KANSAS

CORPORATION COMMISSION

KATHLEEN SEBELIUS, GOVERNOR

BRIAN J. MOLINE, CHAIR

ROBERT E. KREHBIEL, COMMISSIONER

MICHAEL C. MOFFET, COMMISSIONER

January 2, 2006

The Kansas Corporation Commission (KCC) and the Kansas Highway Patrol (KHP) are joining efforts to enhance the Kansas Safety Compliance Program with one goal in mind, to reduce the number of injury/fatality accidents involving Commercial Motor Vehicles. This joint effort will result in formation of a Civil Assessment Penalty Program for noncompliance with safety regulations. Under the program, drivers and carriers may expect to see the following changes:

New KHP Policy “Driver”: Effective January 1, 2006, KHP officers have been trained and instructed to issue misdemeanor citations to drivers for the applicable out-of-service (OOS) violations of the Federal Motor Carrier Safety Regulations (FMCSR) discovered during roadside inspections as determined by the CVSA, North American Standard Out-Of-Service Criteria. This change in policy emphasizes the driver’s role, understanding and responsibility, and holds them accountable and liable for areas under their purview.

New KCC Civil Assessment Project “Motor Carrier”: Effective April 1, 2006, the KCC will assess civil penalties to all motor carriers for the applicable OOS violations of the FMCSR’s discovered during roadside inspections as determined by the CVSA, North American Standard Out-Of-Service Criteria. This new program emphasizes the responsibility of motor carriers, and holds them accountable and liable for areas under their purview.

If a driver is issued a misdemeanor citation for an OOS violation, there will be no additional civil penalty assessed to the motor carrier for the same OOS violation. KCC will only issue one civil penalty fee for each OOS violation category. For example:

- The tractor of a combination vehicle is placed OOS for an air brake lining with a thickness less than 1/4 inch, as well as OOS for brake adjustment limits and the trailer is also placed OOS for brake adjustment limits, the company will be issued three OOS violations but only fined for one brake OOS.
- Scenario two, a driver is placed OOS for three OOS violations discovered during a roadside inspection. The OOS violations include an 11-hour rule, a 14-hour rule and a 70-hour rule violation. The driver will be issued a misdemeanor citation for the 11-hour OOS violation, the company will be issued three OOS violations, and because the driver will be cited for the 11-hour OOS violation, the company will not be issued a civil penalty.

As stated above, the KCC and KHP are joining efforts to reduce the number of injury/fatality accidents involving Commercial Motor Vehicles. This joint enforcement project will allow both the KCC and KHP to focus our resources on unsafe drivers and motor carriers, resulting in a more effective, efficient and safe environment for the motoring public. If you have any questions regarding this program, feel free to contact one of the agencies as indicated below. We appreciate your continued support in making the highways in the state of Kansas safer for everyone.

Sincerely,

Mike J. Hoeme, Director

Unified Carrier Registration (UCR) Act

The UCR Act is a federally mandated commercial motor vehicle registration program administered by the States for motor carrier operations that cross a State line. UCR funds are used by States for administration and enforcement of motor carrier safety programs.

UCR Fees: Apply to all motor carriers or other entities required to obtain an *Interstate* USDOT, FF, MC, or MX number and/or is required to register with the Federal Motor Carrier Safety Administration (FMCSA). There are six fee categories and the registration fees are based on the number of commercial motor vehicles operated in interstate commerce.

UCR Renewal Period: Begins October 1st and runs through December 31st of each year unless otherwise posted. Kansas based motor carriers must register their companies in the Kansas Trucking Regulatory Assistance Network (KTRAN) in order to pay the UCR fees. The link is: <https://www.ucr.gov/>.

Commercial Motor Vehicle (CMV) Means: a self-propelled vehicle used on the highways in commerce principally to transport passengers or cargo (as defined under 49 UCS Section 31101), if the vehicle:

- (1) Has a gross vehicle weight rating or gross vehicle weight of at least 10,001 pounds, whichever is greater;
- (2) Is designed to transport more than 10 passengers including the driver; or
- (3) Is used in transporting material found by the Secretary of Transportation to be hazardous under 49 U.S.C. Section 5103 and transported in a quantity requiring placarding under regulations prescribed by the Secretary.

Power Units not meeting the UCR CMV Definition: For example, motor carriers operating non-CMV(s) less than or equal to 10,000 or less than 10 passengers including the driver, the fleet size for the UCR purposes would be zero and the carrier would register and pay the lowest fee bracket.

Applicability of the Provisions of the UCR Agreement: The UCR Agreement applies to the following types of interstate operations of passenger and property:

- (1) Motor carrier;
- (2) Motor private carrier of property;
- (3) Freight forwarder;
- (4) Broker;
- (5) Leasing company; and
- (6) CMV registered with IRP plates **cannot be excluded from the UCR vehicle count.**

UCR Exempt Operations:

- (1) Wholly intrastate CMV;
- (2) Private Motor Carriers of Passengers.

Enforcement Period: begins January 1st and runs through December 31st of each year unless otherwise posted.

PART 395 – Hours of Service Regulations for (Property) Carrier Drivers

395.3(a) Except as otherwise provided in §395.1, no motor carrier shall permit or require any driver used by it to drive a property-carrying commercial motor vehicle, nor shall any such driver drive a property-carrying commercial motor vehicle, regardless of the number of motor carriers using the driver's services, unless the driver complies with the following requirements:

(1) Start of work shift. A driver may not drive without first taking 10 consecutive hours off duty;

(2) 14-hour period. A driver may drive only during a period of 14 consecutive hours after coming on duty following 10 consecutive hours off duty. The driver may not drive after the end of the 14-consecutive-hour period without first taking 10 consecutive hours off duty.

(3) Driving time and rest breaks.

(i) Driving time. A driver may drive a total of 11 hours during the 14-hour period specified in paragraph (a)(2) of this section.

(ii) Break. Except for drivers who qualify for either of the short-haul exceptions in § 395.1(e)(1) or (2), driving is not permitted if more than 8 consecutive driving hours have passed since the end of the driver's last off-duty, on-duty not driving or sleeper-berth period of at least 30 minutes.

(b) No motor carrier shall permit or require a driver of a property-carrying commercial motor vehicle to drive, nor shall any driver drive a property-carrying commercial motor vehicle, regardless of the number of motor carriers using the driver's services, for any period after—

(1) Having been on duty 60 hours in any period of 7 consecutive days if the employing motor carrier does not operate commercial motor vehicles every day of the week; or

(2) Having been on duty 70 hours in any period of 8 consecutive days if the employing motor carrier operates commercial motor vehicles every day of the week.

(c) Any period of 7/8 consecutive days may end with the beginning of an off-duty period of 34 or more consecutive hours

It is recommended that motor carriers and drivers keep a summary (recap) of drivers' hours worked and hours available. This will prevent hours of service violations.

Every motor carrier must require every driver to make a record of duty status (log), in duplicate, for each 24-hour period;

Motor carriers and drivers who do not complete and keep records of duty status (logs) or who make false records of duty status (logs) can be prosecuted;

The driver must give or send by mail the original of the driver's record of duty status (log) to his/her motor carrier within 13 days after completing the record. The motor carrier must then keep the record of duty status (log) for 6 months;

Local Driver Provision: Drivers may extend the 14-hour on-duty period by 2 additional hours if they:

(1) Are released from duty at the normal work reporting location for the previous 5 duty tours, and

(2) Return to the normal work reporting location and are released from duty within 16 hours, and

(3) Have not used this exception in the previous 6 days, except following a 34-hour restart of a 7/8 day period

Sleeper Berth Guidelines: A driver may accumulate the equivalent of at least 10 consecutive hours off-duty by taking not more than two periods of either sleeper berth time or a combination of off-duty time and sleeper berth time if:

- (A) Neither rest period is shorter than 2 consecutive hours;
- (B) One rest period is at least 7 consecutive hours in the sleeper berth;
- (C) The total of the two periods is at least 10 hours; and
- (D) Driving time in the period immediately before and after each rest period, when added together:
 - (1) Does not exceed 11 hours driving; and
 - (2) Does not violate the 14-hour duty-period limit.

(iii) *Calculation*

- (A) *In general.* The driving time limit and the 14-hour duty-period limit must be re-calculated from the end of the first of the two periods used to comply for the 10 hour break.
- (B) *14-hour period.* The 14-hour duty-period for purposes of § 395.3(a)(2) does not include qualifying rest periods for the sleeper berth.

Short-Haul Provision Guidelines: A driver does not have to make a record of duty status (log book) if they can comply with the following short-haul requirements:

- Allows drivers of property carrying CMV's to operate within a 150 air-mile (172.6 statute miles) radius of their normal work reporting location;
- Drivers may drive up to 11 hours after coming on duty following 10 or more consecutive hours off duty;
- Drivers are not required to keep Log Books, but must maintain time records;
- Drivers shall not drive after the 14 hour after coming on duty 5 days a week or after the 16 hour after coming on duty 2 days a week
- Employers must maintain and retain time records for a period of 6 months showing the time the duty period began, ended, and total hours on duty each day in place of RODS;

PART 395 – Hours of Service Regulations for (Passenger) Carrier Drivers

- A motor carrier cannot allow or require any driver to drive:
 - (1) More than 10 hours following 8 consecutive hours off duty; or
 - (2) After being on duty 15 hours; or
 - (3) After being on duty more than 60 hours in any 7 consecutive days
- A motor carrier operating vehicles every day of the week cannot allow or require any driver to drive after being on duty more than 70 hours in any 8 consecutive days
- It is recommended that motor carriers and drivers keep a summary (recap) of drivers' hours worked and hours available. This will prevent hours of service violations
- Every motor carrier must require every driver to make a record of duty status (log), in duplicate, for each 24-hour period
- Motor carriers and drivers who do not complete and keep records of duty status (logs) or who make false records of duty status (logs) can be prosecuted
- The driver must give or send by mail the original of the driver's record of duty status (log) to his/her motor carrier within 13 days after completing the record. The motor carrier must then keep the record of duty status (log) for 6 months
- A driver does not have to make a record of duty status (log) if the following apply:
 - (1) The driver operates within a 100 air-mile radius of the normal work reporting location;
 - (2) The driver returns to the work-reporting station and is released from work within 12 consecutive hours;
 - (3) At least 8 consecutive hours off duty separate each 12 consecutive hours on duty;
 - (4) The driver does not exceed 10 hours maximum driving time following 8 consecutive hours off duty; and
 - (5) The motor carrier maintains and retains for 6 months accurate and true time records showing the following:
 - (i) The time the driver reports for duty each day
 - (ii) The total number of hours the driver is on duty each day
 - (iii) The time the driver is released from duty each day
 - (iv) The total time for the preceding 7 days for drivers used the first time or multiple-employer drivers

Electronic Logging Device (ELD)

The ELD Rule applies to most motor carriers and drivers who are required to keep records of duty status (RODS). This includes commercial buses as well as trucks. It applies to drivers domiciled in Canada and Mexico, unless they qualify for an exception to the rule.

Implementation Phase Compliance Table

	ELD	AOBRD	Logging Software	Paper
Phase 1	Yes	Yes	Yes	Yes
Phase 2	Yes	Yes		
Phase 3	Yes			

Phase 1: Awareness and Transition: COMPLETED

Phase 2: Phased-In Compliance Phase: COMPLETED

Phase 3: Full Compliance Phase: NOW IN EFFECT

After December 16, 2019 all motor carriers and drivers subject to the rule must use certified, registered ELDs that comply with requirements of the ELD regulations.

ELD Rule Exceptions

The following are not required to use ELDs (but motor carriers may choose to use ELDs even if they are not required):

- Drivers who use paper logs no more than 8 days during any 30-day period.
- Driveaway-towaway drivers (transporting an empty vehicle for sale, lease, or repair).
- Drivers of vehicles manufactured before model year 2000.

These are tips to consider when choosing an ELD, and a checklist of key features and functions that every ELD must provide.

Tips

- Most Important: Make sure that the specific ELD model you are considering is on FMCSA’s list of registered ELDs by visiting <https://3pdp.fmcsa.dot.gov/ELD/ELDList.aspx>. The vendors on this list have self-certified that their device is compliant with all of the ELD technical specifications, and registered each ELD model with FMCSA.
- Take a few minutes to research the ELD provider by checking with the Better Business Bureau and looking at online reviews for their products and customer service.
- While many ELDs may be part of a Fleet Management System (FMS) or include FMS functions, there is no requirement for Fleet Management functionality. An ELD that complies with FMCSA requirements is what is required by the ELD rule.

Checklist

Before choosing an ELD, have the vendor verify that its device meets **all** of the ELD specifications in the rule. While this list is not a complete list of all required ELD functions, at a minimum have the vendor demonstrate or show you all the features and functions in the list below.

✓	ELD Feature or Function
	Provides separate accounts for drivers and administrative (non-driver) ELD users
	Has “integral synchronization” with the engine control module to automatically record engine power status, vehicle motion status, and other data
	Automatically records all driving time and at intervals of 60 minutes. Records date, time, location, engine hours, vehicle miles, and driver identification
	Records location with an accuracy of one-mile radius during on-duty driving periods
	Reduces location accuracy to a 10-mile radius when vehicle is used for authorized personal use
	ELD time is synchronized with UTC (coordinated universal time)
	Retains data for the current 24-hour period and the previous 7 consecutive days
	Prevents tampering; does not allow anyone to alter or erase information originally collected for driver ELD records
	Requires driver to review unidentified driver records – and either acknowledge assignment of this driving time, or indicate that the records do not belong to the driver
	Allows a driver to obtain a copy of his/her ELD records on demand – either through a printout or electronic file
	Supports one of two options for electronic data transfer: <ul style="list-style-type: none"> • Telematic type: using wireless web services and email; or • Local transfer type: using USB2.0 and Bluetooth
	Displays all required standardized data to authorized safety officials on demand – through a screen display or printout that includes three elements: a daily header, graph grid showing driving duty status changes, and detailed daily log data. The graph grid, if printed, must be at least 6 inches by 1.5 inches
	Requires driver certification and annotation (written explanation) for any edits to records that are made by the driver or any other ELD user
	Requires certification of driver records at the end of each 24-hour period
	ELD provider furnishes user’s manual, instructions for handling malfunctions and record-keeping during malfunctions, and instructions for transferring ELD hours of service records to safety officials
	Volume control or mute option for any audio feature

Regulatory Differences between AOBRDs and ELDs

Required Feature/Function	1988 AOBRD Rule	ELD Rule
Integral Synchronization	Integral synchronization required, but term not defined in the Federal Motor Carrier Safety Regulations (FMCSRs).	Integral synchronization interfacing with the CMV engine electronic control module (ECM), to automatically capture engine power status, vehicle motion status, miles driven, engine hours. (CMVs older than model year 2000 exempted.)
Recording Location Information of Commercial Motor Vehicle (CMV)	Required at each change of duty status. Manual or automated.	Requires automated entry at each change of duty status, at 60-minute intervals while CMV is in motion, at engine-on and engine-off instances, and at beginning and end of personal use and yard moves.
Graph Grid Display	Not required – “time and sequence of duty status changes.”	An ELD must be able to present a graph grid of driver’s daily duty status changes either on a display or on a printout.
Hours of Service (HOS) Driver Advisory Messages	Not addressed.	HOS limits notification is not required. “Unassigned driving time/miles” warning must be provided upon login.
Device “Default” Duty Status	Not addressed.	On-duty not driving status, when CMV has not been in-motion for five consecutive minutes, and driver has not responded to an ELD prompt within one minute. <u>No other non-driver-initiated status change is allowed.</u>
Clock Time Drift	Not addressed.	ELD time must be synchronized to Universal Coordinated Time (UTC); absolute deviation must not exceed 10 minutes at any time.
Communications Methods	Integral synchronization required, but term not defined in the Federal Motor Carrier Safety Regulations (FMCSRs).	Integral synchronization interfacing with the CMV engine electronic control module (ECM), to automatically capture engine power status, vehicle motion status, miles driven, engine hours. (CMVs older than model year 2000 exempted.)
Resistance to Tampering	Required at each change of duty status. Manual or automated.	Requires automated entry at each change of duty status, at 60-minute intervals while CMV is in motion, at engine-on and engine-off instances, and at beginning and end of personal use and yard moves.
Graph Grid Display	Not required – “time and sequence of duty status changes.”	An ELD must be able to present a graph grid of driver’s daily duty status changes either on a display or on a printout.

PART 396-INSPECTION, REPAIR AND MAINTENANCE

Every motor carrier must make sure that all its vehicles are regularly inspected, repaired and maintained.

All vehicle parts and accessories must be in a safe and proper working order at all times.

Pushout windows, emergency doors and emergency door-marking lights in buses must be inspected at least every 90 days.

Generally, motor carriers must maintain the following maintenance records for each of their commercial motor vehicles:

- (1) An identification of the vehicle including company number (if so marked), make, serial number, year and tire size. Also, if the carrier does not own the vehicle, the records must show the name of the person providing the vehicle.
- (2) A schedule of the type and due date of the various inspections and maintenance operations to be performed.
- (3) A record of inspection, repairs and maintenance showing their date and type.
- (4) A lubrication record.
- (5) A record of tests conducted on pushout windows, emergency doors, and emergency door-marking lights on buses.

Maintenance records must be kept where the vehicle is either housed or maintained for a period of 1 year and for 6 months after the vehicle leaves the motor carrier's control.

A vehicle must not be driven if it is likely to break down or cause an accident.

Every motor carrier must require its drivers to complete a vehicle inspection at the end of each day. If a safety violation is noted, a report must be made that identifies the commercial motor vehicle and lists all defects that could affect its safe operation.

Before the vehicle is driven again, the motor carrier must repair any safety defects listed and sign the vehicle inspection report.

A copy of the last vehicle inspection report must be available to the driver. Every motor carrier must keep the original vehicle report for at least 3 months. (Page 30)

Before driving a commercial motor vehicle the driver must do the following:

- (1) Be satisfied that it is in safe operating condition;
- (2) Review the last inspection report; and
- (3) Sign the report if defects were listed and the report has been signed to show that repairs were made.

DEFINITIONS AS USED IN THIS ENDORSEMENT

ACCIDENT includes continuous or repeated exposure to conditions which results in bodily injury, property damage, or environmental damage which the insured neither expected nor intended.

MOTOR VEHICLE means a land vehicle, machine, truck, tractor, trailer, or semi trailer propelled or drawn by mechanical power and used on a highway for transporting property, or any combination thereof.

BODILY INJURY means injury to the body, sickness, or disease to any person, including death resulting from any of these.

ENVIRONMENTAL RESTORATION means restitution for the loss, damage, or destruction of natural resources arising out of the accidental discharge, dispersal, release or escape into or upon the land, atmosphere, watercourse, or body of water, of any commodity transported by a motor carrier. This shall include the cost of necessary measures taken to minimize or mitigate damage to human health, the natural environment, fish, shellfish, and wildlife.

PROPERTY DAMAGE means damage to or loss of use of tangible property.

PUBLIC LIABILITY means liability for bodily injury, property damage, and environmental restoration.

The insurance policy to which this endorsement is attached provides automobile liability insurance and is amended to assure compliance by the insured, within the limits stated herein, as a motor carrier of property, with Sections 29 and 30 of the Motor Carrier Act of 1980 and the rules and regulations of the Federal Motor Carrier Safety Administration.

In consideration of the premium stated in the policy to which this endorsement is attached, the insurer (the company) agrees to pay, within the limits of liability described herein, any final judgment recovered against the insured for public liability resulting from negligence in the operation, maintenance or use of motor vehicles subject to the financial responsibility requirements of Sections 29 and 30 of the Motor Carrier Act of 1980 regardless of whether or not each motor vehicle is specifically described in the policy and whether or not such negligence occurs on any route or in any territory authorized to be served by the insured or elsewhere. Such insurance as is afforded, for public liability, does not apply to injury to or death of the insured's employees while engaged in the course of their employment, or property transported by the insured, designated as cargo. It is understood and agreed that not condition, provision, stipulation, or limitation contained in the policy, this endorsement, or any other endorsement thereon, or violation thereof, shall relieve the company from liability or from the payment of any final judgment, with the limits of liability herein described, irrespective of the financial condition, insolvency or bankruptcy of the insured. However, all terms, conditions and limitations in the policy to which the endorsement is attached shall remain in full force and effect as binding between the insured and the company. The insured agrees to reimburse the company for any payment made by the company on account of any accident, claim, or suit involving a breach of the terms of the policy, and for any payment that the company would not have been obligated to make under the provisions of the policy except for the agreement contained in this endorsement.

It is further understood and agreed that, upon failure of the company to pay any final judgment recovered against the insured as provided herein, the judgment creditor may maintain an action in any court of competent jurisdiction against the company to compel such payment.

The limits of the company's liability for the amounts prescribed in this endorsement apply separately, to each accident, and any payment under the policy because of any one accident shall not operate to reduce the liability of the company for the payment of final judgments resulting from any other accident.

The Motor Carrier Act of 1980 requires limits for financial responsibility according to the type of carriage and commodity transported by the motor carrier. It is the motor carrier's obligation to obtain the required limits of financial responsibility.

APPLYING IFTA

“International Fuel Tax Agreement”

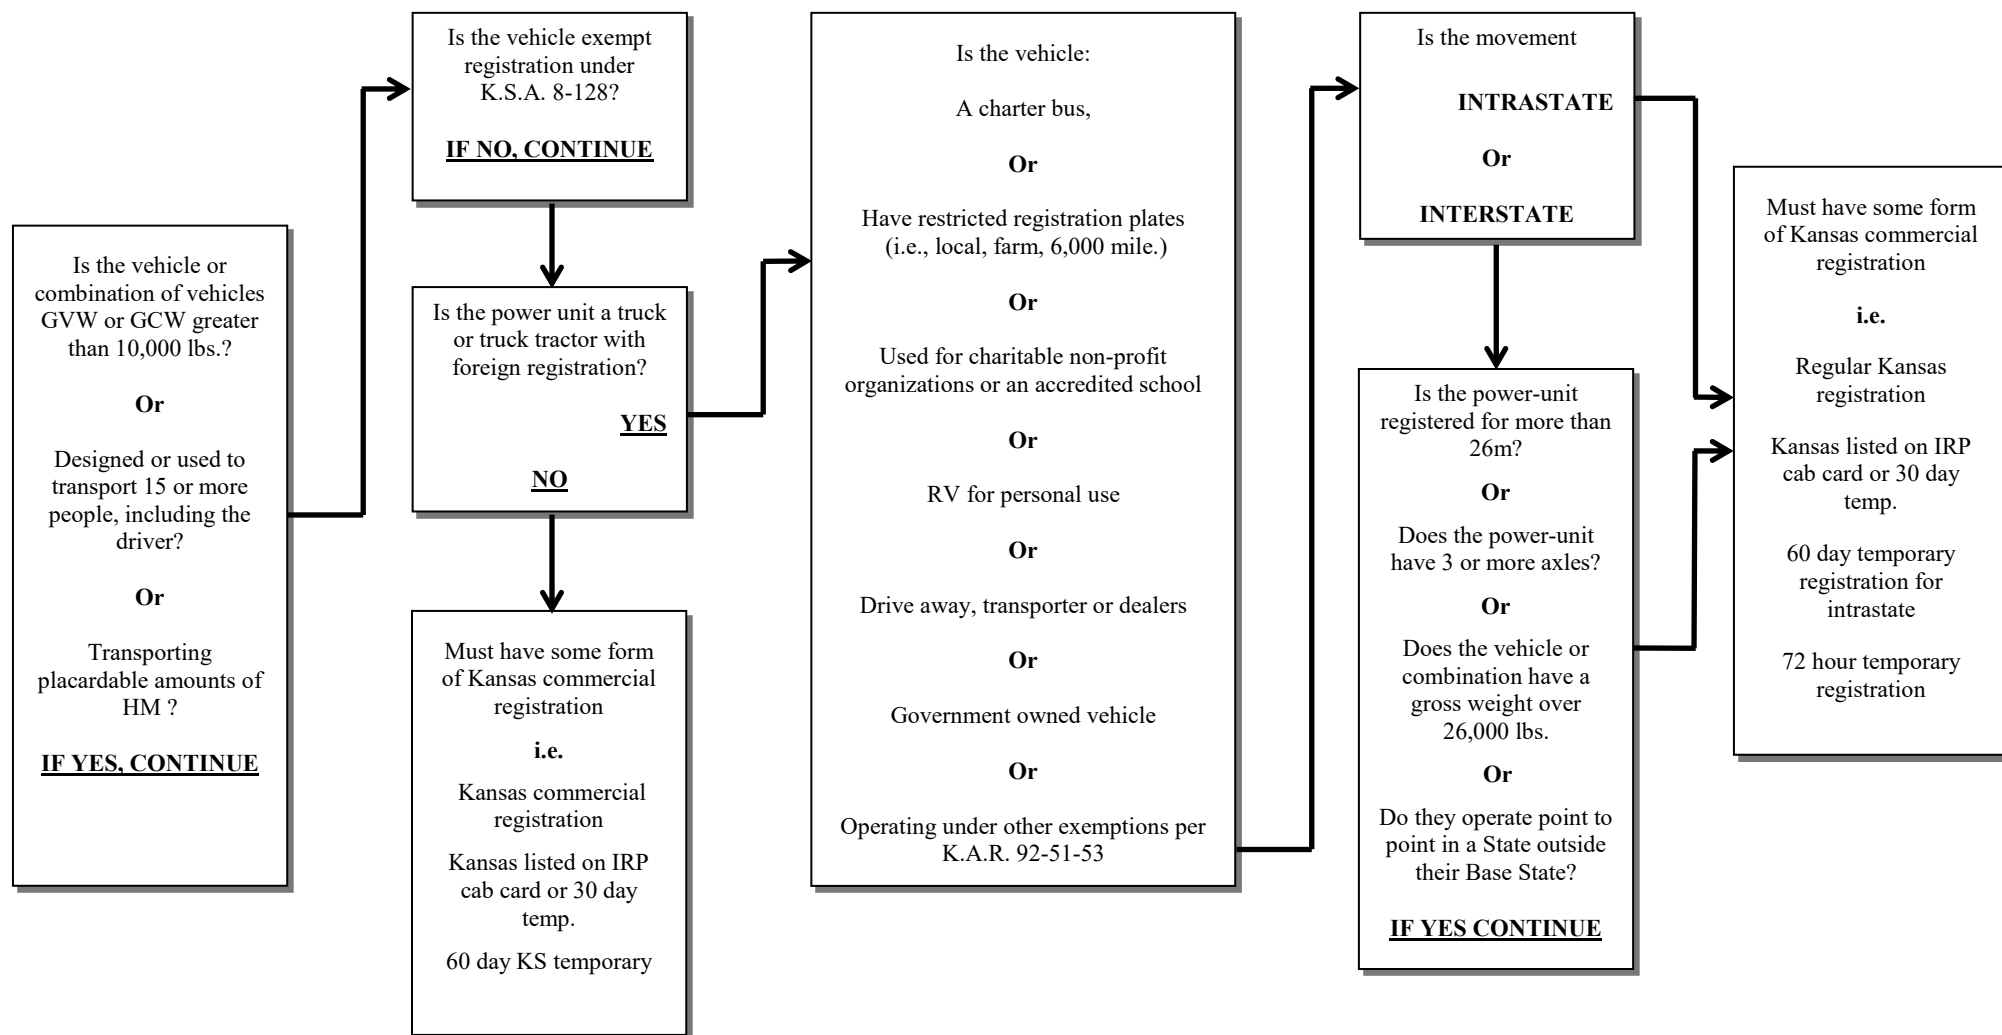

06/2019

BOARD INTERPRETATION:

The Consensus Board Interpretation is that the axles of a trailing unit have no bearing on this definition. The part of the definition alluding to the number of axles applies only to the axles on the power unit, irrespective of any trailing units. The Board agreed that a power unit with two axles, pulling a trailing unit, with a combined gross or registered weight of 26,000 pounds or less is not a qualified motor vehicle. The first and second definitions of a qualified motor vehicle refer only to the power unit. The third definition refers to the combination of the power unit and the trailing unit.
