than 3,000 Mcf/year, KGS agreed to pay for the EFM installation for these customers, with KGS recovering its actual costs of conversion plus a carrying charge at the approved rate of return used for the Gas Safety Reliability Surcharge.

Lastly, the Agreement called for revising the Cash Out price that KGS pays transportation customers, or that transportation customers pay KGS, in the event of imbalances at the end of the billing month. These changes improved the incentive that transportation customers have to stay in balance during the month, and by the end of the month, which lowers the likelihood of subsidization between the sales and transportation customer classes.

The Commission issued an Order approving the Agreement on December 28, 2023.

FEDERAL ISSUES

The Commission Staff monitors the rate and tariff activities of several interstate pipelines that serve Kansas local distribution companies, towns, and other large volume gas users. Chief among these is Southern Star Central, which transports 60% to 70% of all natural gas consumed annually in Kansas. Other interstate gas pipelines such as Kansas Pipeline Company, Cheyenne Plains Gas Transmission, Panhandle Eastern Pipeline, Tallgrass Interstate Gas Pipeline, and Northern Natural Gas are also monitored.

In addition to monitoring rate and tariff issues, the KCC intervenes in a variety of other filings by interstate gas transmission companies including: annual fuel and lost and unaccounted for gas filings (FL&U), construction and abandonment filings, tariff change filings, gas quality specifications filings, and storage dockets. The KCC also

participates rulemaking and policy dockets that affect the cost of gas transportation.

During FY2024, the KCC intervened or was active in the following Natural Gas Dockets at FERC:

- RP24-163 – Tallgrass Interstate Gas Transportation Pipeline’s (Tallgrass) Rate Proceeding – The KCC was an active participant in FERC’s review of Tallgrass transportation rates due to the effectiveness of the Tax Cuts and Jobs Act in FERC Docket No. RP19-423. One of the Provisions of the Settlement Agreement in the RP19-423 required Tallgrass to submit a Section 4 rate filing by June 1, 2023. The filing in RP-24-163 fulfilled the requirement.

Tallgrass engaged parties in pre-filing settlement negotiations with shippers and interested parties in advance of its June 1, 2023, filing deadline. The KCC actively participated in those discussions, which led to a unanimous settlement that was filed on November 11, 2023, as the June 1, 2023 filing deadline was extended to provide additional time for settlement negotiations. The “black box” Settlement Agreement included \$31 million revenue requirement increase with a total cost of service of \$121 million. Under the settlement agreement new rates would be in effect from June 1, 2024 through at least May 31, 2027. The settlement also required Tallgrass to submit a new Section 4 filing to restate its rates by no later than January, 1 2029.

FERC approved the settlement on May 3, 2024.

- RP24-368 – Southern Star Capital Cost Recovery Mechanism (CRM) Surcharge filing: In compliance with the Settlement Agreement in Southern Star Rate Case proceeding in FERC Docket No. RP21-778, Southern Star filed its second annual modernization surcharge rate (CRM) filing on January 31, 2024, in FERC Docket RP24-368. Southern Star’s filing included \$55.3 million in capital investment that it completed and placed into service in 2023. The CRM limits Southern Star’s rate recovery to

\$50 million in 2023, plus the \$5.3 million that exceeded the project cap for 2023 and the \$4.7 million in trailing cost on projects placed in service was treated as capital maintenance costs pursuant to the tariff provisions. Southern Star’s capital maintenance costs totaled \$66 million, exceeding the 2023 requirement for maintenance capital investment of \$55 million. Southern Star’s project investment was assigned directly (when possible) or functionalized, resulting in a total revenue requirement of \$20.6 million assigned to the transmission production area, \$11.3 million of projects assigned to the transportation market area, and \$1.5 million of projects assigned to storage, based on the eligible projects for 2022 and 2023. The CRM Surcharge rates were based on the billing determinants for the maximum daily transport quantity (MDTQ) of usage for transportation rates and maximum daily withdrawal quantity (MDWQ) for storage rates, resulting in a surcharge of \$0.0113 per MDTQ for the transportation production area, \$0.140 per MDTQ for the transportation market area, and \$0.0034 per MDWQ for storage. The KCC continues to audit and participate in the Modernization project review process with Southern Star.

FY2023 FERC Gas Updates:

- RP22-1033 – Northern Natural Gas Rate Case – On June 16, 2022, Northern Natural Gas provided notice of customer meeting to discuss its Section 4 rate case filing, which was filed on July 1, 2022. Northern’s last Section 4 rate case was filed July 1, 2019 in FERC Docket RP19-1353 and was settled on September 28, 2020. The Stipulation and Agreement in the RP19-1353 rate case included a 28% increase in Northern’s rates and included a rate moratorium that ended June 30, 2022.

In its filing, Northern stated its rate case is driven by an investment of \$1.6 billion in pipeline modernization and maintenance capital that is not in rates, adding approximately \$1.1 billion to rate base or a 37% increase from its last rate case. Northern’s rate case includes

a cost of service of \$1.34 billion or an increase of \$477.9 million, which equates to a 55.6% increase over its existing cost of service of \$860 million. Northern's requested rate of return is 10.61%, which includes an ROE of 14.31% and a capital structure is 36.4% debt and 63.6% equity.

On July 13, 2022, the KCC submitted its Notice of Intervention, Protest, and Request for the Maximum Suspension period available under the Natural Gas Act for the RP22-1033 rate proceeding. The KCC Staff actively participated in the review of Northern's rate case filing and attended a number of settlement negotiations in early 2023.

On June 23, 2023, Northern submitted a Stipulation and Agreement (S&A) that included a black box settlement that provided stated transportation and storage rates. The increase in Northern's transportation and storage reservation rates include: a 32.5% increase in the reservation rates for transportation in the Market Area, a 20.5% increase in the reservation rates for transportation in the Field Area, and a 13% increase in the reservation and commodity rates for Storage. Based on the KCC calculation of settlement rates, the S&A provided Northern with a cost of service of approximately \$1.01 billion, which equates to approximately a \$150 million increase over its previously approved revenue requirement of \$860 million. The KCC's cost of service calculation included a return on equity of 11.5%, a cost of debt of 4.15% and Northern's actual capital structure consisting of 63.39% equity and 36.39% debt. The KCC would note that Northern's return on equity and capital structure was in line with FERC's decision included in Opinion No. 885 and Order on Panhandle Eastern's most recently litigated return on equity of 11.25% and capital structure (63% equity and 37% debt) issued in December 22, 2022. The KCC is listed as a Settling Party indicating the Commission's non-opposition to the filed S&A. While other parties to the S&A have all indicated their support for or non-opposition to the settlement, Trial Staff and the Canadian Association

of Petroleum Producers have filed Comments in Support of the Agreement, without any comments filed by parties objecting to the terms of the settlement.

On September, 7, 2023, FERC issued its Order approving the Agreement in RP-22-1033 Docket. Northern submitted its refund filing on October 31, 2023 that provided customer refunds for the difference between interim rates that were established on January 25, 2023, with an effective date of January 1, 2023. FERC accepted Northern's final refund report on November 27, 2023.

Natural Gas Pipeline Safety

OVERVIEW

Pipeline safety personnel continue to conduct onsite inspections of intrastate natural gas facilities. The inspections monitor the gas systems for any areas of non-compliance with pipeline safety regulations. A typical audit will stress compliance with the operator's management of the integrity of the pipeline delivery system including such topics as review of emergency response plans, odorization requirements, cathodic protection, leak surveys, and operator qualification requirements. In addition, engineers and pipeline safety inspectors investigate any incident suspected of being caused by natural gas and report these to the Commission. Any recommendations of Staff regarding prevention of potential incidents are included in the report and considered by the Commission. Statistics that provide a snapshot of the pipeline safety personnel's inspection activity, as well as an overview of the regulated gas infrastructure in Kansas, can be found in the pipeline safety section of this report.

Pipeline safety personnel also investigate violations of the Kansas Underground Utilities Damage Prevention Act (KUUDPA). Investigators work with excavators and utility operators to assure compliance with provisions of the Act such as requesting locates prior to digging and locating facilities within 48 hours of being notified of pending excavation work. To enhance

our KUUDPA enforcement efforts, KCC receives two federal grants that provide funding for two inspector positions for the calendar year. For the calendar year of 2023, the Commission acted upon 25 filings in which fines were levied to 21 excavators for failure to notify utilities prior to excavating over buried facilities. Fines were also levied to 3 utility operators for failure to provide timely or accurate locates. For the 25 cases, a total of \$31,250 in fines were levied.

For one of Kansas largest natural gas operators, a show cause order was issued for 158 one call violations that occurred in calendar years 2020, 2021, and 2022 for 158 violations of KUUDPA. The Commission approved a settlement agreement between KGS and Staff to direct a penalty totaling \$158,000 for educational grants to institutions which offer heavy equipment operator training programs. This grant program will be administered by Commission Staff and will provide training on safe excavation practices when working near underground facilities with any type of excavation equipment.

Kansas experienced one natural gas incident in CY2023.

Liquid Pipeline Common Carriers

OVERVIEW

Although there are relatively few intrastate pipeline common carriers in Kansas, the Commission is responsible for the economic regulation of this sector. The majority of Staff's work in this area is the review of tariff and rate filings in an effort to ensure efficiency, public interest, and balanced benefit to Kansas common carriers and shippers. Staff is responsible for the economic regulation, including but not limited to: processing tariff and rate filings; analyzing tariffs for compliance; monitoring complaints; processing and monitoring certificate filings due to sales, purchases, mergers and acquisitions, divestitures, service cessations and abandonment; and monitoring operations for unforeseeable events and capacity

constraints. Additionally, Staff tracks all intrastate revenue reported from each pipeline company. Staff processed 16 intrastate pipeline common carrier dockets during FY2024. The intrastate liquid pipeline companies regulated by the KCC are noted below. There were no major dockets in FY2024 for liquid pipelines. A listing of all other liquid pipeline dockets follow this narrative section.

LARGE LIQUID PIPELINE UTILITIES (\$10M or more in annual intrastate revenues)

Magellan Pipeline Company, LP

SMALL LIQUID PIPELINE UTILITIES (\$10M or less in annual intrastate revenues)

Jayhawk Pipeline (owned by NCRA)

Kaw Pipeline Company

Mid-America Pipeline Company, a subsidiary of Enterprise Products Partners, LP

NuStar Pipeline Operating Partnership, LP

ONEOK NGL Pipeline, LLC

ONEOK North Systems

Plains Pipeline, LP

Telecommunications

OVERVIEW

The KCC regulates four primary types of telecommunications carriers with varying degrees of regulation: Incumbent Local Exchange Carriers (ILECs); Electing Carriers; Competitive Local Exchange Carriers (CLECs); and Interexchange Carriers (IXCs) (also known as long-distance carriers). These telecommunications carriers serve a customer base ranging from as few as one customer to over 250,000 customers. The large telecommunications carriers regulated by the KCC are noted below. A summary of each major docket associated with the telecommunications carriers follow this narrative section along with

a listing of all other telecommunications dockets.

LARGE TELECOMMUNICATIONS CARRIERS

Kansas Fiber Network, LLC

IdeaTek Telcom, LLC

Cox Kansas Telecom, LLC

Southwestern Bell Telephone Company d/b/a AT&T Kansas

United Telephone Companies of Kansas, Inc. d/b/a Brightspeed (formerly CenturyLink)

Including the five large telecommunications utilities listed above, the Commission has certificated 36 incumbent local exchange carriers (ILECs)¹, 123 CLECs, and 181 IXCs.

The KCC continues its effort in fulfilling its obligation to protect the rights and privileges of Kansas consumers in balance with the interests of the telecommunication carriers. The evolution of competition in providing local and long distance telecommunications has resulted, in some instances, in greater choice of available services at a variety of rates with a wider array of providers, packages, and bundles from which to choose. Technology developments have also continued to play a key role in the evolution of the telecommunications industry.

The KCC Staff is responsible for economic regulation, including but not limited to: processing incumbent local exchange carrier tariff filings and switched access rate filings; analyzing tariffs for compliance with KCC rules and regulations; administering consumer and carrier complaints; processing certificate filings, service cessations, name changes, and sales and acquisitions involving rural ILECs; reviewing carrier-to-carrier interconnection agreements and providing mediation when necessary; ensuring quality services of the incumbent local exchange carriers; overseeing the Kansas Universal Service

Fund (KUSF); auditing rate-of-return regulated ILECs; processing video service applications; and processing eligible telecommunications carriers filings.

KANSAS UNIVERSAL SERVICE FUND

The Kansas Universal Service Fund (KUSF) was established by the Commission in 1996, as required by the Kansas Telecommunications Act. The KUSF is in its twenty-eighth year of providing support to local telephone service providers to assist in making universal service available in high-cost areas of the state, to provide dual-party relay service and telecommunications equipment for persons with disabilities, and to provide assistance to those with lower incomes through the Lifeline program. Effective March 1, 2024, the annual KUSF funding requirement is approximately \$37.1 million and the carrier assessment rate is 11.69%. The KUSF provides approximately \$35.8 million in high-cost support, \$11,990 for low-income subscribers, \$179,800 for telecommunications relay service, \$269,900 for the telecommunications equipment program, and \$554,500 for the fund administration and carrier audits.

The Commission began audits of all ILECs receiving KUSF support in 2000. The Commission has completed the initial audits for all ILECs and continues to monitor and initiate new audits when warranted based on an annual review of financial metrics. All of the rural ILECs have elected rate-of-return regulation; therefore, the audits provide an opportunity for the Commission to determine whether or not the KUSF support is cost-based for each rural ILEC.

On August 11, 2023, South Central Telephone Association, Inc. (South Central) filed an Application requesting an additional \$2.1 million of annual KUSF support. On September 5, 2023, the Commission issued a Procedural

¹ In 2011, Tri-County Telephone Association, Inc. purchased Council Grove Telephone Company, Docket Nos.11-CGTT-370-CCS and 11-TRCT-371-COC, April 28, 2011.

Schedule Order. On December 12, 2023, Commission Staff's Direct Testimony supported an annual increase of \$1,878,560 in South Central's KUSF support. On January 4, 2024, Staff and South Central filed a Settlement Agreement in which South Central will receive an additional \$1,878,560 in annual KUSF support, plus \$74,076 in trued-up rate case expense incurred through December 18, 2023, amortized over five years, for a total of \$1,883,044. When added to South Central's current KUSF draw of \$201,959, South Central will receive \$2,085,003 annually, before being pro-rated by the cap. The Commission approved the Settlement Agreement on March 19, 2024.

On October 18, 2023, Totah Communications, Inc. (Totah) filed an Application for an additional \$627,462 in annual KUSF support. On December 28, 2023, the Commission issued a Procedural Schedule Order. On February 22, 2023, Commission Staff's Direct Testimony supported an annual increase of \$261,943 in Totah's KUSF support. On March 27, 2024, Staff and Totah filed a Settlement Agreement in which Totah will receive an additional \$262,979 in annual KUSF support. When added to Totah's current KUSF draw of \$206,678, Totah will receive \$469,657 annually, before being pro-rated by the cap. The Commission approved the Settlement Agreement on May 2, 2024.

K.S.A. 66-2008(e)(3) caps the annual KUSF support payable to the rural ILECs at \$30 million. When the Commission approves a change to a rural ILEC's KUSF support, the amount is prior to any pro-rata calculations Staff makes to determine each rural ILEC's share of the \$30 million support cap. Staff files its pro-rata KUSF support calculation for the rural ILECs in the annual KUSF docket to ensure the rural ILECs can review those calculations. The Commission issues an order setting the rural ILECs' pro-rated KUSF support. This process occurs whenever a change in a rural ILEC's KUSF support is approved.

FEDERAL ISSUES

Congress determined that broadband is no longer a luxury but a necessity for full participation in our economy and society – for all Americans. For that reason, the FCC adopted comprehensive reforms of its Universal Service Fund (USF) and Intercarrier Compensation (ICC) systems to accelerate broadband build-out to the approximately 23 million Americans (as of December 31, 2013) who lacked access to infrastructure capable of providing 10/1 Megabits per second (Mbps) fixed broadband. This reform will expand the benefits of high-speed Internet to millions of consumers in every part of the county by transforming the existing USF into a new Connect America Fund (CAF) focused on broadband. The broad goal is to support the provision of broadband communications in areas that would be unserved without such support or that depend on universal service support for the maintenance of existing broadband service. The FCC has initiated numerous proceedings aimed at implementing its broadband goals.

As part of its reform efforts, the FCC offered over \$1.675 billion annually, for six calendar years (2015-2020), model-based CAF support to price cap carriers nationwide to fund the deployment of voice and broadband-capable services of at least 10/1 (Mbps) in the eligible areas. CenturyLink accepted \$16.5 million to provide broadband to 29,018 eligible households in Kansas, and AT&T accepted \$18.9 million to provide broadband to 35,375 eligible households in Kansas. Carriers were required to meet specific deployment milestones set by the FCC, including deployment to 100 percent of the supported locations in each state by December 31, 2020, with the FCC authorizing carriers to extend the deadline until December 31, 2021, as a result of the Covid-19 Pandemic. Compliance shall be determined based on the total number of supported locations in a state.

Taking further steps to expand rural broadband deployment, in March of 2016, the FCC approved modernization and

reform of its universal service program supporting the nation's rate-of-return carriers by providing approximately \$20 billion in support over ten years, to modernize the universal service program for rate-of-return areas include enabling rate-of-return providers to meet consumer demand for stand-alone broadband by providing support for stand-alone broadband. The reforms include better targeting of support to communities that need it the most.

The FCC further allowed carriers to voluntarily transition from legacy rate-of-return support to model-based support, similar to CAF Phase II, for rate-of-return carriers (also known as Alternative Connect America Cost Model or ACAM). Kansas rate-of-return carriers: Haviland Telephone Company; JBN Telephone Company; Moundridge Telephone Company; S&A Telephone Company; Zenda Telephone Company; and Totah Communications elected to transition from legacy USF support to ACAM support, starting in 2017. Carriers that voluntarily elected to transition to A-CAM support must deploy service providing 10 Mbps/1 Mbps to all funded locations, with faster 25 Mbps/3 Mbps service required in areas of higher population density. Carriers are required to meet specific deployment milestones required by the FCC. Because the amount of federal high-cost support a carrier receives is included in the calculation of high-cost KUSF support received by a rate-of-return regulated carrier, changes in federal support may affect the KUSF - although the KUSF support for rate-of-return carriers remains subject to the \$30 million cap.

In December 2019, the FCC offered additional funding to rate-of-return carriers that receive A-CAM support if a carrier expanded the availability of 25/3 Mbps broadband, while deploying at least 10/1 Mbps to new locations in its service area. The FCC also provided an opportunity for rate-of-return carriers that did not elect to transition to A-CAM support in 2016 to transition to A-CAM II model-based support in return for specifically tailored obligations to

deploy 25/3 Mbps broadband. H&B Communications; LaHarpe Telephone Co., Inc.; MoKan Dial Inc.; Moundridge Telephone Co.; Rural Telephone Service Company; and Twin Valley Telephone, Inc. elected A-CAM II support. The FCC further authorized additional support for those carriers that elect to remain on legacy rate-of-return support in exchange to build-out 25/3 Mbps broadband.

In August 2019, the FCC proposed Auction 904, a reverse auction, to build on the Connect America Fund Phase II (CAF II) auction and bring broadband service to Americans living in unserved areas. The Rural Digital Opportunity Fund (RDOF) is the FCC's next step in bridging the digital divide to efficiently fund the deployment of broadband networks in rural America. Through a two-phase reverse auction mechanism, the FCC will direct up to \$20.4 billion over ten years to finance up to gigabit speed broadband networks in unserved rural areas, connecting millions of American homes and businesses to digital opportunity.

The RDOF Phase I auction (up to \$16.0 B) opened on October 29, 2020, and targeted over six million homes and businesses in census blocks that are entirely unserved by voice and broadband with speeds of at least 25/3 Mbps. On December 7, 2020, the FCC announced the Auction 904 winning bidders, awarding \$9.23 billion of the budgeted \$16 billion for the ten-year period to 180 companies to deploy voice and broadband services to 5,295,771 locations in 61,766 census blocks in 49 states and one territory. Twelve companies were awarded a total of \$62.1 million to deploy service to 46,827 Kansas locations. The Commission granted ETC designation to ten of the companies and two of the companies forfeited their awards. Five Kansas companies began to receive RDOF support in 2021 and, by September 2022, three additional Kansas companies, for a total of eight companies, were receiving RDOF I support.

In July 2023, The Enhanced ACAM program was established and will distribute roughly \$18.28 billion over 15 years to carriers to deploy broadband service with speeds of at least 100 megabits per second downstream and 20 megabits per second upstream (100/20 Mbps) to more than 700,000 locations, and to improve or maintain 100/20 Mbps broadband service at approximately 2 million locations, in 44 states. This program provides additional support to carriers that were participating in other CAF programs to bring faster broadband to more locations, including locations in some of the most difficult-to-reach areas of the country. In Kansas, Blue Valley Tele-Communications, Inc., Haviland Telephone Company, Inc., La Harpe Telephone Company Inc., MoKan Dial, Inc., Rural Telephone Service Company, Inc., Totah Communications, Inc., Wamego Telecommunications Company, Inc., Wheat State Telephone Company, Inc., and Zenda Telephone Company, Inc. elected Enhanced A-CAM support. Enhanced ACAM carriers have until December 31, 2028, to complete deployment.

Consumers' Research v. FCC

Universal service has been an essential component of FCC policy since the FCC was established in 1934 and funds many programs that ensure the availability of vital telecommunications services to schools, libraries, rural health care providers, and rural and low-income customers.

47 U.S.C. 254 requires the Federal Communications Commission (FCC) to operate federal universal service subsidy programs using mandatory contributions from telecommunications carriers. To administer the subsidy programs, the FCC appointed a private company as the programs' administrator, authorizing that company to perform administrative tasks such as sending out bills, collecting contributions, and disbursing funds to beneficiaries.

The challenge raised by Consumers'

Research (Consumers) to the Universal Service Fund is two-fold. First, Consumers argues that Congress effectively ceded its taxing power to the FCC by giving the agency discretion to set the fees that telecommunications providers pay into the FUSE. Consumers argues this is a violation of the nondelegation doctrine. The nondelegation doctrine is the principle that Congress cannot delegate its legislative powers to other branches of government. Second, Consumers argues that the FCC delegated too much policymaking authority to a private entity in pertinent part because the FCC relies on the administrators' projections when setting fees.

Initially, the 5th, 6th, and 11th Circuits all disagreed with Consumers. However, the full 5th Circuit later agreed to rehear the case and concluded that the combination of Congress's delegation of power to the FCC and the FCC's delegation of administrative responsibilities to the Administrator violates the Constitution. Because the 6th and 11th Circuits ruled for the FCC on the same case, there is an increased likelihood that the Supreme Court will accept the case to resolve the split among the Circuits.

Water

OVERVIEW

The Kansas Corporation Commission (KCC) regulates four water companies, none of which fall into the large utility category. These water companies serve a customer base ranging from as few as 60 to as many as 1,850. Customers served by these companies typically live in a suburban area approximately two to ten miles outside the city. The water supplied varies from city water supplied by a nearby town to ground water supplied by the company's own water wells. The water companies regulated by the KCC are noted below. There are two ongoing show cause dockets associated with Towns Riverview (Docket No. 20-DTRW-120-SHO) and Sundowner,

Inc. (Docket No. 24-SUNW-590-SHO).

Barton Hills Water District

Delmer Towns d.b.a. Towns Riverview

Green Acres Mobile Home Park, LLC

Suburban Water, Inc.

Financial Information and Other Metrics

OVERVIEW

The KCC sets rates for electric, natural gas, telecommunications, and water utilities on a rate base/rate of return basis for public or private utilities or a Times Interest Earned (TIER)/Debt Service Coverage Ratio (DSC) basis for cooperatives. For the electric, natural gas, and rural local exchange companies, the amount of capital investment, fuel and purchased power expense, total revenues, and total expenses are measured in billions of dollars. Following this overview section, more details are provided regarding financial information and other metrics for all the KCC jurisdictional utility industries on a consolidated and individual industry basis.

**GAS, ELECTRIC, AND RURAL LOCAL EXCHANGE COMPANIES

Financials

The following are selected Gross Plant, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis. Empire District Electric and Evergy Kansas Metro have operations in multiple states. The values represented in the following charts relate only to the Kansas operations of those two entities.

ELECTRIC COMPANIES STATEWIDE GROSS PLANT | 2019–2023

Gross Plant is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility’s rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total gross plant of all regulated public utilities in Kansas for the past five years.

ELECTRIC COMPANIES GROSS PLANT, BY COMPANY | 2023

This chart takes the statewide aggregate gross plant figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, two entities encompass a vast majority of utility gross plant across Kansas.

*All figures for Kansas operations only.

ELECTRIC COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2023

This chart compares each utility's annualized revenues and expenses. The difference between the two represents the gross margin of each company. Worth noting is the difference in gross margins between the investor-owned utilities and the cooperatives. Embedded in that difference is the dividend cost that rewards and helps ensure continued shareholder investment.

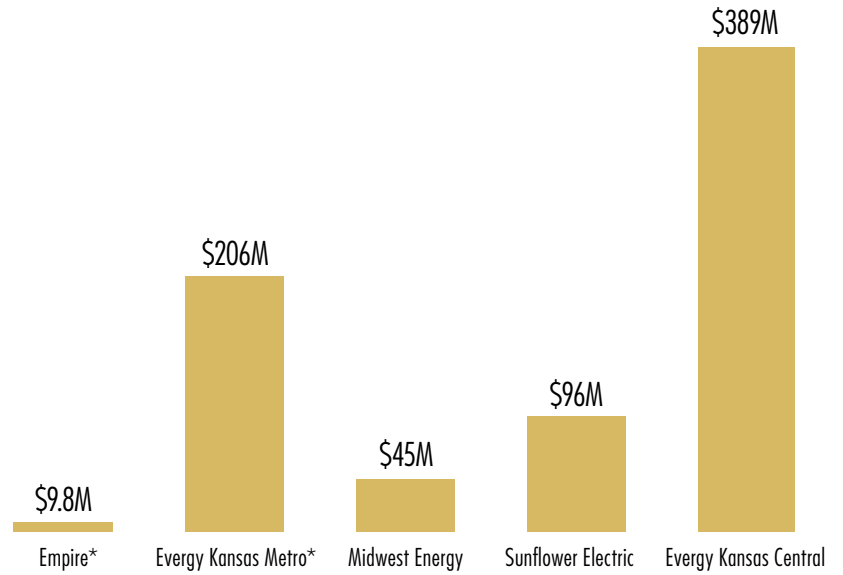

■ Total Revenues
■ Total Expenses

*All figures for Kansas operations only.

ELECTRIC COMPANIES GENERATING AND PURCHASED POWER COSTS, BY COMPANY | 2023

This chart takes the expense portion from each utility on the previous table and carves out the cost of generation and purchased power. As can be seen by comparing the two tables, generation and purchased power represent only about half the total cost of providing safe, reliable, and efficient electric service.

*All figures for Kansas operations only.

ELECTRIC COMPANIES WITH REVENUES OF OVER \$10M | RATE CASE RESULTS | FY20–FY24

■ Requested
■ Granted
■ Refunds and/or Rate Reductions

RESIDENTIAL ELECTRIC BILL COMPARISON | JULY 2023 - JUNE 2024

The following chart represents a comparison of monthly bills based on average residential consumption of 897 kWh.

PAYMENT METHODS UTILIZED BY RESIDENTIAL ELECTRIC CUSTOMERS

Generation Planning Survey

The Commission continues to monitor the generation capacity and reliability of Kansas electric utilities. Staff members annually review generation and load forecasts of Kansas electric utilities to ascertain whether there is adequate electric supply to meet the needs of Kansas electric consumers. All Kansas electricity suppliers are subject to the oversight of the Southwest Power Pool (SPP). Under the authority vested in it by the Federal Energy Regulatory Commission, the SPP is responsible to ensure a reliable supply of power in Kansas. The SPP's Regional State Committee and board have approved

minimum requirements of a 36% winter-season PRM and a 16% summer-season Planning Reserve Margin (PRM)¹, effective beginning summer 2026 and winter 2026/27.² This action marks the first time a winter PRM requirement has been defined separately from SPP's summer PRM requirement and was taken to ensure member utilities appropriately acquire enough generating capacity for both seasons. The current 15% summer PRM requirement was previously applied to the winter season also. The new requirements support SPP's efforts to reliably and continuously meet the region-wide demand for electricity

from residents, commercial centers and industries throughout the SPP footprint. Based on its review, staff determined that, at this time, forecasted electric generation capacity and planning to meet future changes in system load in the State of Kansas appears sufficient given current load and generation forecasts planned. Although utilities in the chart do indicate deficiencies in the future, planned generation capacity additions can be made that will satisfy future planning responsibility. The chart on the following page describes the generation capacity situation major utilities in Kansas face going forward.

1 Planning Reserve Margin equals the difference in Deliverable or Prospective Resources and Net Internal Demand, divided by Net Internal Demand. Planning reserve margin is designed to measure the amount of generation capacity available to meet expected demand in planning horizon. Coupled with probabilistic analysis, calculated planning reserve margins have been an industry standard used by planners for decades as a relative indication of adequacy. See <https://www.nerc.com/pa/RAPA/ri/pages/planningreservemargin.aspx#:~:text=Planning%20reserve%20margin%20is%20designed,a%20relative%20indication%20of%20adequacy>.

Large Electric Rate Cases

EVERGY KANSAS CENTRAL, INC.

<i>Docket number</i>	<i>23-EKCE-775-RTS</i>
<i>Docket type</i>	<i>Electric</i>
<i>Date filed</i>	<i>25 Apr 2023</i>
<i>Action date</i>	<i>21 Nov 2023</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of the Joint Application of Evergy Kansas Central, Inc., Evergy Kansas South, Inc. and Evergy Metro, Inc. for Approval to Make Certain Changes in their Charges for Electric Service.

On April 25, 2023, Evergy Kansas Central, Inc. and Evergy Kansas South, Inc. (collectively referred to as Evergy Kansas Central or EKC) and Evergy Metro, Inc. (Evergy Kansas Metro or EKM) (together with EKC referred to as Evergy) filed a Joint Application requesting authorization to make certain changes to EKC's and EKM's charges for electric service. Evergy's Application indicated a gross revenue deficiency of \$278,970,655 for EKC and \$25,072,678 for EKM, based upon normalized operating results for the 12-months ending September 30, 2022, as adjusted for known and measurable changes through June 30, 2023. After rebasing the amounts currently collected from customers through the Retail Energy Cost Adjustment (RECA) and the Property Tax Surcharge (PTS) the net impact of the requested revenue requirement increase was \$204.2 million (+9.77%) for EKC and \$14.2 million (+1.95%) for EKM.

There were six primary drivers behind the EKC rate case application. These primary contributors to its requested revenue increase included: (1) a significant increase in the level of physical plant investment since EKC's 2018 rate case; (2) EKC's proposed increase in the overall cost of capital from 7.0573% to 7.4189%; (3) an increase in depreciation expense largely attributable to the magnitude of EKC's investment in physical assets subject to depreciation, the adjustment of depreciable lives (and, thus depreciation rates) of existing generating assets to reflect the lives included in Evergy's annual Integrated Resource Plan (IRP), and the inclusion of the costs of dismantling retired plants; (4) the allocation of common use billings to EKC; (5) the expiration of the Company Owned Life Insurance (COLI) program; and (6) the loss of revenues from

the expiration of three wholesale contracts that have terminated since EKC's last rate case. EKC also made several other proposals regarding its capital structure, the request of recovery for an Accounting Authority Order (AAO) related to COVID-19, resource adequacy (specifically, the inclusion of the 8% portion of Jeffrey Energy Center (JEC) and Persimmon Creek Wind Farm in rates), and the continuation of the Critical Infrastructure Protection (CIPS)/Cybersecurity Tracker. There were three primary drivers behind EKM filing the rate case. These primary contributors to its requested revenue increase included: (1) an increase in the level of physical plant investment since EKM's 2018 rate case; (2) EKM's requested increase in the overall cost of capital from 7.0728% to 7.4282%; and (3) depreciation expense associated with new plant and the inclusion of dismantlement costs. Similar to EKC, EKM also made several other proposals regarding its capital structure, recovery of the AAO related to COVID-19, and continuation of its CIPS/Cybersecurity Tracker, as well as proposed changes to its jurisdictional allocators and the establishment of a storm reserve.

On August 29, 2023, the parties involved in the docket filed their direct testimony. Specifically, Staff filed its direct testimony, including schedules and exhibits, supporting a recommended base rate revenue requirement increase of \$109,524,553 for EKC and a base rate revenue requirement decrease of \$42,274,032 for EKM. After recognition of the offsetting effects of rebasing the RECA and PTS, the net impact to customers of Staff's revenue requirement recommendation is a net increase of \$34.7 million (+1.66%) for EKC and a net decrease of \$53.2 million (-7.32%) for EKM. Staff also recommended changes to Evergy's requested distribution of revenue between the customer classes, or Class Cost of Service (CCOS), and other policy, rate design and tariff recommendations. The Citizens' Utility Ratepayers Board (CURB), Kansas Industrial Consumers Group (KIC), and the United States Department of Defense (DOD) also filed revenue requirement, CCOS and rate

design testimony. The results of the base rate revenue requirement recommendations filed by these intervenors included an increase of \$166.3 million (net \$91.5 million) for EKC and a decrease of \$23.9 million (net \$34.8 million) for EKM as recommended by CURB; an increase of \$199.2 million (net \$124.4 million) for EKC and a decrease of \$9.0 million (net \$19.9 million) for EKM as recommended by KIC; and an increase of \$234.1 million (net \$159.3 million) for EKC and an increase of \$6.4 million (net \$4.5 million) as recommended by the DOD. On September 5, 2023, KIC filed cross-answering testimony updating its revenue requirement recommendations to an increase of \$160.4 million (net \$85.6 million) for EKC and a decrease of \$18.5 million (net \$29.4 million) for EKM. Other intervenors also filed direct and cross-answering testimony primarily addressing CCOS and rate design issues.

On September 18, 2023, Evergy filed rebuttal testimony responding to the direct and cross-answering testimony that was filed by the parties. Beginning on September 21, 2023, the Parties met collectively to discuss the possible settlement of contested issues in this matter. Settlement discussions were ongoing through the week of September 25, 2023, until a final Settlement was reached. After negotiations, the parties agreed unanimously to a revenue requirement increase of \$148.8 million (+11.75%), which equates to a net impact of \$74 million (+3.54%) after the rebasing of the RECA and PTS, for EKC and a revenue requirement decrease of \$22 million (-3.89%), which equates to a net decrease of \$32.9 million (-4.53%) after the rebasing of the PTS, for EKM.

On September 29, 2023, the Parties filed a Joint Motion for Approval of Unanimous Settlement Agreement (Settlement Agreement), supporting the agreed-upon revenue changes for EKC and EKM and also containing other provisions in the settlement that addressed all other disputed issues present in the case. Subsequently, on October 9, 2023, the Commission held a hearing on the Settlement Agreement.

The Commission issued an Order approving the Unanimous Settlement Agreement in its entirety on November 21, 2023. In the Order, the Commission stipulated that Evergy's new rates would take effect on the billing cycle date beginning December 21, 2023.

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=75b40eaf-bc48-48f1-9162-596aeacbdcb>

SOUTHERN PIONEER ELECTRIC COMPANY

<i>Docket number</i>	<i>24-SPEE-688-RTS</i>
<i>Docket type</i>	<i>Electric</i>
<i>Date filed</i>	<i>01 May 2024</i>
<i>Action date</i>	<i>30 Jul 2024</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of the Annual Filing of Southern Pioneer Electric Company for Approval to Make Certain Changes to its Charges for Electric Services, Pursuant to the Consolidated Formula Based Ratemaking Plan Approved in Docket No. 19-SPEE-240-MIS.

On May 1, 2024, Southern Pioneer Electric Company (Southern Pioneer) filed an Application with the Commission requesting approval of annual adjustments to its retail rates and its retail and wholesale rates for the Local Access Delivery Service (LADS) over its 34.5kV sub-transmission system.

On May 9, 2024, the Citizens' Utility Ratepayer Board (CURB) was granted intervention in this Docket. Kansas Power Pool (KPP) was granted intervention on May 16, 2024.

Southern Pioneer's Formula Based Rate (FBR) mechanism allows it to make annual adjustments to its retail rates charged to customers receiving service off the Company's distribution system and its LADS rate charged to customers receiving service off its 34.5kV sub-transmission system, thereby enabling Southern Pioneer to achieve a 1.60 Debt Service Coverage (DSC) ratio for both of its systems, as required in Southern Pioneer's FBR Protocols.

Using the current FBR template, Southern Pioneer calculated (1) a net retail FBR adjustment of \$914,833, which was then allocated to its retail customer classes based on base revenues and converted to per kWh rate adjustments for each class; and (2) a LADS rate of \$4.34 per kilowatt (kW).

On July 12, 2024, Staff filed testimony recommending an adjustment to remove an additional \$28,545 of various expenses related to activities or programs that are not necessary to render safe and reliable electric utility service to customers (e.g., coffee, drinks, gifts, holiday parties, gym memberships). This exclusion ultimately decreased the proposed net retail FBR adjustment from \$914,833 to \$840,462. Staff's adjustment had no impact on the proposed \$4.34/kW LADS rate.

On July 19, 2024, Southern Pioneer filed testimony in response to Staff's testimony stating that it disagreed with Staff's disallowance of the \$28,545 of various expenses. However, Southern Pioneer also stated that this issue should not preclude the Commission from approving the final FBR adjustment and that it will accept the adjustment if the Commission approves it. On July 19, 2024, CURB filed testimony concurring with Staff's proposed adjustment.

This Docket also corresponds with Docket No. 24-SPEE-415-TAR, in which Southern Pioneer sought approval of various revenue neutral changes to its rate design and requested that the rate design changes be implemented together with the FBR rate adjustment approved in the 24-688 Docket. The per kWh FBR adjustments would then need to be modified to incorporate the updated rate design approved in the 24-415 filing. (See the legislative summary of the 24-415 Docket for a more detailed discussion of this matter.)

On July 30, 2024, the Commission issued an Order Approving Rate Adjustments approving the Application and Staff's proposed retail rate adjustment of \$840,462 and Southern Pioneer's proposed LADS rate of \$4.34/kW. The Commission approved Staff's recommendation that the FBR adjustment and rate design changes from the 24-415 Docket be implemented concurrently, followed by the updates to the per kWh FBR adjustments based on the newly approved rate design.

https://estar.kcc.ks.gov/estar/ViewFile.aspx/24-SPEE-688-RTS_Order_Approving_Rate_Adjustments.pdf?Id=2d0e6243-6b47-4f34-b1fd-e7bd2c121a8e

Major Dockets | ELECTRIC UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Electric Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.”

GENERAL INVESTIGATION ELECTRIC

<i>Docket number</i>	24-GIME-102-GIE
<i>Docket type</i>	Electric
<i>Date filed</i>	03 Aug 2023
<i>Action date</i>	n/a
<i>Commission action</i>	Open

In the Matter of the Investigation into the Principles and Priorities to be Established for Evaluating the Reasonableness of the Location of a Proposed Transmission Line in Future Line Siting Proceedings.

On August 3, 2023, the Commission filed an order opening the general investigation. In its order opening this Docket, the Commission directed Staff to propose a scope for the General Investigation into the principles and priorities to be established by the Commission for evaluating the reasonableness of the location of a proposed transmission line in future line siting proceedings.

Southwest Power Pool (SPP), Kansas Farm Bureau (KFB), Evergy, the Kansas Livestock Association (KLA), Grain Belt Express (GBX), ITC Great Plains, LLC (ITC), NextEra Energy Transmission Southwest, LLC (NEET Southwest), Sunflower Electric Power Corporation (Sunflower), and the Citizens’ Utility Ratepayer Board (CURB) were granted intervention in the docket.

On December 1, 2023, Staff filed its Report and Recommendation. The report recommends the general investigation focus on two categories: to provide insight and establish guidelines in line siting proceedings.

Staff’s first Report and Recommendation can be viewed here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202312011256581965.pdf?Id=a9530433-c003-45d3-ba92-afc94016a488>

The intervenors filed responses to Staff’s Report and Recommendation. On March 15, 2024, Staff filed a second Report and Recommendation. In part, the report

summarizes the intervenors comments to Staff’s first report. Additionally, Staff recommends the Investigation focus solely on establishing guidelines that should be considered in determining the reasonableness of the route.

Staff’s second Report and Recommendation can be viewed here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202403151541597992.pdf?Id=052b9e7b-0344-4452-b34a-49d8d6bfefa8>

Staff recommended the general investigation focus on establishing guidelines of land use parameters and construction practices that should be considered in determining the reasonableness of the route. By focusing on siting criteria, the Investigation will focus on the interaction between landowners and utilities. The need for a transparent landowner/utility interaction is the intent of the Kansas line siting statutes, and it is demonstrated by the statute requiring notice to landowners along a proposed route and a public hearing in the area of a proposed route.

Eight intervenors provided comments on Staff’s Second Report and Recommendation. On October 4, 2024, Staff filed a Report and Recommendation in Response to Intervenor Comments. In the report, Staff recommends six items be incorporated into the scope of the docket.

The Report in response to comments can be viewed here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202410041643246861.pdf?Id=e32de68a-54b9-4131-9745-9bddf350c5a2>

On November 1, 2024, a technical workshop was held at the KCC. On November 20, 2024, Staff is required to file a final report. A Commission order is due by December 20, 2024.

GRAIN BELT EXPRESS, LLC

<i>Docket number</i>	24-GBEE-790-STG
<i>Docket type</i>	Electric
<i>Date filed</i>	31 May 2024
<i>Action date</i>	30 Sep 2024
<i>Commission action</i>	Approved

In the Matter of the Application of Grain Belt Express, LLC for a Siting Permit for the Construction of Two 345 kV Transmission Lines and Associated Facilities through Gray, Meade, and Ford Counties, Kansas.

On May 31, 2024, Grain Belt Express (GBE) filed an application requesting that the Commission issue a siting permit establishing the route for two inter-related transmission lines and associated facilities as part of the previously Commission-approved “AC Collector System.” Five witnesses filed direct testimony on behalf of GBE. In addition to the line siting permit, the application and supporting testimony request the Commission find the necessity for and reasonableness of the location of the lines and associated facilities have been established.

The Application can be viewed here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202405311612066634.pdf?Id=6bc4e7ef-61ea-4b6a-a9ea-f1de8beb5602>

Sunflower Electric Corp, Boyd landowners, CMS Electric Cooperative, and ENGIE Group were granted intervention in the docket. On Jul 3, 2024, Staff filed testimony stating the project is necessary and the route is reasonable. Staff recommended the Commission conditionally approve the application. On July 23, 2024, Public Comments were filed. GBE provided rebuttal testimony and responses to public comments. August 7, 2024, Staff witness Paul Owings filed testimony. Staff recommended the Commission approve an alternative route proposed by GBE with additional requirements.

Staff’s Testimony can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/>

[S202408071600384841.pdf?Id=5662527c-9f00-4b49-abd6-0a5d3dd617f7](https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202408071600384841.pdf?Id=5662527c-9f00-4b49-abd6-0a5d3dd617f7)

On August 23, 2024, the intervenors filed a Joint Motion for Approval of Settlement Agreement The Settlement Agreement request the Commission issue an order approving the siting permit with specific conditions.

The Joint Motion for Approval of Unanimous Settlement Agreement can be viewed here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202408231645168878.pdf?Id=0181f9c6-e8eb-4014-997a-629c156c4ad0>

On September 26, 2024, the Commission issued Order Approving Unanimous Settlement Agreement in its entirety. The Unanimous Settlement Agreement is incorporated into the Order. The requirements are GBEE Shall: (1) develop and AC Collector System master plan, (2) limit future AC Collector line construction to the geographic area identified in the AC Collector line master plan, (3) make a compliance filing detailing whether the Bucklin-Dodge City Line will be single or double circuit, (4) file SPP studies with the Commission, (5) not install transmission facilities on easement property until it has executed an interconnect agreement, (6) if an agreement is not executed, involuntary easements will be returned, (7) measure EMF emissions, (8) consider large equipment when calculating minimum wire clearances.

GBE and the Boyd landowners request the Commission condition the siting permit on deferring the question of whether Boyd Alternative 2 is reasonable until after the close of the current proceeding, to allow (i) GBE to develop a routing analysis comparing the Bifurcated Route Options; (ii) legal notice to all landowners impacted by the Boyd Alternative 2 route; (iii) a second public hearing on Boyd Alternative 2 and the relevant portion of the Meade Proposed Route; and (iv) additional procedures necessary for the Commission to make a decision regarding the Bifurcated Route Options.

The Commission's Order Approving Unanimous Settlement Agreement can be viewed here:

SOUTHERN PIONEER ELECTRIC COMPANY

Docket number 24-SPEE-415-TAR
Docket type Electric
Date filed 30 Nov 2023
Action date 30 Jul 2024
Commission action Approved

In the Matter of the Application of Southern Pioneer Electric Company for Approval to Make Certain Revenue Neutral Changes to its Rate Design.

On November 30, 2023, Southern Pioneer Electric Company (Southern Pioneer) filed an Application with the Commission requesting to make certain revenue neutral changes to its rate design. These changes included a proposed increase to the present Customer Charge for Single Phase Residential customers from \$14.67 per customer per month to \$16.67.

On December 12, 2023, the Citizens' Utility Ratepayer Board (CURB) was granted intervention in this Docket.

On April 2, 2024, Staff filed direct testimony supporting the following recommendations: (1) approving Southern Pioneer's request to convert the current Residential and GSS Classes to the proposed Single and Three-Phase Classes; (2) approving Southern Pioneer's increased Customer Charge and adding a \$3.00 per kW demand charge for the Single and Three-Phase Classes; (3) approving Staff's proposed combination of the Single-Phase Class with the proposed Residential Space-Heating Class and eliminating the Residential space heating discount; (4) eliminating the space-heating General Service Large (GSL) class and folding those customers into the GSL class; and (5) approving Staff's proposed rate design for the combined Single-Phase Class and approve Southern Pioneer's proposed rate design for the Three-Phase Class.

On that same day, CURB filed direct testimony rejecting Southern Pioneer's proposed demand charges and maintaining the current Residential customer charge of \$14.67 per month, arguing the proposed demand charges are unreasonable and not in the public interest because: (1) residential consumers do not understand the concept of an electric bill component based on the maximum load placed on a system over a 15-minute interval; and (2) it is not reflective of cost causation due to the diversity that exists within the system as well as within each class.

On April 9, 2024, Staff filed supplemental

direct testimony recommending the Commission accept the proposed transition from a Delivery Energy Charge to a Delivery Demand Charge for the Transmission Level Service Class.

On April 11, 2024, CURB filed cross-answering testimony, disagreeing with Staff's recommendations to: (1) implement a mandatory demand charge for Residential and Small General Service customers, (2) increase the Residential fixed monthly customer charge, and (3) immediately eliminate the Residential Space Heating rate.

On May 3, 2024, Southern Pioneer filed rebuttal testimony asserting CURB provided no evidence to support his opposition to a Demand Charge or that Southern Pioneer's proposal is not readily understood by consumers. Likewise, Southern Pioneer argued CURB provides no support for its claim that the proposed demand charge does not reflect cost causation. Southern Pioneer notes CURB never claims that the Company's requested Customer Charge is high. Additionally, Southern Pioneer points to its direct testimony to illustrate that both the existing and requested Customer Charge are very low compared to many other electric utilities in Kansas.

Southern Pioneer further disputes CURB's suggestion that the overarching reason for the 3-part rate design relates to DG concerns. Instead, Southern Pioneer claims the 3-part rate is intended to produce a more equitable, cost-reflective structure that avoids cross-subsidization. Southern Pioneer also disagrees with CURB's suggestion that Southern Pioneer is trying to inhibit renewable generation. Since the 3-part rate will apply to all customers regardless of their DG status, Southern Pioneer does not believe it would be considered discriminatory. Southern Pioneer believes that postponing implementation of the three-part rate design, (1) will result in lost opportunities to provide the appropriate price signals to allow customers to make economically efficient DG decisions up front without post-DG implementation impact, and (2) will delay efforts to secure fair and equitable rates for all customers.

On May 16, 2024, the Parties filed a Unanimous, Partial Settlement, resolving all but two of the issues: (1) adoption of a residential Customer Demand Charge, and

(2) the Customer Charge increase. Some of the key provisions of the settlement include:

- Accepting Southern Pioneer’s proposal to transition from the Residential and GSS Classes to the Single and Three-Phase Classes;
- Accepting Staff’s recommendation to fold the Residential Space-Heating Class into the proposed Single-Phase Class, but phase it in to avoid any rate shock;
- Accepting Staff’s recommendation to fold the General Service Large Space-Heating Rider into the General Service Large Class and eliminating the Space-Heating Rider; and
- Accepting Southern Pioneer’s Class COS results only for determining the average cost of purchased power per kWh used in apportioning any Net Operating Income Adjustments resulting from Southern Pioneer’s Annual Formula-Based Rate Annual Update filings.

On June 4, 2024, the Commission held an evidentiary hearing. The Parties appeared by counsel and each party submitted pre-filed testimony. The Commission heard live testimony from Southern Pioneer, CURB, and Staff. The witnesses were subject to cross-examination, and the parties were given the opportunity for redirect examination.

On June 17, 2024, Southern Pioneer filed its post-hearing brief.

On June 26, 2024, Staff and CURB each filed their post-hearing briefs.

On July 3, 2024, Southern Pioneer filed its post-hearing reply brief.

This Docket also corresponds with Docket No. 24-SPEE-688-RTS, in which Southern Pioneer sought approval of annual adjustments to its retail rates and its retail and wholesale rates for the Local Access Delivery Service (LADS) over its 34.5kV sub-transmission system. (See the legislative summary of the 24-688 Docket for a more detailed discussion of this filing.) Southern Pioneer has requested that the rate design changes approved in the 24-415 Docket be implemented together with the FBR rate adjustment approved in the 24-688 Docket. The FBR adjustments from the 24-688 Docket would then be modified to incorporate the updated rate design approved in the 24-415 Docket filing.

On July 30, 2024, the Commission filed

its Order Approving Unanimous, Partial Settlement and Granting Application ordering:

(A) The Unanimous, Partial Settlement is approved in its entirety. The terms of the attached Unanimous, Partial Settlement are incorporated into this Order.

(B) Southern Pioneer’s mandatory three-part rate structure for Residential and General Service Small customers is approved.

(C) Southern Pioneer’s proposed \$3.00 per kW Demand Charge for Residential and General Service Small customers is approved.

(D) Southern Pioneer’s proposal to increase the Residential Customer Charge to \$16.67 is approved.

Additionally, the Commission approved Staff’s recommendation that the FBR adjustment from the 24-688 Docket and the rate design changes from the 24-415 Docket be implemented concurrently, followed by the updates to the per kWh FBR adjustments based on the newly approved rate design.

https://estar.kcc.ks.gov/estar/ViewFile.aspx/24-SPEE-415-TAR_Order_on_Unanimous_SA.pdf?Id=ccb03d6d-3e64-423b-b0c1-c08d9a88eccc

SOUTHERN PIONEER ELECTRIC COMPANY

<i>Docket number</i>	<i>24-SPEE-540-TAR</i>
<i>Docket type</i>	<i>Electric</i>
<i>Date filed</i>	<i>13 Jan 2024</i>
<i>Action date</i>	<i>24 Sep 2024</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of Application of Southern Pioneer Electric Company for Approval of its Renewable Energy Rider Tariff.

On January 31, 2024, Southern Pioneer Electric Company (Southern Pioneer) filed an Application requesting approval of a Renewable Energy Program to be implemented under its Renewable Energy Rider tariff. The program is designed to give customers voluntary access to renewable energy generation, without the need for the customer to own, install, or maintain the system themselves. The Renewable Energy Rider proposes a two-class structure, one for Commercial and Industrial customers, and one for Residential customers. The proposal also consists of a Wind Division and a Solar Division, with each division having multiple tiers. Both the Wind and Solar Divisions would have different qualification

requirements and participation limitations, including size requirements, customer participation limits, and total participation limits. The Application can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202401311307212361.pdf?Id=047fed73-4f28-4004-abd7-4ecc8702ec2e>

On May 31, 2024, Staff filed a Report and Recommendation in the Docket recommending approval of the Renewable Energy Rider subject to three conditions. This Report can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202405311526491684.pdf?Id=0b5e9aaf-bee3-4987-8a71-33daab69cd2e>

On June 16, 2024, interveners had the opportunity to respond to Staff’s Report and Recommendation. Both CURB and Southern Pioneer filed written comments generally agreeing with Staff’s recommendations. No other interveners filed written comments on Staff’s Report and Recommendation.

On June 25, 2024, Southern Pioneer, Staff, and CURB filed a Settlement Agreement, which can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202406250923378515.pdf?Id=44bc1e25-ee8f-4f99-96a0-5f9f478f5ebc>

The Settlement agreement accepted Staff’s recommendations. National Beef and Air Products did not endorse Staff’s recommendations, but stated they did not oppose the Settlement Agreement.

On September 24, 2024, the Commission issued an Order approving the Settlement Agreement, finding it to be just and reasonable and in the public interest. The Order can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20240924110231673.pdf?Id=01460539-20c1-4e88-91d8-1207103a9382>

WOLF CREEK NUCLEAR OPERATING CORPORATION, EVERGY KANSAS METRO, EVERGY KANSAS CENTRAL, EVERGY KANSAS SOUTH, AND KANSAS ELECTRIC POWER COOPERATIVE, INC.

<i>Docket number</i>	<i>24-WCNE-235-GIE</i>
<i>Docket type</i>	<i>Electric</i>
<i>Date filed</i>	<i>01 Sep 2023</i>
<i>Action date</i>	<i>15 Aug 2024</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of the 2023 Wolf Creek Triennial Decommissioning Financing Plan.

On September 1, 2023, Wolf Creek

Nuclear Operating Corporation, Evergy Kansas Metro, Evergy Kansas Central, Evergy Kansas South, and Kansas Electric Power Cooperatives, Inc (collectively, Joint Applicants) submitted the 2023 triennial Decommissioning Cost Study and Decommissioning Financing Plan for Wolf Creek Generating Station as required by K.S.A. 66-128m, 66-128o, and prior Commission orders. The Joint Applicants' filing can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=4c004b95-6e2b-4446-b797-d9b19fd1a80c>

On May 10, 2024, Commission Staff filed Direct Testimony responding to the Joint Applicants' Triennial Decommissioning Cost Study and Decommissioning Financing Plan. Commission Staff's testimony can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=6819846d-c0df-48f2-99c2-eac1e5454c45>

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=66f1f41b-d07d-4cf1-81e3-098371d86467>

On June 10, 2024, the Joint Applicants filed Rebuttal Testimony to Commission Staff's testimony. The Joint Applicants' Rebuttal Testimony can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=b5b4e093-662e-473b-a580-d717ad2fb3a9>

On June 21, 2024, the Joint Applicants and Commission Staff filed Joint Motion to Approve Stipulation and Agreement to adopt the findings of the Joint Applicants' Triennial Decommissioning Cost Study and Decommissioning Financing Plan. Joint Applicants agree to Commission Staff's proposal that future triennial filings include discussions of licensing extension for Wolf Creek Nuclear Generating Station beyond its current 60-year license term.

The Joint Motion to Approve Stipulation Agreement can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=b027d347-43d1-402c-a777-ffd13b54a1e1>

On August 15, 2024, the Commission issued an Order adopting the Stipulation and Agreement. The Commission's Order can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=d8be3fdb-55b9-4e85-80b6-8b73d03945dc>

EVERGY KANSAS CENTRAL, INC.

Docket number 24-EKCE-387-CPL
Docket type Electric
Date filed 09 Nov 2023
Action date n/a
Commission action Pending

In the Matter of the Triennial Compliance Docket for the Integrated Resource Plan of Evergy Central, Inc. & Evergy Kansas Metro, Inc. Pursuant to the Commission's Order in Docket No. 19-KCPE-096-CPL.

On November 9, 2023, both Evergy Kansas Central, Inc. and Evergy Kansas Metro, Inc. (collectively Evergy) filed a compliance docket as a repository for its Triennial Integrated Resource Plan (IRP) filing, which was made on May 17, 2024. Evergy's IRP called for the addition of Solar Generation in the amounts of 600 MW in 2027 and 450 MW in 2028, in addition to 2,500 MW of new hydrogen-capable natural gas generation between 2029 and 2032. This is an increase of 1,900 MW over the 2023 IRP filing. Evergy's filing explained that this new generation was necessary because of record-setting economic development occurring in Evergy's service territories. Evergy's plan also called for the retirement of 4,500 MW of Coal Fired Generation over the next 20-years. An infographic highlighting the resource addition and retirements over time is included here:

https://filecache.mediaroom.com/mr5mr_evergy/179178/IRP_Graphics_2024_1318066823.jpg

The Executive Summary of the filing can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202405171636278292.pdf?Id=d061e603-5d8d-4580-97b3-1948746bfc6e>

The full filing can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202405171642455162.pdf?Id=dd58c3ca-cb3f-463b-970e-a88ed71d76c9>

The Commission approved several motions to intervene from area utilities, environmental advocacy organizations, the Citizens Utility Ratepayer Board (CURB), and others. The filed comments can be found here:

Sierra Club:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202410141316526294.pdf?Id=22d98dd9-4ec5-44b1-9359-3a602213dca9>

CURB:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202410150908081951.pdf?Id=92cb34f5-806f-4465-99c4-0daecca21c7e>

On October 14, 2024, Staff filed its Report and Recommendation in response to Evergy's Triennial IRP filing. Staff's high level conclusions were as follows:

1. Evergy's 2024 IRP is consistent with the IRP framework adopted in 2020;
2. Evergy has applied a reasonable methodology, incorporating a number of recommendations from prior reviews of IRPs and annual updates;
3. Given the high degree of uncertainty across factors critical to the IRP results, such as load, SPP resource accreditation and reserve requirements, and equipment cost and availability, it is essential that Evergy evaluate the impact of changing circumstances at least annually, and clearly identify decision points for key actions, particularly hard commitments for resource retirement;
4. Because of the high degree of uncertainty over resource needs over the next five to ten years, Evergy should evaluate further alternatives to definitive retirement, particularly for the Lawrence and Jeffrey units. Such alternatives could include seasonal shutdown, mothballing, or conversion to alternative fuel sources like natural gas; and
5. Solar and solar plus battery storage, appear to be valuable in meeting resource need cost effectively, particularly in the near term. Evergy should pursue such options through competitive procurement processes, including an evaluation of potential power purchase agreement (PPA) alternatives.

The full Staff filing can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202410141622555626.pdf?Id=39c263d9-0175-4487-a2ac-ce890c987760>

The parties will now discuss whether a plan can be developed to resolve any difference of opinion regarding the filing, and if not, Evergy will file comments in response to intervenor concerns. A Commission Order will follow addressing whether Evergy's IRP filing appropriately followed the framework and guidelines established by the Commission for IRPs.

Dockets

LARGE ELECTRIC UTILITIES (revenues of more than \$10M)

The Commission acted upon the following dockets filed by Large Electric Utilities from July 1, 2023 to June 30, 2024. These filings involved companies with operating revenues of more than \$10,000,000.

EVERGY KANSAS CENTRAL, INC.

Docket number 24-EKCE-398-CCS
Docket type Electric
Date filed 20 Nov 2023
Action date 26 Mar 2024
Commission action Granted

In the Matter of the Application of Evergy Kansas Central, Inc for Authority to Cease Transacting the Business of an Electric Public Utility Specifically, in Section 32 T12S R19E in Douglas County, Kansas.

EVERGY KANSAS CENTRAL, INC.

Docket number 24-EKCE-396-CCS
Docket type Electric
Date filed 17 Nov 2023
Action date 23 Jan 2024
Commission action Granted

In the Matter of the Application of Evergy Kansas Central, Inc for Authority to Cease Transacting the Business of an Electric Public Utility Specifically, in Section 35, Township 29 South, Range 16 East in Wilson County, Kansas.

SOUTHERN PIONEER ELECTRIC COMPANY

Docket number 24-SPEE-462-TAR
Docket type Electric
Date filed 22 Dec 2023
Action date 18 Jan 2024
Commission action Granted

In the Matter of Southern Pioneer Electric Company's 2023 Property Tax Surcharge Filing for 2024 Rates.

EVERGY KANSAS CENTRAL, INC.

Docket number 24-EKCE-469-TAR
Docket type Electric
Date filed 29 Dec 2023
Action date 25 Jan 2024
Commission action Granted

In the Matter of Evergy Kansas Central Property Tax Surcharge for 2024.

EVERGY KANSAS CENTRAL, INC.

Docket number 24-EKCE-472-COC
Docket type Electric
Date filed 02 Jan 2024
Action date 20 Feb 2024
Commission action Granted

In the Matter of the Application of Evergy Kansas Central, Inc for a Certificate of Public Convenience and Authority to Transact the Business of an Electric Public Utility Defined as 345kV Transmission Line in Various Sections of Pottawatomie and Wabaunsee Counties, Kansas.

EVERGY METRO, INC.

Financials

The following are selected Gross Plant, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar year basis.

GAS COMPANIES STATEWIDE GROSS PLANT | 2019-2023

Gross Plant is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility's rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total gross plant of all regulated public utilities in Kansas for the past five years.

GAS COMPANIES GROSS PLANT, BY COMPANY | 2023

This chart takes the statewide aggregate gross plant figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, one entity encompasses a vast majority of utility gross plant across Kansas.

GAS COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2023

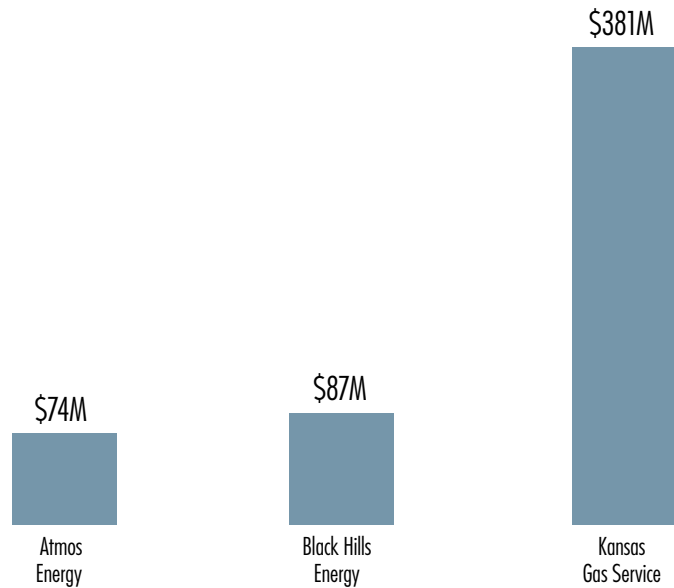

This chart compares each utility's annualized revenues and expenses and the difference between the two represents the gross margin of each company.

■ Total Revenues
■ Total Expenses

GAS COMPANIES PURCHASED GAS COSTS, BY COMPANY | 2023

This chart takes the expense portion from each utility on the previous table and carves out the cost of purchased gas.

TOTAL PURCHASED GAS (GAS UTILITIES) AND TOTAL PURCHASED FUEL FOR GENERATION (ELECTRIC UTILITIES) | 2022 - 2023

This chart shows the total natural gas purchased for utility use for the last two years. Each column bar is broken down into blue and yellow portions. The blue represents gas purchased by the gas utilities for regulated delivery to their retail and wholesale customers. The yellow represents natural gas “fuel” purchased by electric utilities for natural gas-fired generation of electricity. Whereas the bulk of retail gas use (blue) is for winter heating, utility gas fuel use is predominantly during peak electric usage summer months where baseload nuclear and coal generation have already been dispatched and the remaining load must be served by gas-fired generation.

GAS UTILITIES WITH REVENUES OF OVER \$10M | RATE CASE RESULTS | FY20–FY24

■ Requested
■ Granted
■ Refunds and/or Rate Reductions

RESIDENTIAL GAS BILL COMPARISON | JULY 2023 - JUNE 2024

The following chart represents a comparison of monthly bills based on average residential consumption of 5.651 Mcf.

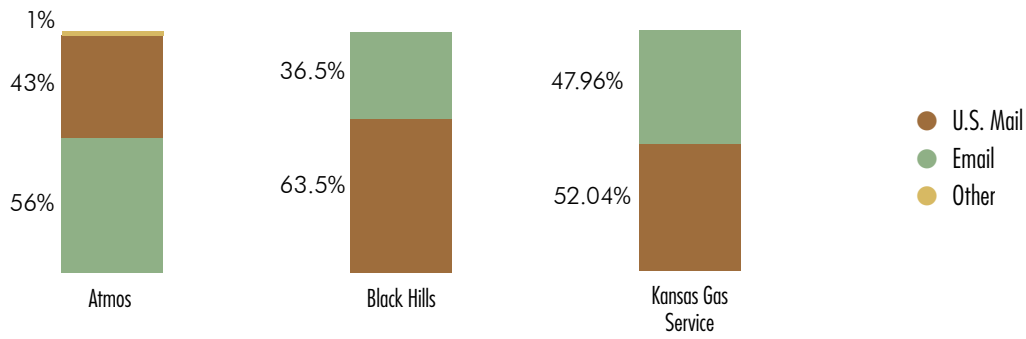

Company**	Customer Charge	Delivery Charge	Cost of Gas	Hedge Factor	Winter Storm Uri	GSRS per Meter/Month	Property Tax	Total Bill Without Tax	Cost Per MCF	Utility Bill as a % of National Avg. KANSAS GAS SERVICE

Docket number 24-KGSG-610-RTS
Docket type Gas
Date filed 01 Mar 2024
Action date 03 Oct 2024
Commission action Approved

In the Matter of the Application of Kansas Gas Service, a Division of ONE Gas, Inc. for Adjustment of its Natural Gas Rates in the State of Kansas.

On March 1, 2024, Kansas Gas Service, a Division of ONE Gas, Inc. (KGS) filed an Application to make changes in its rates and charges for natural gas service. KGS's Application indicated a gross revenue deficiency of \$93.1 million. After rebasing the gas system reliability surcharge (GSRS) currently collected from customers, the net impact of KGS's requested revenue requirement is an increase of \$58.1 million. The company cited the following factors as drivers of the rate increase: (1) significant investment in KGS's distribution system since its last rate case resulting in changes to rate base, depreciation proposed weighted average cost of capital, and Ad Valorem expense; (2) increases in operations and maintenance (O&M) expense, that continue to rise, such as employee wages and benefits and costs for materials and supplies; (3) a proposal to establish an authorized Return on Equity (ROE) of 10.25 percent; (4) a proposal to implement a performance-based ratemaking mechanism, the Annual Performance-based Rate Adjustment (APRA), that would provide for an annual review and adjustment of the Company's cost of operations and actual return on equity; (5) a proposal to implement a two-part A/B rate plan separating residential customers into two subclasses based on usage levels to provide customers more options to control their bills; (6) a proposal to update depreciation rates based on the 2023 Depreciation Rate Study conducted by Foster Associates, Inc.; (7) a proposal to allow a portion of financially based executive and officer incentive compensation be included in the cost of service; and (8) a proposal to resume collecting disconnection and reconnection charges that were suspended as part of the Knock and Collect Waiver Pilot Program,

approved June 19, 2020, in Docket No. 15-GIMX-344-GIV (15-344 Docket).

On July 1, 2024, the parties filed their direct testimony. In its direct testimony, Staff recommended an increase of \$66.7 million, including the GSRS rebasing in the amount of \$35 million; and CURB recommended a decrease of \$45.8 million, including the GSRS rebasing. Both parties opposed KGS's proposals to establish a performance-based ratemaking mechanism, implement a two-part A/B rate plan, and allow a portion of financially based executive and officer incentive compensation be included in the cost of service. WoodRiver Energy, LLC. intervened in this Docket but did not file direct testimony.

On July 22, 2024, KGS filed rebuttal testimony responding to the direct testimonies that were filed by Staff and CURB. The parties met collectively on July 31, 2024, to discuss the possible settlement of issues in this matter. After negotiations, the parties agreed unanimously to an overall annual increase in base rates of \$70 million, including the GSRS rebasing.

On August 2, 2024, the parties filed a Joint Motion to Approve Settlement Agreement, supporting the agreed-upon revenue increase and other provisions that address all other disputed issues presented in this case. On August 9, 2024, testimony in support of the settlement was file by the parties.

The Commission held a hearing on the Settlement Agreement on August 13, 2024. The unanimous settlement agreement was approved by the Commission on October 3, 2024.

Major Dockets | GAS UTILITIES

KANSAS GAS SERVICE, A DIVISION OF ONE GAS, INC.

<i>Docket number</i>	23-KGSG-719-TAR
<i>Docket type</i>	Gas
<i>Date filed</i>	31 Mar 2023
<i>Action date</i>	28 Dec 2023
<i>Commission action</i>	Approved

In the Matter of the Application of Kansas Gas Service, a Division of ONE Gas, Inc. for Approval of Revisions to Certain Tariffs Controlling Transportation Service.

This Docket was opened on March 3, 2022, as a result of the lessons learned in the aftermath of Winter Storm Uri, and the general investigations that ensued.

On March 31, 2023, KGS filed an Application seeking several revisions to its transportation tariffs, seeking to improve or revise the tariffs to account for the lessons learned after Winter Storm Uri. The Application can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202303311646264889.pdf?Id=7f764c37-84df-42ca-9a9c-7f45a63c814d>

Several natural gas marketers that are active in the natural gas transportation market in Kansas intervened in the case, as well as Sunflower Electric Power Cooperative (Sunflower), Atmos Energy, and Kansas Municipal Gas Agency (KMGA).

On September 22, 2023, the Parties all filed a Unanimous Settlement Agreement with the Commission. The Agreement can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202309221454415728.pdf?Id=33a2269f-c72f-46e9-99b0-7df2788e535f>

The Agreement called for several important revisions and improvements to KGS's transportation tariffs, including a mechanism to compensate gas marketers and others (like Sunflower and KMGA) for instances in which they deliver more natural gas to the KGS system than they use, during periods of extremely high demand coupled with very high gas prices. This mechanism makes it possible for shippers on the KGS system to be compensated for taking actions which improve the reliability of the natural gas

or electric systems in Kansas, either by supplying more gas when it is sorely needed, or by consuming less.

The Agreement also called for lowering the maximum penalty that can be assessed during events like Winter Storm Uri. The Agreement calls for changes to the way these penalties are calculated, from the greater of a less significant dollar amount per MMBtu (\$5 to \$20) or a multiple of the Gas Daily Index, to the lesser of a much more significant dollar amount per MMBtu (\$15 to \$100), plus the underlying Gas Daily Index, or a multiple of the Gas Daily Index.

This allows any potential penalties to not be so draconian as to cause severe distress on the Kansas Economy, while at the same time ensuring that they convey the intended punitive effect in order to incent compliance with KGS's critical directives during times of system stress, such as an Operational Flow Order or Period of Curtailment.

Additionally, the Agreement called for all transportation customers, with the exception of School customers and Irrigation customers using less than 3,000/Mcf/year, to install EFM equipment by January 15, 2027, or be converted to Sales Service. For Schools using more than 3,000 Mcf/year, KGS agreed to pay for the EFM installation for these customers, with KGS recovering its actual costs of conversion plus a carrying charge at the approved rate of return used for the Gas Safety Reliability Surcharge.

Lastly, the Agreement called for revising the Cash Out price that KGS pays transportation customers, or that transportation customers pay KGS, in the event of delivery imbalances at the end of the billing month. These changes improved the incentive that transportation customers have to stay in balance by the end of the month, which lowers the likelihood of subsidization between the sales and transportation customer classes.

The Commission approved the Unanimous Settlement Agreement on December 28, 2023.

AMERICAN ENERGIES GAS SERVICE AND KANSAS GAS SERVICE, A DIVISION OF ONE GAS, INC.

<i>Docket number</i>	24-KGSG-284-ACQ
<i>Docket type</i>	Gas
<i>Date filed</i>	22 Sep 2023
<i>Action date</i>	02 Jun 2024
<i>Commission action</i>	Approved

In the Matter of the Joint Application of American Energies Gas Service, LLC/ American Energies Pipeline, LLC and Kansas Gas Service, a Division of ONE Gas, Inc. for an Order Approving the Transfer to Kansas Gas Service Certificates of Convenience and Necessity with Respect to AEGS's Natural Gas Utility Business and AEPL's Pipeline Facilities Located in Harvey, Marion, and McPherson Counties, Kansas to Provide Utility Service and for Other Related Relief.

On September 22, 2023, American Energies Gas Service, LLC, (AEGS) American Energies Pipeline, LLC, (AEPL) and Kansas Gas, a Division of ONE Gas, Inc. (KGS) (collectively the Joint Applicants) filed an application seeking an order from the Commission; 1) approving the transfer from AEGS to KGS certificates of convenience and necessity to operate as a natural gas utility; 2) approving an asset purchase agreement entered into by the Joint Applicants, and authorizing the transfer and sale from AEGS and AEPL to KGS the assets used to provide utility service to customers located in Harvey, Marion, and McPherson Counties, Kansas; 3) authorizing KGS to, generally, use its Commission-approved rates and general terms and conditions for AEGS's customers; 4) authorizing KGS to implement a new wholesale transportation rate for service provided to the City of Hesston, Kansas; 5) authorizing KGS to exempt AEGS's customers from KGS's Winter Event Securitized Cost Recovery Rider, and instead authorize KGS to assume and continue the remainder of AEGS's 2021 Winter Weather Event Rider; 6) authorizing AEGS to convert five existing customers served by AEGS to propane service because the cost to

replace the AEPL pipeline facilities used to serve those customers is uneconomical; 7) authorizing AEGS and AEPL to cease providing natural gas public utility service to customers in Kansas upon the transfer of AEGS's certificates to convenience and necessity, AEPL's pipeline facilities, and AEGS/AEPL's obligations and responsibilities as a public utility to KGS; 8) authorizing KGS, for accounting and ratemaking purposes to record the purchase price of the AEGS/AEPL system assets at the net book value of the assets; and 9) for other such relief that is found to be necessary by the Commission as just and reasonable in this matter.

The Joint Application can be viewed here: <http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=f0875cff-0b12-47ad-b830-53446dfe86b0>

On February 19, 2024, Commission Staff filed its Report and Recommendation regarding the Joint Application of KGS, AEGS, and AEPL. Commission Staff's evaluated the transaction using the Commission's merger standards.

Commission Staff's Report and Recommendation can be viewed here: <http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=d17f8a53-65e2-4346-b1ba-7fa23e0d46e8>

On March 3, 2024, AEGS, AEPL, KGS, Commission Staff, the Citizens' Utility Ratepayer Board, and Kansas Municipal Gas Agency filed Joint Motion for Approval of Unanimous Settlement Agreement and Modification of the Procedural Order. The Settlement Agreement request the Commission issue an order approving the acquisition in accordance with the Asset Purchase Agreement subject to the conditions; 1) KGS amortize transaction costs over 10 years; 2) the requested certificate expansion be modified to exclude territory in Harvey County that has been previously certificated to Black Hills Energy; and 3) the rates associated with the new KGS tariff for service to the City of Hesston would not be charged as a part of the 24-KGSG-610-RTS Docket.

The Joint Motion for Approval of Unanimous Settlement Agreement and Modification of the Procedural Order can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=f017914b-4258-4e64-a136-d0064e552dad>

KANSAS GAS SERVICE, A DIVISION OF ONE GAS, INC.

<i>Docket number</i>	23-KGSG-719-TAR
<i>Docket type</i>	Gas
<i>Date filed</i>	05 Sep 2023
<i>Action date</i>	16 Jul 2024
<i>Commission action</i>	Approved

In the Matter of the Joint Application of Kansas Gas Service, a Division of ONE Gas, Inc. for Approval of Its Purchase of Southern Star Central Gas Pipeline, Inc.'s Facilities Used to Furnish Natural Gas Service to Certain Customers and Approval of Customer-Specific Certificates of Public Convenience and Necessity to Serve Said Customers.

On September 5, 2023, Kansas Gas Service, a Division of ONE Gas, Inc. (Kansas Gas Service) pursuant to K.S.A. 66-117, and K.S.A. 66-131 requests approval of an Asset Purchase Agreement executed between Kansas Gas Service and Southern Star Central Gas Pipeline, Inc. (Southern Star) transferring certain assets, customers, and accounts related to farm tap and irrigation customers from Southern Star to Kansas Gas Service, and issue Kansas Gas Service customer-specific certificates of convenience and necessity to serve certain farm tap and irrigation customers.

Public Application to Purchase Domestic Meter Facilities and Customers filed by Kansas Gas Service can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=963ebcc5-1a6f-458f-bde3-56412b8bala8>

On March 15, 2024, Kansas Gas Service filed testimony in support of its application, applying the Commission's long-established Merger Standards to demonstrate the proposed transaction is in the public interest and should be approved by the Commission.

The testimony filed by Kansas Gas Service can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=c51aacc48-3448-4f17-9fad-60789d73cd96>

On May 1, 2024, Commission Staff filed Notice of Filing Staff Report and Recommendation providing Commission Staff's analysis and application of the Commission's Merger Standards. Commission Staff recommends approval of the Asset Purchase Agreement as requested in the September 5, 2023, Application with the addition of conditions to protect existing customers from potential costs caused by the acquisition.

Commission Staff's Report and Recommendation can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=fb3d1edc-837c-4254-8499-5ecfbb6dd823>

On June 7, 2024, parties to the docket filed Joint Motion for Approval of Unanimous Settlement Agreement and Modifications of the Procedural Order requesting the Commission approve a unanimous, comprehensive agreement that settles all relevant issues to this docket. Specifically, the unanimous agreement modifies the transaction price in order to address concerns raised by Commission Staff in its Report and Recommendation.

The Joint Motion can be viewed here:

BLACK HILLS ENERGY

<i>Docket number</i>	24-BHCG-652-ACQ
<i>Docket type</i>	Gas
<i>Date filed</i>	29 Mar 20234
<i>Action date</i>	n/a
<i>Commission action</i>	Not Final

In the Matter of the Application of Black Hills Energy for Acquisition and Tariff Revision in the State of Kansas.

On March 29, 2024, Black Hills Energy (Black Hills) filed an Application to approve the transfer of certain assets, customers, and accounts related to farm taps from Southern Star Central Gas

Pipeline, Inc. (“Southern Star”) to Black Hills under an Asset Purchase Agreement (“APA”) executed between Black Hills and Southern Star and to issue customer-specific certificates of convenience and necessity for Black Hills to serve these farm tap customers. In conjunction with this request, Black Hills also requests that the Commission approve additional language within the Applicant’s tariff that would exempt newly acquired customers, meeting certain criteria, from the Storm Uri Gas Charge.

On February 28, 2024, in Docket Number CP24-22-000, Southern Star received FERC regulatory approval to abandon by sale approximately 273 Domestic Meters in the state of Kansas to Black Hills. These assets are being sold pursuant to an Asset Purchase Agreement (“APA”), dated November 2, 2023.

On April 8, 2024 Black Hills filed testimony in support of the acquisition.

This Docket remains under review by the Commission, with a final order due by January 23, 2025.

TELECOMMUNICATION UTILITIES RECEIVING KUSF SUPPORT | FY20–FY24

NUMBER OF KUSF TELECOMMUNICATION FILINGS | FY20–FY24

KUSF FUNDING OBLIGATIONS | 3/1/24 - 2/29/25

Major Dockets | LARGE TELECOM UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Telecom Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.”

GENERAL INVESTIGATION

Docket number 20-GIMT-387-GIT
Docket type Telecom
Date filed 12 Mar 2020
Action date 25 Sep 2024
Commission action Order Issued

In the Matter of a General Investigation into the Interconnection, Porting, Evolving Technology, and the Impacts on Consumer Choices in Kansas.

The KCC opened this proceeding for the purpose of determining local exchange carriers’ obligations to interconnect, port numbers, complete calls, and other obligations they may have in consideration of evolving technologies, including Voice over Internet Protocol (VoIP), and the impact on consumer choices.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20200312103926.pdf?Id=05af2158-2569-43f3-8ab9-9cf7578c48f8>

On March 23, 2021, the Commission issued an Order determining all carriers must port numbers and complete calls pursuant to FCC rules and finding the Commission does not have jurisdiction over VoIP interconnection.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20210323102959.pdf?Id=199ec6bd-03c1-4a18-953c-c3d082bdb1f9>

On April 7, 2021 the Rural Local Exchange Carriers (RLECs) submitted a Petition for Clarification on Commission Jurisdiction. On May 11th, 2021, the Commission issued an Order clarifying that Telecommunication carriers, including local exchange carriers, are obligated to provide number porting to interconnected VoIP providers, without unreasonable delay or unreasonable procedures that have the effect of denying or delaying porting.

[https://estar.kcc.ks.gov/estar/ViewFile.aspx/20-387_Order_on_Motion_for_Clarification_\(Final\).pdf?Id=94f23a29-e7cf-4f92-b5f9-4862085d72e3](https://estar.kcc.ks.gov/estar/ViewFile.aspx/20-387_Order_on_Motion_for_Clarification_(Final).pdf?Id=94f23a29-e7cf-4f92-b5f9-4862085d72e3)

On May 11, 2021, Order on Petition for

Clarification was filed. The Commission Orders Telecommunications carriers, including local exchange carriers, are obligated to provide number porting to interconnect VoIP providers, without unreasonable delay or unreasonable procedures that have the effect of denying or delaying porting.

[https://estar.kcc.ks.gov/estar/ViewFile.aspx/20-387_Order_on_Motion_for_Clarification_\(Final\).pdf?Id=94f23a29-e7cf-4f92-b5f9-4862085d72e3](https://estar.kcc.ks.gov/estar/ViewFile.aspx/20-387_Order_on_Motion_for_Clarification_(Final).pdf?Id=94f23a29-e7cf-4f92-b5f9-4862085d72e3)

Issues regarding interconnection between the RLECs and other providers and, specifically, interconnected Voice over Internet Protocol (VoIP) providers continue, resulting in consumer choice being impacted. The Commission will continue to address issues, including the costs of interconnection, as necessary or pending any FCC rulings.

GENERAL INVESTIGATION

Docket number 22-GIMT-229-GIT
Docket type Telecom
Date filed 12 Oct 2023
Action date 25 Jan 2024
Commission action Order Issued

In the Matter of An Investigation to Determine the Annual Assessment Rate for the Twenty-Eighth Year of the Kansas Universal Service Fund, Effective March 1, 2024.

This proceeding was opened on October 12, 2023, to determine the appropriate assessment rate for the twenty-eighth year of the KUSF.

https://estar.kcc.ks.gov/estar/ViewFile.aspx/24-GIMT-229-GIT_ORDER.pdf?Id=542ea9c2-1dcd-42e2-8f37-8bf5c99399bb

The KCC issued an Order on January 30, 2024, in which it adopted a KUSF assessment rate of 11.69 percent for March 1, 2024, to February 28, 2025.

https://estar.kcc.ks.gov/estar/ViewFile.aspx/24-GIMT-229-GIT_Order_Adopting.pdf?Id=5004cef8-ca43-4a90-9056-b19e0579f85b

GENERAL INVESTIGATION

Docket number 22-GIMT-612-GIT
Docket type Telecom
Date filed 21 Mar 2024
Action date 01 Oct 2024
Commission action Order Issued

In the Matter of Certification of Compliance with Section 254(e) of the Federal Telecommunications Act of 1996 and Certification of Appropriate Use of Kansas Universal Service Fund Support.

The Commission opened this proceeding on March 21, 2024, for purposes of collecting data from eligible telecommunications carriers (ETCs) in Kansas. The ETCs were to file the data by July 1, 2024. The data is used to determine whether the KCC will certify to the Federal Communications Commission (FCC) and the Universal Service Administrative Company (USAC) that ETCs are using federal universal service funds only for the provision, maintenance and upgrading of facilities and services for which the support is intended. The data is also used to determine whether ETCs in Kansas utilized their KUSF monies appropriately.

https://estar.kcc.ks.gov/estar/ViewFile.aspx/24-GIMT-612-GIT_Order_Opening_Docket.pdf?Id=21bdb272-c94d-47bc-9535-272c80f61917

The KCC issued an Order on September 24, 2024, in which it determined that KCC staff shall submit letters to the FCC and USAC to certify that the carriers listed have certified that their federal universal service fund support was used in 2023 and will be used in 2025 only for the provision, maintenance, and upgrading of facilities and services for which support was intended. The Order also penalized three ETCs for late and incomplete filings. Letters, dated September 24, 2024, were submitted to the FCC and USAC.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/24-GIMT-612-GIT.pdf?Id=a2fa3c21-5c4e-4baa-a520-cf255669a634>

GENERAL INVESTIGATION

Docket number 24-GIMT-459-GIT
Docket type Telecom
Date filed 04 Jan 2024
Action date 02 May 2024
Commission action Approved

In the Matter of a General Investigation into Depreciation Rates Applicable to Rural Incumbent Local Exchange Carriers.

On September 29, 2023, both Twin Valley Telephone, Inc. (Twin Valley) and The Southern Kansas Telephone Company, Inc. (Southern Kansas) filed identical applications requesting Commission approval of a depreciation rate for Fixed Wireless Equipment and Towers (Docket Nos. 24-TWVT-300-DRS and 24-SKNT-299-DRS respectively). Neither asset class had previously been included in the Commission's schedule of acceptable depreciation rates from Docket No. 94-GIMT-082-DRS, nor has the Federal Communications Commission (FCC) determined an appropriate depreciation rate for these assets.

On November 3, 2023, Staff filed a Report and Recommendation (R&R) in both dockets. Staff recommended approval of a 5% depreciation rate for Towers. Staff further recommended approval of a rate of 14.28% for Fixed Wireless Equipment. Rural Incumbent Local Exchange Carriers' (RLECs) current depreciation rates were set more than 25 years ago and recommended that these new rates be set on an interim basis until the Commission can evaluate a more complete general investigation into depreciation rates which would be applicable to all RLECs.

On December 28, 2023, the Commission adopted Staff's R&R and opened a general investigation into depreciation rates applicable to RLECs on January 4, 2024.

On May 24, 2024, the RLECs submitted its Comments in the Docket requesting the Commission make the following updates to the RLEC common depreciation schedule: (1) the addition of depreciation rate ranges for fiber optic cable – underground, buried, and aerial; (2) the addition of depreciation rate ranges for fixed wireless equipment and towers; and (3) removal of categories of obsolete telecommunications equipment,

such as electromechanical switches and payphones. Additionally, the RLECs requested that the Commission confirm the existing process for RLECs requesting approval for the use of a depreciation rate that falls outside of the depreciation schedule's approved range.

On September 6, 2024, Staff submitted their Report and Recommendation ("Staff's R&R") recommending the Commission adopt separate depreciation rate ranges for fiber optic cable, adopt depreciation rate ranges for fixed wireless equipment and fixed wireless towers, and remove depreciation rate ranges for obsolete equipment.

On October 1, 2024, the Commission approved the Order Adopting Staff's Report and Recommendation Setting Depreciation Rates, which included a revised common depreciation schedule.

TOTAH COMMUNICATIONS, INC.

Docket number 24-TTHT-343-KSF
Docket type Telecom
Date filed 18 Oct 2023
Action date 02 May 2024
Commission action Granted

In the Matter of the Application of Totah Communications, Inc. for Additional Kansas Universal Service Fund Support Pursuant to K.S.A. 66-2008.

On October 18, 2023, Totah Communications, Inc. (Totah) filed an Application for increased Kansas Universal Service Fund (KUSF) support based on Totah's embedded costs, revenue requirements, investments and expenses. Totah requested an increase of \$627,462 in its annual, cost-based KUSF support.

On February 22, 2024, Staff filed direct testimony recommending an increase of \$261,943 in Totah's annual cost-based KUSF support.

On May 7, 2024, Totah agreed to Staff's recommended increase apart from updating audit expense to include all known and measureable charges. After including the remaining audit expense, Staff's recommendation would increase to the amount of \$262,943. At the conclusion of the five-year amortization period allowed for audit expense, Totah's annual

KUSF draw will be reduced by \$19,023 (one-fifth of the total trued-up audit expense of \$95,116).

On March 27, 2024, Staff and Totah filed a Joint Motion to approve the Settlement Agreement regarding Totah's annual cost-based KUSF support.

On May 2, 2024, the Commission issued an Order approving the Settlement Agreement regarding Totah's annual cost-based KUSF Support with an effective date of June 1, 2024.

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=9d965eb7-7584-4866-b5c5-24576fc90ebf>

SOUTH CENTRAL TELEPHONE ASSN. INC.

Docket number 24-SCNT-131-KSF
Docket type Telecom
Date filed 11 Aug 2023
Action date 19 Mar 2024
Commission action Approved

In the Matter of the Application of South Central Telephone Association, Inc. for an Increase in its Cost-Based KUSF Support.

On August 11, 2023, South Central Telephone Association, Inc. (South Central) filed an Application for increased Kansas Universal Service Fund (KUSF) support based on South Central's embedded costs, revenue requirements, investments and expenses. South Central requested an increase of \$2,139,562 in its annual, cost-based KUSF support.

On December 12, 2023, Staff filed direct testimony recommending an increase of \$1,878,560 in South Central's annual cost-based KUSF support.

On January 3, 2024, South Central agreed to Staff's recommended increase apart from updating audit expense to include all known and measureable charges. After including the remaining audit expense, Staff's recommendation would increase to the amount of \$1,883,044. At the conclusion of the five-year amortization period allowed for audit expense, South Central's annual KUSF draw will be reduced by \$14,815 (one-fifth of the total trued-up audit expense of \$74,076).

On January 4, 2024, Staff and South Central filed a Joint Motion to approve the Settlement Agreement regarding South Central's annual cost-based KUSF support and requesting an effective date of April 1, 2024. On January 22, 2024, Staff

filed Testimony in Support of Settlement Agreement.

On March 19, 2024, the Commission issued an Order approving the Settlement Agreement regarding South Central's annual cost-based KUSF Support with an effective date of April 1, 2024.

CONSOLIDATED COMMUNICATIONS OF KANSAS COMPANY AN CONSOLIDATED COMMUNICATIONS OF MISSOURI COMPANY

<i>Docket number</i>	<i>24-CCHT-131-KSF</i>
<i>Docket type</i>	<i>Telecom</i>
<i>Date filed</i>	<i>25 Jan 2024</i>
<i>Action date</i>	<i>27 Aug 2024</i>
<i>Commission action</i>	<i>Granted</i>

In the Matter of the Joint Application of Consolidated Communications Holdings, Inc. (CCHI) and Condor Holdings LLC (Condor) for Approval of the Proposed Acquisition of the Common Stock of CCHI by Condor, and the Resulting Transfer of Control of Consolidated Communications of Kansas Company and Consolidated Communications of Missouri Company to Condor.

On January 25, 2024, Consolidated Communications Holdings, Inc., Consolidated Communications of Kansas, Consolidated Communications of Missouri, and Condor Holdings, LLC submitted a joint application for approval of the acquisition of outstanding shares of stock of Consolidated Communications Holdings, Inc. by Condor Holdings, LLC resulting in a transfer of control of Consolidated Communications of Kansas and Consolidated Communications of Missouri to Condor Holdings, LLC.

The Joint Application can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=fd75f8cc-26be-4a83-bfe3-bc5b5f6e5010>

On July 19, 2024, Commission Staff filed its Report & Recommendation detailing its investigation of the acquisition proposed in the Joint Application. Staff applied the Commission's merger standards to the proposal. Noteworthy to Staff's findings were quality service issues by Consolidated Communications of Kansas. These issues were particularly concerning to Staff because one owner of Condor Holdings, LLC was already the majority stockholder of Consolidated Communications

Holdings, Inc. Commission Staff's Report & Recommendation highlighted corrective actions and stricter quality of service metrics until the quality of service issues are resolved. Commission Staff and the Joint Applicants worked together to craft the corrective measures submitted to the Commission in the Report & Recommendation. Staff's Report & Recommendation can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=a6eb32f3-5e91-4235-9ad4-02e44d019e46>

On August 27, 2024, the Commission issued Order Approving Acquisition granting authority for the transaction and adopting the quality of service remedies proposed in Commission Staff's Report & Recommendation.

The Commission's Order can be viewed here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=f7b53157-718e-4ca0-ac19-f7e7db50cd29>

Date filed 06 Nov 2023
Action date 22 Aug 2023
Commission action Adopted

In the Matter of a Petition to Eliminate Any Commission Requirement to Distribute Annually a Printed Directory.

The role of the Transportation Division of the Kansas Corporation Commission (KCC) is to ensure appropriate and effective regulatory oversight of motor carriers, with the goal of protecting the public interest and promoting safety through comprehensive planning, licensing, education, and inspection to the extent not preempted by federal law.

Executive Summary

The Transportation Division provides comprehensive support to all Kansas based motor carriers operating commercial motor vehicles in the state of Kansas. The Division provides informational services to motor carriers in Kansas through its statewide live safety seminar program and its Special Investigator stationed throughout the state. The Division is responsible for establishing the regulations that apply to motor carriers through both state statutes and administrative regulations, ensuring that businesses, drivers and vehicles meet the appropriate economic and safety regulations to ensure the safety of the motoring public. Through collaborations with state and federal agencies as well as industry stakeholders the Division helps direct enforcement of those same rules and regulations. As our report shows, the results of those efforts have been largely successful.

Core Functions

As the lead agency that regulates motor carriers and businesses that operate commercial motor vehicles in the state, the performance measures identified in this report are a product of the Division's four Core Functions:

1. Administrative Regulations and Statutory Requirements;
2. Education and Compliance Programs;
3. Kansas Trucking Regulatory Assistance Network (KTRAN);
4. Unified Carrier Registration (UCR) Program;

The Core Functions are designed to maintain continuity, educate the industry we serve while protecting the motoring public. Our ability to communicate with our industry partners is what sets us apart. In pursuit of our goals, the Division strives to be professional, adaptable, and committed to customer service and safety. In order to be most effective, the Division has developed strong working relationships with state, federal and local authorities, as well as the regulated community.

Administrative and Statutory Obligations

The development and implementation of motor carrier regulations and adoption of federal motor carrier safety regulations is a core function of the Division. Periodic updates to the Kansas motor carrier regulations are required by 49 C.F.R.

Part 350. If updates are not made it could result in monetary consequences for our state's motor carrier safety enforcement, affecting multiple state agencies and grants. Because updating the motor carrier regulations effects multiple agencies, the Division meets with representatives from the Kansas Highway Patrol (KHP) to annually review the motor carrier regulations (K.A.R. 82-4-1 et. seq.), and draft proposed updates, amendments, additions and/or deletions.

The KCC completes its review and drafts proposed regulations which then go through a review process with the Division of Budget, Department of Administration and the Attorney General's office. Developing a regulation strategy that meets federal regulations and is calibrated for Kansas based carriers, helps set a level of regulation that takes into account the types of carriers operating in Kansas and how enforcement of the applicable regulations best apply. Setting unrealistic expectations without evaluating the realities facing Kansas based carriers, would hinder program goals and negatively affect performance measures.

The Division takes on an important role in maintaining the KCC's motor

carrier statutes to ensure the Division has authority to complete its core functions and minimize any unnecessary and outdated regulatory burden on the motor carrier industry. The Division proposes periodic changes to the statutes to ensure they are applicable in the current motor carrier industry context and conform to changes made to the Federal Motor Carrier Safety Administrations rules and policies. These changes include repealing statutes that no longer apply and modifying language to better describe the reality of the motor carrier industry today.

During the 2023 legislature, Senate Bill 28 authorized the director of accounts and reports to transfer an amount specified by the executive director of the state corporation commission, with the approval of the director of the budget, of not more than \$500,000 from the motor carrier license fees fund (142-00-2812-5500) of the state corporation commission to the motor carrier safety assistance program state fund (280-00-2208) of the Kansas Highway Patrol: Provided, the total of all transfers shall not exceed \$2,000,000 in fiscal year 2025.

Education Program

The education program is the foundation for both the economic and safety programs of the Division. It is necessary to establish an effective and efficient infrastructure that focuses on sound safety training and enforcement programs aimed at identifying and minimizing unsafe conditions potentially harmful to the motor carrier and the traveling public. The virtual education program was developed for all new and existing public and private motor carriers in Kansas. The Division traditionally averages more than 1,000 attendees annually.

The virtual classes have been very popular with the industry and have benefited staff by saving them time and the expense of traveling to the different training locations.

The seminars are designed to inform and educate new carriers, and out of compliance motor carriers, about current rules and regulations. Motor carriers are notified of seminar dates at the time they

apply for KCC authority. Safety seminar information is also located on the KCC website. The Division sends e-mails and invitations to each Kansas-based motor carrier that applies for and receives, a new USDOT number.

The Division has put an emphasis on serving rural motor carriers and ensured that those in our rural areas do not have far to go to attend a class. Additionally, rural motor carriers have access to the KCC Investigators assigned to regions all over the state. Our investigators serve as a local resource to carriers that can respond to specific questions that come up in the field.

HUMAN TRAFFICKING AWARENESS TRAINING ADDED TO EDUCATION PROGRAM

The KCC has partnered with the Attorney General's Office, Kansas Highway Patrol (KHP), Kansas Motor Carriers Association (KMCA) and Truckers Against Trafficking (TAT) to include training in identifying and reporting suspected human trafficking as part of the motor carrier safety seminars. The training is part of a focus aimed at reducing human trafficking by enlisting the help of motor carriers to report suspicious activity they encounter as they travel the nation's highways. The training began in February of 2016 and since that time more than 6,000 motor carrier representatives in Kansas have received the training.

The Truckers Against Trafficking (TAT) App is a free user-friendly resource anyone can install to be equipped with information about human trafficking.

Kansas Trucking Regulatory Assistance Network (KTRAN)

One of KTRAN's functions is to welcome New Registrants with each passing week. The system allows motor carriers and businesses to apply and renew their intrastate authorities and directs all interstate motor carriers wanting to renew their current or previous years UCR to the National Registration System (NRS) for renewals and adjustments. The project serves to enhance the Kansas E-Credentialing capability by establishing an interactive process where carriers walk through a logical set of questions to determine what authorities, forms and processes need to be followed to meet the carrier's needs. The project is an intelligent, interactive front-end to the TruckingKS.org portal, creating a more efficient business process for carriers and state motor carrier personnel.

Additionally, KTRAN serves to further integrate information about Kansas motor carriers, commercial vehicles and commercial drivers. For example, roadside enforcement has access to Commission authority, Intrastate Out-of-Service Orders and Driver Waiver information through Kansas Commercial Vehicle Information Exchange Window (CVIEW) query windows utilizing a new system-to-system interface built as part of this project. Further, KCC officials are automatically notified of PRISM OOS status changes as well as having a real-time interface to KSCVIEW for PRISM checking of carriers and vehicles prior to issuing KCC authorities.

KTRAN is one of the many programs developed through the Kansas Commercial Vehicle Information Systems and Networks (CVISN) program. In Kansas, the Department of Revenue (KDOR) is the lead agency for the CVISN program. Other agencies involved in the Kansas Expanded CVISN Program Plan are the KCC, KHP and KDOT. They have a longstanding relationship and have partnered on numerous projects. The CVISN team shares a strategic vision which includes providing unparalleled customer service; safety compliance

education; and effective, balanced enforcement of our state motor carrier rules and regulations.

Federal Unified Carrier Registration (UCR) Program

The UCR is a federal registration program managed by the Division, under which a commercial vehicle registrant operating in interstate commerce pays annual renewal fees. The UCR replaced the Single State Registration (SSR) in 2007. The program annually generates \$4,344,290.00 of which \$2 million is annually transferred to the Kansas Highway Patrol Motor Carrier Safety Assistance Program (MCSAP) for motor carrier safety related programs.

The Division also annually transfers approximately \$1 million to the Kansas Department of Transportation's Highway Fund. The remaining funds are used to fund the Administration of the UCR program and the Division's Educations and Compliance Programs.

Each entity subject to UCR is required to register and pay the fee annually through the National Registration System (NRS). The fees imposed on motor carriers and freight forwarders businesses that operate motor vehicles are graduated through a system of brackets or tiers, based on the number of vehicles they have operated; brokers and leasing companies, which operate no vehicles themselves, pay a fee at the level that applies to the smallest motor carriers. No UCR credential is issued to a UCR registrant; enforcement is accomplished through online data checks and various types of audit.

UCR defines a commercial motor vehicle (CMV) as: a self-propelled vehicle used on the highways in commerce principally to transport passengers or cargo, if the vehicle:

- Has a gross vehicle weight rating or gross vehicle weight of at least 10,001 pounds, whichever is greater, or
- when connected to trailing equipment has a gross combination weight rating or gross combination weight of at least 10,001 pounds, whichever is greater, or
- Carries placarded amounts of hazardous

KTRAN MOTOR CARRIER STATISTICS

FY2024 KTRAN Statistics	
Intrastate motor carriers holding KCC authority	881
Vehicles registered to intrastate motor carriers	4,485
Intra/interstate motor carriers holding KCC authority	5,777
New intrastate Public/For-hire applications granted	332
New Private authority applications granted	75
Fees collected from new applicants and renewals	\$109,700.00

UCR FEES

UCR Fee Schedule for CYs 2023 & 2024		
CMV Fleet Size	2023 Fees	2024 Fees
0-2	\$41.00	\$37.00
3-5	\$121.00	\$111.00
6-20	\$242.00	\$221.00
21-100	\$844.00	\$769.00
101-1,000	\$4,024.00	\$3,670.00
More than 1,000	\$39,289.00	\$35,836.00

materials, regardless of the vehicle's weight, or

- Is designed to carry more than 10 passengers, including the driver.

In Kansas, the oversight of non-payment of UCR fees began January 1, 2009, and is conducted through KHP compliance verification through roadside inspections and at the Ports of Entry, the KDOR verifies UCR compliance prior to issuing commercial plates and the KCC Transportation Division verifies UCR compliance through Compliance Reviews and audits on interstate motor carriers.

Under federal law, the Board of Directors of the Unified Carrier Registration Plan ("Board") is required to recommend to the United States Department of Transportation (USDOT), the level of fees

to be assessed in each agreement year. Each December, the Board meets to review the amount of fees collected in the previous calendar year and recommends the six fee brackets for the upcoming registration year either be adjusted or maintained to the USDOT. The USDOT reviews the UCR Boards recommendation and either approves or adjusts the next year's registration fees. The Board recognizes that the recommended adjustments require action in a final rule by the Department and the Federal Motor Carrier Safety Administration (FMCSA).

The Division's KTRAN program directs motor carriers wanting to renew their current or previous years UCR to the NRS for renewal and adjustments. Transportation Staff are able to remind motor carriers of their UCR renewal

obligations through the NRS and KTRAN portals.

The charts to the right demonstrate the success of the Transportation Division’s UCR compliance efforts. For the last two years, Kansas has been the top jurisdiction in the Midwest and North America based on the number of Kansas carriers compliant with the UCR registration requirements.

UCR COMPLIANCE

UCR Compliance for CY2023 in the Midwest Region			
Jurisdiction	Registered Carriers	Not Compliant	Percent Compliant
Nebraska	9,078	383	95.95%
Missouri	15,172	356	97.71%

Agriculture Commercial Driver's License (CDL) Reciprocity Agreements

Currently, Kansas has active Reciprocity Agreements with our counterparts in Missouri, Nebraska, and Oklahoma, which permit Kansas farmers to operate their commercial driver's license (CDL) class commercial motor vehicles (CMV) in interstate commerce within 150 air-miles of the farmers place of operation without the necessity of obtaining a CDL under certain conditions. A farmer benefits under this exemption when operating a farm registered vehicle with a valid driver's license in the farmer's home state. The vehicle must be registered as a farm vehicle and be controlled and operated by a farmer for the exclusive purpose of transporting agricultural products, farm machinery, and/or farm supplies to or from the farmer's farm. The federal statutory provisions in the Moving Ahead for Progress in the Twenty-First Century (MAP-21) legislation, were self-executing and took effect on October 1, 2012. This exemption eliminates the need for our CDL Reciprocity Agreements for the purpose of safety regulations; however, farm vehicle drivers still need the agreements for the Hazardous Materials exemptions. We continue to work on a similar agreement with representatives from Colorado.

Due to MAP-21, our CDL Reciprocity Agreements are more important now than ever. Currently, if farmers transport Hazardous Materials in interstate commerce they are not allowed to use the MAP-21 exemptions. These agreements allow a farm vehicle driver to operate up to a 150 air-mile radius from the farm in interstate commerce without requiring a commercial driver's license (CDL) and without registering in a Substance and Alcohol Testing program.

Safety Compliance Program

State law requires the KCC to verify that each new motor carrier is in compliance with the Commission's safety rules and regulations within 18 months of granting

the motor carrier Commission operating authority. To advance the Division's established mission, Transportation Staff conducts both comprehensive and focused off-site investigations and audits on new and existing motor carriers, taking appropriate action upon discovering unsafe conditions. The Transportation Division also works closely with the Kansas Highway Patrol (KHP) and the Federal Motor Carrier Safety Administration (FMCSA) to reduce accidents involving motor carriers through promotion of safety education to the motor carrier industry and oversight of State and Federal regulations.

In FY2024, the Division conducted 198 Compliance Reviews and Complaints resulting in civil assessment penalties against 143 motor carriers for violations of the Divisions safety and operating authority rules and regulations. The charts on this page summarize the violations identified during this fiscal year.

Fine amounts collected by the Division are deposited directly into the State General Fund.

FY2024 Penalty Order Summary

143 Penalties Issued
1 penalty Vacated
\$292,025 in Fines Assessed
\$69,950 Outstanding or in Collections

The KCC, KHP, KDOR and FMCSA share responsibilities in the oversight of both the state and federal motor carrier safety and economic rules and regulations. This partnership has proven to be extremely efficient and effective in contacting more carriers and drivers and in identifying high risk carriers and drivers. As a result, it is possible for the FMCSA and state oversight agencies to apply a wider range of interventions aimed at correcting high risk behavior.

These efforts have been rewarded with a measurable reduction in the number of carriers operating in an unsafe manner as well as an improved rate of compliance among Kansas carriers when compared to states in the surrounding region. The

FY2024 VIOLATIONS

Motor Carrier Violations Identified in FY2024		
Violations Issued	49 CFR Part	Description of Violation
16	172	Hazardous Materials
0	383	Commercial Driver's License
885	395	Records of Duty Violations
0	180	Cargo Tank Violations
211	396	Maintenance Violations
1	107	Hazardous Materials
292	382	Substance/Alcohol Violations
4	387	Insurance Violations
329	391	Driver Qualification Violations
0	380	Special Training Requirements
25	390	General Violations
404	392	Rules of the Road Violations
Total: 2,167		

following charts, compiled from data provided by the FMCSA, demonstrate a couple of the metrics we use to measure the effectiveness of our safety education classes and enforcement mechanisms.

Unsatisfactory and Conditional Rated Motor Carriers for CY2023

The Safety Management Systems (SMS) provides a calendar year (CY) snapshot of the 10 Midwest States domiciled Motor Carriers (MCs) operating in interstate commerce. This data compares Kansas based MC conditional and unsatisfactory rated CR data to the surrounding Midwest MCs data. The chart below illustrates the number of “conditional carriers” and “unsatisfactory carriers” found in the past CY. Conditional carriers are those who do not have adequate safety management controls in place to ensure compliance with the safety fitness standards of the FMCSA. Unsatisfactory carriers are those who have been found to have committed violations of applicable regulations after a compliance review, have a proposed unsatisfactory or have been rated unsatisfactory by the FMCSA.

The Transportation Division has 12 Special Investigators that perform both comprehensive and off-site compliance reviews on Kansas based intrastate and interstate motor carriers. The results for the ten states comparison below demonstrate Kansas has the lowest percentage of compliance reviews with a “conditional/unsatisfactory” outcome for the CY2023, which emphasizes the effectiveness of our Education and Outreach Programs.

Commercial Motor Vehicles (CMVs) Crash Data Comparison for CYs 2021, 2022 and 2023

The clearest indicator of the effectiveness of the Division’s safety efforts is the crash data of the state of Kansas compared to other Midwest states and the nationwide average. The Motor Carrier Management Information Systems (MCMIS) provides a snapshot of all crashes from US-domiciled motor carriers (MC) operating in both intrastate and interstate commerce. This direct comparison demonstrates the Division’s effectiveness

in reducing crashes compared to similarly situated states as well as the national average. The results for the ten states demonstrate Kansas has the 3rd lowest percentage of CMVs and Carriers involved in crashes outcome over the past three CYs.

For safety, A CMV means any self-propelled or towed motor vehicle used on a highway in intra/interstate commerce to transport passengers or property when the vehicle:

- (1) Has a gross vehicle weight rating or gross combination weight rating, or gross vehicle weight or gross combination weight, of 4,536 kg (10,001 pounds) or more, whichever is greater; or
- (2) Is designed or used to transport more than 8 passengers (including the driver) for compensation; or
- (3) Is designed or used to transport more than 15 passengers, including the driver, and is not used to transport passengers for compensation; or
- (4) Is used in transporting placardable quantities of hazardous materials.

UNSATISFACTORY & CONDITIONAL RATED MOTOR CARRIERS FOR CY2023

Unsatisfactory/Conditional Rated Carriers for CY2023 in the Midwest				
State	Reviews	Proposed Conditional	Proposed Unsatisfactory	Conditional/Unsatisfactory Rating
Nebraska	28	14	8	78%
Missouri	69	28	5	47%
Ohio	250	136	57	62%
Illinois	129	79	29	83%
Indiana	98	53	26	80%
Iowa	21	15	2	79%
Wisconsin	99	39	8	47%
Michigan	142	53	17	49%
Minnesota	87	38	26	73%
Kansas	118	19	18	31%*

Source: FMCSA

*Kansas had the lowest rate of conditional and unsatisfactory reviews of any Midwest state.

PERCENTAGE OF CMVS & CARRIERS INVOLVED IN CRASHES FOR CY2021-CY2023

% of CMVs & Carriers Involved in Crashes CY2021-CY2023			
	CY2021	CY2022	CY2023
Midwest	8.61	8.25	7.96

WI	8.34	7.71	7.19
NE	5.56	5.42	5.38

Civil Assessment Program Update

The KCC and KHP partnered to enhance the Kansas Safety Compliance Program with the goal of reducing the number of injury/fatality accidents involving Commercial Motor Vehicles. The Civil Assessment Program was designed and implemented for the purpose of distinguishing the responsibilities of drivers from those of the motor carriers under the Federal Motor Carrier Safety Regulations’ (FMCSRs) “Out-Of-Service” violations. Out-of-Service (OOS) violations are violations designated as serious by the Commercial Vehicle Safety Alliance (CVSA), and require that a driver or vehicle be removed from service until the violations are corrected. CVSA is a non-profit organization consisting of federal and state regulatory agencies, motor carrier industry, and representatives dedicated to improving motor carrier safety.

OBJECTIVE

The effectiveness of the roadside inspection program is based on information provided by the FMCSA Analysis and Information (A&I) database. The data is based on roadside inspections from both Kansas and foreign based motor carriers. The State of Kansas roadside inspections OOS rate compared to the national OOS for CY2023.

During this period the KS OOS rate for drivers was 6.59% compared to the national driver OOS rate of 6.72%. Kansas vehicle inspections continue to experience a lower OOS rate of 15.01% compared to the national vehicle OOS rate of 22.70% for CY2023. The hazardous materials (HM) OOS rate for KS is slightly higher at 5.48% compared to the national HM OOS rate of 4.06%.

STRATEGIES

The program focuses on the safety of the driver, equipment and the traveling public. The KCC and KHP work together on enforcement and education regarding OOS violations of the

CIVIL ASSESSMENT SUMMARY AND FINES

CY 2021, 2022, and 2023 Civil Assessment Summary of Annual Violations Issued	
Violation Type	Violations
Driver	3,500
Vehicle	3,600
Hazardous Materials	190

**The outstanding civil fines are sent to the State and National Setoff programs for collections. The fine amounts collected by the Division are deposited directly into the State General Fund.*

FMCSRs discovered during roadside inspections. The KCC will only issue one civil penalty for each OOS violation category. For example, if the truck-tractor of a combination vehicle is placed OOS for brakes and the trailer is also placed OOS for brakes, the company will be documented for both OOS violations, but only fined for one. The KHP and KCC will allow the civil assessment to be waived for OOS violations that are outside the obvious normal method of company operations. The KHP Trooper or local enforcement officer will have the ability to provide information to recommend that no civil assessment be issued. If the carrier has demonstrated, at the roadside inspection, that the violation was 1) potentially unavoidable; 2) the carrier has processes in place to prevent the violation; and 3) the carrier clearly has the means to correct the violation, the Trooper/Officer may recommend no civil assessment be issued. In all cases, the field decision may be superseded after the inspection is reviewed.

Conclusion

The Transportation Division has undertaken significant efforts to enhance the oversight responsibilities within its purview and has made significant improvements in motor carrier safety and economic regulation.

The Transportation Division continues to explore ways to enhance and refine its role, to the benefit of the motor carrier industry and the Kansas public.

Pursuant to K.S.A. 66-104(e) of High Banks
Wind LLC.

Consumer Complaints

The Commission's Office of Public Affairs and Consumer Protection (PACP) assists Kansas utility customers when they have questions or need help in resolving an issue with a regulated utility. In FY2024, the staff handled 2,033 complaints and helped return more than \$136,000 to consumers in disputed charges. PACP staff worked with ratepayers from all across the state to get answers and resolutions. The following charts illustrate the statewide assistance offered and the types of complaints received by industry type as well as category.

TOTAL COMPLAINTS BY COUNTY | FY24

Consumers from across the state contacted the KCC for assistance in resolving utility complaints. The largest number of consumer complaints came from counties with the highest populations (Sedgewick, Johnson and Shawnee).

TOTAL COMPLAINTS BY INDUSTRY | FY24

COMPLAINTS	
Electric	732
Other	589
Gas	480
Telecommunications*	226
Water	6
TOTAL COMPLAINTS	2,033

ADJUSTMENTS	
Gas	\$68,576.33
Electric	\$45,253.82
Telecommunications*	\$12,232.44
Other	\$10,587.48
Water	\$0.00
**TOTAL ADJUSTMENTS	\$136,650.07

* This includes service IDs (CLEC, LEC, IXC, VOIP, PAGER, CELL, OSP, ETC, CABLE).

** Disputed amounts that KCC investigators helped return to Kansas consumers.

TOTAL COMPLAINTS BY CATEGORY | ALL INDUSTRIES COMBINED

CONSUMER COMPLAINTS BY CATEGORY | ELECTRIC

CONSUMER COMPLAINTS BY CATEGORY | GAS

CONSUMER COMPLAINTS BY CATEGORY | TELECOMMUNICATIONS*

* This includes service IDs (CLEC, LEC, IXC, VOIP, PAGER, CELL, OSP, ETC, CABLE)

CONSUMER COMPLAINTS BY CATEGORY | WATER

CONSUMER COMPLAINTS BY CATEGORY | OTHER

TOTAL CONSUMER COMPLAINTS BY MONTH | FY24

In FY2024, complaints trended upward in July and August due to higher cooling bills. Complaints generally tapered off in November due to fewer disconnections and expanded payment plan options available during the Cold Weather Rule. In April and May, after the Cold Weather Rule ended, complaints increased.

TOTAL CONSUMER COMPLAINTS | FY20 - FY24

Consumer complaints remained stable through 2020, then increased in 2021 due to concerns related to supply issues and higher costs during Winter Storm Uri. Complaints dropped in 2022 and 2023, but trended up again in 2024 with customers expressing cost concerns. In addition, calls related to unregulated companies and services rose.
